Introduction: Lap-Shoulder Belts: Some Historical Aspects
Historical Perspective on Seat Belt Restraint Systems
Regulatory History of Automatic Crash Protection in FMVSS 208
Evaluation Methods for the Biomechanical Quality of Restraint Systems During Frontal Impact
"Seat Design - A Significant Factor For Safety Belt Effectiveness"
Thoracic Injury Assessment of Belt Restraint Systems Based on Hybrid III Chest Compression
Hybrid III Sternal Deflection Associated with Thoracic Injury Severities of Occupants Restrained with Force-Limiting Shoulder Belts
Assessment of Lap-Shoulder Belt Restraint Performance in Laboratory Testing
Chest Deflection Characteristics of Volunteers and Hybrid III Dummies
Predictive Functions for Thoracic Injuries to Belt Wearers in Frontal Collisions and Their Conversion into Protection Criteria
Response of Belt Restrained Subjects in Simulated Lateral Impact
Occupant Dynamics as a Function of Impact Angle and Belt Restraint
Chest Compression Response of a Modified Hybrid III with Different Restraint Systems
Crash Injury Prevention: A Cash Study of Fatal Crashes of Lap-Shoulder Belted Occupants
Restraint Hybrid III Dummy-Based Criteria for Thoracic Hard-Tissue Injury Prediction
Comparison and Realism of Crash Simulation Tests and Real Accident Situations for the Biomechanical Movements in Car Collisions
Assessing the Safety Performance of Occupant Restraint Systems
Behaviour of Human Surrogates Thorax under Belt Loading
A Statistical Analysis of 28,000 Accident Cases with Emphasis on Occupant Restraint Value
Effectiveness of Current and Future Restraint Systems in Fatal and Serious Injury Automobile Crashes. Data from On-Scene Field Accident Investigations
Comparative Study of 1624 Belted and 3242 Non-Belted Occupants: Results on the Effectiveness of Seat Belts
Effectiveness of Safety Belts and Airbags in Preventing Fatal Injury
Reduction in Seat Belt Effectiveness Due to Misuse
Correlation of Vehicle Performance in the New Car Assessment Program with Fatality Risk in Actual Head-On Collisions
Correlation Between Thoracic Lesions and Force Values Measured at the Shoulder of 92 Belted Occupants Involved in Real Accidents
Influence of Age and Restraint Force Value on the Seriousness of Thoracic Injuries Sustained by Belted Occupants in Real Accidents
Injuries to Restrained Car Occupants; What are the Outstanding Problems?
Injuries Caused by Seat Belt Loads to Drivers and Front Seat Passengers
Assessment of Measures Reducing Residual Severe and Fatal Injuries MAIS 3+ of Car Occupants
Injuries to Restrained Occupants in Far-Side Crashes
Females More Vulnerable than Males in Road Accidents
Motion Sequence Criteria and Design Proposals for Restraint Devices in Order to Avoid Unfavorable Biomechanic Conditions and Submarining p. 484

A Kinematic Analysis of Lap-Belt Submarining for Test Dummies p. 510

Submarining Injuries of 3 Pt. Belted Occupants in Frontal Collisions - Description, Mechanisms and Protection p. 518

Assessing Submarining and Abdominal Injury Risk in the Hybrid III Family of Dummies p. 542

Assessing Submarining and Abdominal Injury Risk in the Hybrid III Family of Dummies: Part II - Development of the Small Female Frangible Abdomen p. 565

Three-Point Belt Improvements for Increased Occupant Protection p. 596

A Mechanical Buckle Pretensioner to Improve a Three Point Seat Belt p. 604

Volunteer Tests on Human Tolerance Levels of Pretension for Reversible Seatbelt Tensioners in the Pre-Crash-Phase - Phase 1 Results: Tests Using a Stationary Vehicle p. 612

Items of an Engineering Program on an Advanced Web-Clamp Device p. 624

Hybrid III Sternal Deflection Associated with Thoracic Injury Severities of Occupants Restrained with Force-Limiting Shoulder Belts p. 634

The Programmed Restraint System - A Lesson from Accidentology p. 649

Thoracic Injury Risk in Frontal Car Crashes with Occupant Restrained with Belt Load Limiter p. 662

Frontal Impact Protection Requires a Whole Safety System Integration p. 680

Adaptive Airbag-Belt-Restraints - An Analysis of Biomechanical Benefits p. 689

Adaptive restraints - their characteristics and benefits p. 700

Optimizing Seat Belt Usage by Interlock Systems p. 716

FMVSS 208 Belt Fit Evaluation - Possible Modification to Accommodate Larger People p. 722

Development of an Electronic Belt Fit Test Device p. 733

Diagnosis of Seat Belt Usage in Accidents p. 742

Characteristics of Seat Belt Restraint System Markings p. 756

Inertial Seatbelt Release p. 767

Safety Belt Buckle Inertial Responses in Laboratory and Crash Tests p. 778

Evaluation of Belt Modelling Techniques p. 794

An Improved Belt Model in CAL3D and Its Application p. 807

Finite Element Simulation of the Occupant/Belt Interaction: Chest and Pelvis Deformation, Belt Sliding And Submarining p. 817

Historical Review of Automatic Seat Belt Restraint Systems p. 836

Seat-Integrated Safety Belt p. 846

Analytical Evaluation of an Advanced Integrated Safety Seat Design in Frontal, Rear, Side, and Rollover Crashes p. 852

Investigation of Inflatable Restraints p. 866

Injury Mitigating Benefits of an Inflatable Shoulder Belt for Seat Integrated Application p. 878

The Injury Experience of Adult Rear-Seat Car Passengers p. 892

Residual Injuries to Restrained Car Occupants in Front- and Rear-Seat Positions p. 905
New Rear Safety Belt Geometry - A Contribution to Increase Belt Usage and Restraint Effectiveness  p. 914
The Seat Belt Syndrome in Children  p. 924
Crash restraint of children by adult seat belts and booster cushions  p. 930
Survey of Older Children in Automotive Restraints  p. 945
Adult Seat Belts: How Safe are They for Children?  p. 960
The Effects of Belt Pretensioners on Various Child Restraint Designs in Frontal Impacts  p. 978
About the Editor  p. 991
