Fault-Adaptive Control: A CBS Application p. 205
Tools and Technology II
Developing Instance Model-Based Applications p. 214
System Level Mutation Analysis Applied to a State-Based Language p. 222
A Practical Semantics for Design Facet Interaction p. 229
Agents
Implementation of Object-Oriented Protocol Agents in Communication Devices p. 238
An Agent-based Bayesian Forecasting Model for Enhanced Network Security p. 247
TRACY A Prototype of an Architected Middleware to Support Mobile Agents p. 255
Tools and Technology III
Sensor Networking p. 262
A Graduate-Level Course on CBS Design Tool Development p. 269
The New Metamodeling Generation p. 275
Analysis and Experimentation
Analysis of DSP-Kernel Software by Implicit Cache Simulation p. 282
Twenty Years of Safe Train Control in Sweden p. 289
A Super Tracer and an Analyzer for Analyzing Detailed Behavior of a Linux on a Pentium Family Processor (STDB)
Composition and CBS
Visual Composition with SDL Beans p. 308
Software Components Adaptive Integration p. 315
Towards a New Component Composition Process p. 322
Working Group Reports
Forensic ECBS: The Way Forward p. 332
Ambulance Despatch Systems: The Melbourne Story p. 337
Report of the Standards Working Group p. 343
Engineering of Computer-Based Systems--A Proposed Curriculum for a Degree Program at Bachelor Level 344
Formal Specifications of Computer-Based Systems p. 357
Author Index p. 359
