Preface

Program Committee

Additional Reviewers

General ACSW Conference Chairs

Invited Talk

Design Theory for Advanced Data Models

Papers

Incremental Maintenance of Multi-Source Views

Describing Capabilities of Internet Data Sources for Information Discovery and Sharing

View Updates in a Semantic Data Modelling Paradigm

A Subsequence Matching Algorithm Supporting Moving Average Transform of Arbitrary Order in Time-Series Databases Using Index Interpolation

A Parameterised Algorithm for Mining Association Rules

On the Unification of Query Algebras and Their Extension to Rational Tree Structures

Querying Web Distributed Databases for XML-Based E-Businesses: Requirement Analysis, Design, and Implementation

Effective Compression for the Web: Exploiting Document Linkages

Derivation of Incremental Equations for Nested Relations

Self-Maintaining Web Pages--An Overview

Efficient Declustering Techniques for Temporal Access Structures

An Algorithm for Answering Queries Efficiently Using Views

Measuring Similarity of Interests for Clustering Web-Users

Similarity-Based Algebra for Multimedia Database Systems

An Agent-Based Approach for Supporting Cross-Enterprise Workflows

Assessment by Belief

Are Two Pictures Better Than One?

Heuristic Algorithms for I/O Scheduling for Efficient Retrieval of Large Objects from Tertiary Storage

A Comparison of Multi-Level Concurrency Control Protocols

Evolution Support in Large-Scale Interoperable Systems: A Metadata Driven Approach

Towards a Temporal World-Wide Web: A Transaction-Time Server
