Separating Features in Source Code: An Exploratory Study  p. 275
Comparing Frameworks and Layered Refinement  p. 285
Analysis of Architectures
Quantifying the Costs and Benefits of Architectural Decisions  p. 297
Survivability Analysis of Networked Systems  p. 307
Adaptive Feedback Scheduling of Incremental and Design-to-Time Tasks  p. 318
Improving the Testing Process
Incorporating Varying Test Costs and Fault Severities into Test Case Prioritization  p. 329
Finding Failures by Cluster Analysis of Execution Profiles  p. 339
Understanding IV and V in a Safety Critical and Complex Evolutionary Environment: The NASA Space Shuttle Program
Reliability and Mobile Agents
Theory of Software Reliability Based on Components  p. 361
Engineering Mobile-Agent Applications via Context-Dependent Coordination  p. 371
Consistent Group Membership in Ad Hoc Networks  p. 381
Analysis of Requirements
Fast Formal Analysis of Requirements via "Topoi Diagrams"  p. 391
Conceptual Modeling through Linguistic Analysis Using LIDA  p. 401
A Framework for Multi-Valued Reasoning over Inconsistent Viewpoints  p. 411
Functional Paleontology: System Evolution as the User Sees It  p. 421
Formal Frameworks
A General Framework for Formalizing UML with Formal Languages  p. 433
Efficient Filtering in Publish-Subscribe Systems Using Binary Decision Diagrams  p. 443
A Scalable Formal Method for Design and Automatic Checking of User Interfaces  p. 453
Scientific Rigour, an Answer to a Pragmatic Question: A Linguistic Framework for Software Engineering
Architectures for Emerging Applications
An Architecture for Heterogeneous Groupware Applications  p. 475
A Web-Oriented Architectural Aspect for the Emerging Computational Tapestry  p. 485
XAS: A System for Accessing Componentized, Virtual XML Documents  p. 493
Case Study Papers
Infrastructure Support
Evaluating the Reverse Engineering Capabilities of Web Tools for Understanding Site Content and Structure: A Case Study  p. 514
A Case Study of the Evolution of Jun: An Object-Oriented Open-Source 3D Multimedia Library  p. 524
Applications of New Paradigms in Software Development
Case Study: Extreme Programming in a University Environment  p. 537
Improving Validation Activities in a Global Software Development  p. 545
Applying WinWin to Quality Requirements: A Case Study  p. 555
Software Evolution
Tigra--An Architectural Style for Enterprise Application Integration  p. 567
Reengineering Analysis of Object-Oriented Systems via Duplication Analysis  p. 577

Education Papers
Practical Software Engineering Education
Evaluating Software Engineering Students to Manage Risk  p. 591

Corrective Maintenance Maturity Model (CM[superscript 3]): Maintainer's Education and Training  p. 610

Degree Programs for Software Engineering Education
An Efficient Set of Software Degree Programs for One Domain  p. 623
The Software Factory: Combining Undergraduate Computer Science and Software Engineering Education  p. 633

Plenary Sessions
Software Engineering and the Internet  p. 655
The Coming-of-Age of Software Architecture Research  p. 656
"Tolerating Inconsistency" Revisited  p. 665
Software Engineering Challenges: A CIO's Perspective  p. 666
Reuse That Pays  p. 667

Challenges and Achievements in Software Engineering
Process-Centered Software Engineering Environments: Academic and Industrial Perspectives  p. 671
Specification and Modeling: An Academic Perspective  p. 673
Specification and Modeling: An Industrial Perspective  p. 676

Invited Industry Presentations
Global Software Development: The Bell Labs Collaboratory  p. 681
Does More Necessarily Mean Better? The Software Performance and Reliability Bottleneck  p. 682
Software Engineering in a Startup  p. 682
Technology Drivers and Research Challenges of Future e-Business  p. 683
Challenge of Keitai Software: Software Engineering for Next Generation Mobile Phone Systems  p. 683
Web Services and Software Engineering: Challenges and Opportunities  p. 683
Enterprise Methodology != Software Development Methodology  p. 683
Mining Selected Components: The Options Analysis for Reengineering (OAR)  p. 684
Achieving Usability through Software Architecture  p. 684

Frontiers of Software Practice
Enabling Technologies for the Future of Voice-Based Web Access  p. 687
Jini Network Technology: Devices, Desires, and Designs  p. 687
Inter-Language Object Sharing with the Common Language Runtime: Infrastructure for MS .NET  p. 688
Collaborative Software Engineering  p. 688
AntiPatterns in Software Architecture  p. 688
Dependability of Embedded Systems  p. 688
Simple Object Access Protocol (SOAP) and Web Services  p. 689
Auditing Legacy Systems for Security and Survivability  p. 689
Panels
Software Engineering Body of Knowledge (Swebok)  p. 693
Impact Project Panel: Determining the Impact of Software Engineering Research Upon Practice  p. 697
Software Engineering Research Agendas Panel (SERA): What Can't We Do, But Need to How to Do?  p. 697
Panel: Perspectives on Software Engineering  p. 699
Tutorials
UML for Software Engineers  p. 705
The Intertwining between Risk and Project Management  p. 707
Methods of Component-Based Software Engineering: Essential Concepts and Classroom Experience  p. 709
From Use Cases to Code--Rigorous Software Development with UML  p. 711
Describing Software Architecture with UML  p. 715
Software Product Lines and Software Architecture Design  p. 717
How to Do Inspections When There is No Time  p. 718
EasyWinWin: A Groupware-Supported Methodology for Requirements Negotiation  p. 720
Tutorial on Fundamental Concepts for Practical Software Architecture  p. 722
An Introduction to Java 2 Micro Edition (J2ME); Java in Small Things  p. 724
Improving Software Inspections by Using Reading Techniques  p. 726
Mining Components for a Software Architecture and a Product Line: The Options Analysis (OAR) Method  p. 728
Hyper/J: Multi-Dimensional Separation of Concerns for Java  p. 729
Enterprise JavaBean Architecture and Design Issues  p. 731
State, Event, Time and Diagram in System Modeling  p. 733
From UML to Java, Building a 3-Tier Architecture: Case Study  p. 735
Designing Concurrent, Distributed, and Real-Time Applications with UML  p. 737
Using Transformation Systems for Software Maintenance and Reengineering  p. 739
Effective Software Architecture Design: From Global Analysis to UML Descriptions  p. 741
Bridging the Requirements/Design Gap in Dynamic Systems with Use Case Maps (UCMs)  p. 743
Introduction to the Attribute Driven Design Method  p. 745
Workshops
2nd International Workshop on Living with Inconsistency  p. 749
4th ICSE Workshop on "Software Engineering over the Internet"  p. 751
Second ICSE Workshop on Software Product Lines: Economics, Architectures, and Applications  p. 753
