Preface

Acknowledgements

Information Visualisation

Keynote Lecture: Leveraging Human Capabilities in Information Perceptualization p. 3

Bringing 3D to Teleradiology p. 4

Digital Library

Content-Based Image Visualization p. 13

BibRelEx: Exploring Bibliographic Databases by Visualization of Annotated Contents-Based Relations p. 19

Co-Cited Author Maps as Interfaces to Digital Libraries: Designing Pathfinder Networks in the Humanities p. 25

Visualisation in Education

Trial Results from a Custom Distance Learning System Based on Hybridization of CD-ROM, Web, and Active-X Component Technology p. 39

Hypermedia Aided Learning (HAL): A Viewpoint on Delivering Education in the New Millennium p. 44

Computer-Aided Geometric Design

Character Recognition of Arabic and Latin Scripts p. 51

A Rational Spline for Visualizing Positive Data p. 57

Curve Designing Using a Rational Cubic Spline with Point and Interval Shape Control p. 63

Hexagonal Raster for Computer Graphic p. 69

Digital Library

LVis--Digital Library Visualizer p. 77

Content-based Retrieval of 3D Models in Distributed Web Databases by Visual Shape Information p. 82

Direct Annotation: A Drag-and-Drop Strategy for Labeling Photos p. 88

Multimedia

Multimedia, Cyberspace and Ethics p. 99

Visual Communication for the Masses p. 105

Multimedia Databases p. 111

Visualisation in Built Environment

Issues in Participative Use of an Historic City Millenial Web Site p. 119

Abstract Data Visualisation in Built Environment p. 126

Evaluating Visualizations Based on the Performed Task p. 135

Computer Animation and Special Effects

Keynote Lecture: Fur and Hair: Practical Modelling and Rendering Techniques p. 145

Design Visualisation

Visualisation of Routes in Design Process Planning p. 155

A Functional Analysis of the Role of Visualisation in Architectural Conceptual Design p. 165

Data Analysis and Visualization of Cluster-Oriented Genetic Algorithm Output p. 173
Implementation of Mechanisms for Concurrent 3D Design and Visualisation p. 179

Visual Communication

A Virtual Lab-Notebook for Multidimensional Microscopic Images p. 187

Searching for the Perfect Match: A Comparison of Free Sorting Results for Images by Human Subjects and by Latent Semantic Analysis Techniques p. 192

Virtual but Visible Software p. 198

How Presentation Graphs Communicate p. 206

Information Visualisation: Application

Effects of Desktop 3D World Design on User Navigation and Search Performance p. 215

Colour Image Retrieval Using Virtual Reality p. 221

Date Optimisation for Visualisation of FEM-Date p. 226

Haptic Representation of the Atom p. 232

Digital Art: Humanity and Visualisation

Memory Arts to the New Code Paradigm; The Artist Engineers Virtual Information Space and Virtual Experience p. 239

Transmitting Visual Information: Icons Become Words p. 244

Creating Abstract Digital Paintings with Painting Camera Technique p. 250

A Proposal for the Development of a Study to Determine the Effectiveness of a Creativity-Centered Unit of Study in the Advancement of Spatial Abilities of American and Japanese Female Engineering Students p. 255

Information Visualisation

Domain Visualization for Digital Libraries p. 261

Keynote Lecture: Collaborative Visual Data Navigation on the Web p. 268

Information Visualisation

A Browsing System for a Database Using Visualization of User Preferences p. 277

The Iceberg Metaphor to Support the Knowledge Crystallization Cycle p. 283

Structuring the Visual Content of Digital Libraries Using CBIR Systems p. 288

Visualization in Detection of Intrusions and Misuse in Large Scale Networks p. 294

Visualisation and Animation

Automatic Generation of Hair Texture with Line Integral Convolution p. 303

Multiresolution Image Morphing in Wavelet Domain p. 309

Computer-Based Animation of a Multi-legged Articulated Body p. 315

SinusCone--A ThetaPhi Algorithm for Human Arm Animation p. 318

Computer-Aided Geometric Design

Improved Extraction of Planar Segments for Scanned Surfaces p. 325

Optimal Hierarchical Adaptive Mesh Construction Using FCO Sampling p. 331

Intelligent Digitisation of Arabic Characters p. 337

Co-Planar Shape-Fitting Using the Rotating Squares Algorithm p. 343

Biomedical Visualisation: Application

Deformable Organ Modeling with Multi-Layer Particle Systems p. 351

Automatic 2-D Gel Registration Using Distance Minimisation of Image Morphing p. 357

Extracting Geometric Models of Muscles from the Visible Human Data p. 362

Morphological Definition of Anatomic Shapes Using Minimal Datasets p. 366
Information Visualisation

Direct Manipulation of Parallel Coordinates p. 373
Mapping Information onto 3D Virtual Worlds p. 379
Management Through Vision: A Case Study Towards Requirements of BizViz p. 387
A Study on the Ray-Tracing Acceleration Technique Based on the ZF-Buffer Algorithm p. 393

Computer Animation

Axial Representation for Modelling 3D Shapes p. 401
Creation of a Noh Mask Using a 3D Computer Graphics Technique p. 407
3D Illustrative Effects for Animating Line Drawings p. 413

Visualisation

A Language-Based Framework for a Form Processor p. 421
A Template-Matching Approach to Free-Form Feature Recognition p. 427
Animated Texture Alpha-Masks for Flow Visualization p. 434
Information Visualization in Locating Obnoxious Facility: Some Examples with Mono and Bicriteria Models p. 439

Digital Art

Ideograms in Polyscopic Modeling p. 447
Sonification of Remote Sensing Data: Initial Experiment p. 453
Architectural Illustration: The Advancement of Light, Shade, and Shadows Knowledge with 3D Digital Technology p. 461

Web Graphics and Visualisation

An Information Database for VRML Cities p. 469
A Visualisation System for Web Local Search p. 474
3D Virtual Warehouse on the WEB p. 479
Internet-Based Teleoperation Using VE Modelling Based on Single Images p. 485
Augmented and Virtual Reality: Application

A Classification of Multi-Sensory Metaphors for Understanding Abstract Data in a Virtual Environment p. 493
Video-Based Camera Registration for Augmented Reality p. 499
Parametric Modelling: Concept and Implementation p. 504
Information Visualisation: Application

Sequence World: A Genetics Database in Virtual Reality p. 513
Navigation-Dependent Visualisation of Distributed Internet Structures p. 518
Performance Measures for Training Spatial Knowledge in Virtual Environments Using Division, Inc., and VEGA Marine Geometric Models p. 524
Visualising Human Consciousness Content Using Java3D/X3D and Psychological Techniques p. 529

Digital Art

Interactive Art for Zen: "Unconscious Flow" p. 535
Japanese Culture and Digital Art Resources on the Internet p. 541
Water Dome--An Augmented Environment p. 548
Collaborative Design Visualisation
