Message from the General Chair p. ix
Organizing and Program Committees p. x
Keynote Speech
Intelligent Agent-Based Decision-Support Systems for Complex C[superscript 2] Applications p. 2
Real-Time Issues
Communicating TILCO: A Model for Real-Time System Specification p. 4
TILCO-X, an Extension of TILCO Temporal Logic p. 15
On-Line Scheduling of Real-Time Distributed Computers with Complex Communication Constraints p. 26
A Method for Verifying Real-Time Properties of Ada Programs p. 35
Panel: Issues with Web Site Software
Formal Issues
Verification of Hybrid Systems: Formalization and Proof Rules in PVS p. 48
Action Refinement for True Concurrent Real Time p. 58
Formal Guides for Experimentally Verifying Complex Software-Implemented Fault Tolerance Mechanisms p. 69
Compositional Construction of Protocol Behaviours with Arbitrary Channel Capacities p. 80
Keynote Speech
Future Mobile Phones--Complex Design Challenges from an Embedded Systems Perspective p. 92
Industrial Experiences
Quality Attribute Conflicts--Experiences from a Large Telecommunication Application p. 96
Can We Learn Anything from Hardware Preventive Maintenance? p. 106
Motivating the Corrective Maintenance Maturity Model (CM[superscript 3]) p. 112
Panel: Dependability in Industrial Systems/Risk Management of Complex Systems
Design Issues
An Object-Oriented Analysis and Design Approach for Safe Object Sharing p. 122
Design Method for Conceptual Design of By-Wire Control: Two Case Studies p. 133
Designing Distributed Component-Based Systems with DCL p. 144
A Framework for Analyzing and Organizing Complex Systems p. 155
Keynote Speech
The Problem of Platform Complexity p. 168
Architectural Issues
Towards a Framework for Architecting Mechatronics Software Systems p. 170
Aspect-Oriented Specification Architectures for Distributed Real-Time Systems p. 180
Independent Proprietorship and Competition in Distributed Web Search Architectures p. 191
Intelligent Agent-Based Software Architecture for Combat Performance under Overwhelming Information Inflow and Uncertainty p. 200
Testing Issues
Using a Model Checker to Test Safety Properties p. 212
Techniques for Testing Component-Based Software  p. 222
Module Testing Embedded Software--An Industrial Pilot Project  p. 233
Analysis and Modeling
Analysis of Self-Stabilization for Infinite-State Systems  p. 240
Parallel Machine Translation: Principles and Practice  p. 249
Managing Feature Interactions in Telecommunications Systems by Temporal Colored Petri Nets  p. 260
Modelling Free Flight with Collision Avoidance  p. 270
Authors' Index  p. 281
