Message from the Workshop Co-Chairs p. xiii

Parallel and Multi-Computing (1)

A New List Scheduling Method Based on Structural Properties of Task Graphs p. 3
A New Model of Exploiting Loop Parallelization Using Knowledge-Based Techniques p. 9
Network Based Genetic Algorithm p. 15

Parallel and Multi-Computing (2)

A Memory Management Architecture for a Mobile Computing Environment p. 23
Domination in Bounded Interval Tolerance Graphs p. 29
A Constant Queue Partial Permutation Routing Algorithm for Cube-Connected-Cycles p. 35
Multicomputer Systems

Communication and Protocol

QoS-Based Recovery of Multimedia Objects p. 43
Packet Loss Detection Scheme for Retransmission-Based Realtime Data Transfer p. 49
A Totally Ordered and Secure Multicast Protocol for Distributed Virtual Environment p. 55

The Performance Comparison between TCP Reno and TCP Vegas p. 61

Object-Oriented System

Access Control Model in Object-Oriented Systems p. 69
Concurrent Exception Handling in a Distributed Object-Oriented Computing Environment p. 75
A Generalized Approach for Transferring Data-Types with Arbitrary Communication Libraries p. 83
MEDEA--A Model for the Event-Based Data Exchange Architecture p. 88

Network Architecture

Performance Analysis of Two Rate Punctured Convolutional Code Scheme for Wireless ATM Networks p. 97
A Hierarchical Model of Mobile Agents and Its Multimedia Applications p. 103
A Modeling Method and Evaluation of Divided-Loop Networks p. 109

Image Processing

An Efficient Color-Spatial Indexing and Retrieval Scheme for Image Database p. 117
Computing Watermarks from Images Using Quadtrees p. 123
A New Method of Facial Action Extraction and Expression Recognition of Person without Language p. 129

Multimedia Database and Application

A Multimedia Training Environment That Assists Users to Study Jewel Programs p. 137
An Idea of the Agent-Based Information Recommending System Using the Statistical Information p. 143
A Case Study on Construction of Groupware: Yuitori Network for Health, Welfare and Medical Works on Home Care p. 147
A Speedup Comparative Study: Three Third Generation DSM Systems p. 153

Internet Application

A Case Study on Participatory Redesign of Web Site with Scenario-Based Techniques p. 161

Natural Language Programming for Multimedia Information p. 167
Determining WWW User Agents from Server Access Log p. 173
Simulation and Scientific Visualization
Visual Simulation of Crack Pattern Based on 3D Surface Cellular Automaton p. 181
Visual Simulation of Snowfall, Snow Cover and Snowmelt p. 187
Error Visualization of Tetrahedral Subdivision Approach for Trilinear Interpolation p. 195
Visualization of Vortical Flow Using Multiple Slices p. 201
Modeling, Animation, and Virtual Reality
Origami Modeling Method of Leaves of Plants and CG Image Generation of Flower Arrangement p. 207
An Application Oriented Humanoid Animation System Based on VRML p. 213
Process Division in Haptic Display System p. 219
Traditional Japanese Crafting Presentation System Based on VR and Kansei Information Processing Techniques p. 225
Quality of Service
Guaranteeing Multiple QoSs in Differentiated Services Internet p. 233
Packet Scheduling in a Combined Input and Output Queued Switch Using Virtual Time Reference System p. 239
Generalizing RSVP's Traffic and Policy Control Interface p. 249
Pricing and Fee Sharing for Point to Multipoint and Quality Guaranteed Multicast Services p. 255
Network Performance
Transparent Management of Replicated WWW Document Clusters p. 263
A Framework to Support Alternative Paths to Provide the Better End-to-End Performance on the Internet p. 269
Theoretic Framework of Network Feedback Control with Long Delays p. 275
LC-RTP (Loss Collection RTP): Reliability for Video Caching in the Internet p. 281
Security and Its Applications
A World Wide Supermarket Scheme Using Rights Trading System p. 289
An Advanced Internet XML/EDI Model Based on Secure XML Documents p. 295
Privacy Enhanced Access Control by SPKI p. 301
Distributed Auction Servers Resolving Winner and Winning Bid without Revealing Privacy of Bids p. 307
VPN and Network Applications
A Proposal on FlexibleCUG Service Architecture p. 315
Tracking Frequent Traversal Areas in a Web Site via Log Analysis p. 321
"Web-CALL": A Language Learning Support System Using Internet p. 326
Mobile Computing Applications
An Adaptive Object Storage System for Mobile Computers p. 335
A Study on a Road-Vehicle Communication System for the Future Intelligent Transport Systems p. 343
A Presetting Location Strategy for Personal Communication Using Hierarchical Location Database p. 349
Parallel Computing Applications
A Method of Multi-PERT System for Parallel Jobshop Management p. 357
A New Strategic Enterprise Information Model Based on Super Parallel Evolution Computing p. 364
The Effect of Average Parallelism and CPU-I/O Overlap on Application Speedup p. 370
Addrol: A Method for On-Line Reorganization in a Multisystem DBMS with Shared Disks p. 378

Internet-Based Applications
Metadata Representation in XML for Internet-Based Electronic XML Application from Business to Government p. 387
Internet-Marks: The Secure Seal for WWW Site Authentication p. 393
An Agent-Based System for Electronic Commerce Using Recipes p. 399
Interactive Applications, etc.
A Bulk Scanning Method for Uncared-for Processes on Classroom UNIX Workstations p. 409
A Hardware/Software Co-Design Method of ITS Image Processing Development p. 415
MAC Level Access Protocol for Continuous Media Applications on Hybrid-Fiber-Coax (HFC) Networks p. 421
ISDN-Based Interactive Distance Learning between Japanese and German Elementary Schools p. 427

Multi-Agent Framework, Platform, and Tools
Kodama: As a Distributed Multi-Agent System p. 435
A Platform for Making Network Community Support Systems in a Cooperative Distributed Architecture p. 441
Reusable Software Components Based on an Agent Model p. 447
A Minimal Infrastructure Shell for Supporting Cooperative Agents in Heterogeneous Distributed Environments p. 453

Flexible Network and Applications
Open Distributed Autonomous Multi-Agent Coordination on the Web p. 461
Communication Mechanism of Loose Coupled Agents in FAMES p. 467
Flexible Network Layer in Dynamic Networking Architecture p. 473
Customizable Software Retrieval Facility for Mobile Computers Using Agents p. 479

Physical Agents and Real World Applications
Teleoperation System for Real World Robots--Adaptive Robot Navigation Based on Sensor Fusion p. 487
Can Industrial Robots Be Connected with Each Other?--Open and Networked Industrial Robots p. 493
Agent-Based Grocery Shopping System Based on User's Preference p. 499

Parallel Architectures and Applications
Relational Petri Nets with Start/Stop Place p. 509
Heuristic Techniques: Scheduling Partially Ordered Tasks in a Multi-Processor Environment with Tabu Search and Genetic Algorithms p. 515
Fault Tolerant Shared-Object Management System with Dynamic Replication Control Strategy p. 524
Influence of the Dynamic Page Aggregation on the Speedup of Nautilus DSM System p. 530

Parallel Algorithm Designs
Estimating the Parallel Performance of IQMR Method for Unsymmetric Large and Sparse Linear Systems p. 539
An Efficient Parallel Algorithm for High Resolution Color Image Reconstruction p. 547
The Waveform BiConjugate Gradient Method for Parallel Transient Simulation of Semiconductor Devices p. 553
Author Index p. 561
