Message from the General Chair
Message from the Program Co-Chairs
Conference Committees
Additional Reviewers
Keynote Address I
Program Analysis I
[F] Analysis and Implementation Method of Program to Detect Inappropriate Information Leak
[F] Computing Executable Slices for Concurrent Logic Programs
[F] Exception Analysis for Multithreaded Java Programs
Software Reliability
[F] An Analysis of Software Correctness Prediction Methods
[F] A Fast Algorithm to Compute Maximum Likelihood Estimates for the Hypergeometric Software Reliability Model
Software Quality
[F] Incremental Quality Network
[F] Strategic Drivers of Software Quality: Beyond External and Internal Software Quality
[E] Using a Coding Standard to Improve Program Quality
Program Analysis II
[F] Object-Oriented Program Behavior Analysis Based on Control Patterns
[F] A Path-Based Approach to the Detection of Infinite Looping
Quality Metrics
[F] Assurance of Conceptual Data Model Quality Based on Early Measures
Software Development I
[F] Why Software Engineering is Riskier than Ever
[F] On Prediction of Cost and Duration for Risky Software Projects Based on Risk Questionnaire
Formal Methods I
[F] Partial Validation of a Design Specification with Respect to Requirements
[F] Constructing Hardware/Software Interface Using Protocol Converters
[S] DLOTOS: A LOTOS Extension for Clock Synchronization in Distributed Systems
Testing I
[F] Optimal Test Profile in the Context of Software Cybernetics
[F] Testable Use Cases in the Abstract State Machine Language
[E] Experience Report on Conformance Tests for CORBA ORBs
Software Development II
[E] Railway Power SCADA System Commissioning "Case Example"
[S] Stakeholder Discovery and Classification Based on Systems Science Principles
[S] Quality and People in the Development of Situationally Specific Methods
[S] A Risk-Driven Design Model for Embedded System | p. 204

Keynote Address II

End-to-End Integration Testing | p. 211

Formal Methods II

[F] Incremental Fault-Tolerant Design in an Object-Oriented Setting | p. 223

[F] PAFAS at Work: Comparing the Worst-Case Efficiency of Three Buffer Implementations | p. 231

[S] Class and Module in SOFL | p. 241

Testing II

[F] Combining the Animation and Testing of Abstract Data Types | p. 249

[F] A Selective Software Testing Method Based on Priorities Assigned to Functional Modules | p. 259

[S] URL-Driven Automated Testing | p. 268

Process Models and Tools

[F] A Tailored Capability Model for Inspection Process Improvement | p. 275

[S] A Path to Virtual Software Inspection | p. 283

[S] A Software Factory Model Based on ISO9000 and CMM for Chinese Small Organizations | p. 288

Requirements Engineering

[F] Requirements Management for the Incremental Development Model | p. 295

[F] A New Tool to Analyze ER-Schemas | p. 302

Usability

Process Improvement and Assessment

[F] Special Requirements for Software Process Improvement Applied in Teleworking Environments | p. 331

[S] Priorities of Process Improvement Outcomes Based on Process Capability Levels | p. 349

Formal Verification

[F] Towards Automatic Verification of Embedded Control Software | p. 375

E-commerce

[F] Beyond E-commerce Software Quality: Web Services Effectiveness | p. 397

Configuration Management
