Message from the Symposium Chairs
Symposium Organizers
Program Committee
Reviewers
Real-Time Process Scheduling
Deadline Fair Scheduling: Bridging the Theory and Practice of Proportionate Fair Scheduling in Multiprocessor Systems
Schedulability Analysis and Utilization Bounds for Highly Scalable Real-Time Services
A Hierarchical Extension to the Constant Bandwidth Server Framework
Quality of Service I
Scalable QoS Supports for Multimedia Applications in the Next-Generation Internet
A Feedback Control Approach for Guaranteeing Relative Delays in Web Servers
Hierarchical QoS Management for Time Sensitive Applications
Resource Management
Resource Partition for Real-Time Systems
Protecting Resources with Resource Control Lists
Quality Events: A Flexible Mechanism for Quality of Service Management
Works-in-Progress
Simulation-Based Debugging of Soft Real-Time Applications
Verifiable Embedded Real-Time Application Framework
The Implementation of a Multi-Server Distributed MPEG Video System
A Versatile Wireless Network Architecture with High Throughput, Low Power, and QoS Guarantees
Fault-Tolerant Scheduling under Time and Resource Constraints
Scheduling Tasks with Variable Deadlines
Broadcasting Consistent Data in Mobile Computing Environments
Adaptive Buffer Sensitive Scheduling for Transmitting Video Streams in a Mobile Multimedia System
Providing Absolute Differentiated Services with Statistical Guarantees in Static-Priority Scheduling Networks
Resource Sharing in Reservation-Based Systems
Quality of Service II
The Linux-SRT Integrated Multimedia Operating System: Bringing QoS to the Desktop
Augmented CPU Reservations: Towards Predictable Execution on General-Purpose Operating Systems
R-EDF: A Reservation-Based EDF Scheduling Algorithm for Multiple Multimedia Task Classes
System Implementation I
Two Case Studies in Predictable Application Scheduling Using Rialto/NT
VORAL: A System for Voice Over IP Routing in Application Layer
Probabilistic Bandwidth Reservation by Resource Priority Multiplexing
