Preface
Symposium Organizers and Program Committee
Referees
Invited Address
Algebras for Hazard Detection
Circuits I
A New Improved Cost-Table-Based Technique for Synthesis of 4-Valued Unary Functions Implemented Using Current-Mode CMOS Circuits
Dual-Rail Multiple-Valued Current-Mode VLSI with Biasing Current Sources
Realization of NMAX and NMIN Functions with Multi-Valued Voltage Comparators
Design and Verification of Systems
An Application of Multiple-Valued Logic to Test Case Generation for Software System Functional Testing
Spectral Techniques in Binary and Multiple-Valued Switching Theory
Invited Address
Tunnelling Diode Technology
Circuits II
Power Efficient Inter-Module Communication for Digit-Serial DSP Architectures in Deep-Submicron Technology
A 4-Digit CMOS Quaternary to Analog Converter with Current Switch and Neuron MOS Down-Literal Circuit
Fuzzy Logics and Their Applications I
On Some Classes of Fuzzy Information Relations
On Complete Residuated Many-Valued Logics with T-Norm Conjunction
Circuits III
A Three-Valued D-Flip-Flop and Shift Register Using Multiple-Junction Surface Tunnel Transistors
Flash Analog-to-Digital Converter Using Resonant-Tunneling Multiple-Valued Circuits
The Use of Arithmetic Operators in a Self-Restored Current-Mode CMOS Multiple-Valued Logic Design Architecture
Fuzzy Logics and Their Applications II
Evaluation of Inconsistency in a 2-Way Fuzzy Adaptive System Using Shadowed Sets
Identification of Incompletely Specified Fuzzy Unate Logic Function
Invited Address
Representation Theorems and the Semantics of (Semi)Lattice-Based Logics
Tutorial
Tutorial: Complexity of Many-Valued Logics
Invited Address
Exploiting Polarity in Multiple-Valued Inference Systems
Logic Design I
Multiple-Valued Galois Field S/D Trees for GFSOP Minimization and Their Complexity
Multiple-Valued Mask-Programmable Logic Array Using One-Transistor
Universal-Literal Circuits
Decomposition of Multi-Valued Functions into Min- and Max-Gates
Automated Reasoning and Complexity I
Cut-Elimination in a Sequents-of-Relations Calculus for Godel Logic
Model Checking with Multi-Valued Temporal Logics
Automated Reasoning with Ordinary Assertions and Default Assumptions
Logic Design II
Information Theory Method for Flexible Network Synthesis
Compact SOP Representations for Multiple-Output Functions: An Encoding Method Usingp. 207
Multiple-Valued Logic
Two-Stage Exact Detection of Symmetries
Automated Reasoning and Complexity II
A Modular Reduction of Regular Logic to Classical Logic
Hypersequents as a Uniform Framework for Urquhart's C, MTL and Related Logics
Polynomial-Time Algorithms for Verification of Some Properties of k-Valued
Functions Represented by Polynomials
Invited Address
Challenge of a Multiple-Valued Technology in Recent Deep-Submicron VLSI
Computing Paradigms
A Model of Reaction-Diffusion Cellular Automata for Massively Parallel Molecular Computing
Synthesis of Multiple-Valued Arithmetic Circuits Using Evolutionary Graph Generation
An Axiomatization of Generalized Entropy of Partitions
MV Logics and Algebras I
Many Valued Paraconsistent Logic
On Logical Fiberings and Decomposition of Many-Valued Operations: A Brief Survey
Relations between Clones and Full Monoids
Tutorial
Classical Gentzen-Type Methods in Propositional Many-Valued Logics
Decision Diagrams
Selection of Efficient Re-Ordering Heuristics for MDD Construction
Bit-Level and Word-Level Polynomial Expressions for Functions in Fibonacci Interconnection Topologies
Design of Haar Wavelet Transforms and Haar Spectral Transform Decision Diagrams for p. 311
Multiple-Valued Functions
Fuzzy Logics and Set Theories
A Set Theory within Fuzzy Logic
On a Kleenean Extension of Fuzzy Measure
On Axiomatic Characterization of Fuzzy Approximation Operators II. The Rough Fuzzy Set Based Case
Neural Networks
A Functional Manipulation for Improving Tolerance against Multiple-Valued Weight Faults of Feedforward Neural Networks p. 339
Logic Circuit Diagnosis by Using Neural Networks p. 345
The Designing and Training of a Fuzzy Neural Hamming Classifier p. 351
MV Logics and Algebras II
Weierstrass Approximations by Lukasiewicz Formulas with One Quantified Variable p. 361
Composing Submonads p. 367
A Method of Uncertainty Reasoning by Using Information p. 373
Author Index p. 379
