Scheduling Software Projects to Minimize the Development Time and Cost with a Given Staff p. 187

Improving the Testing Process by Program Static Analysis p. 195
Tailoring and Verifying Software Process p. 202

Software Testing Techniques
The Design and Implementation of Automata-based Testing Environment for Java Multi-thread Programs p. 221
An Effective Testing Technique for Component Composition in EJBs p. 229
On Path-Wise Automatic Generation of Test Data for Both White-Box and Black-Box Testing p. 237

Object-Oriented Analysis and Design
On the Implementation of Catalysis Frameworks in COM p. 243
A Requirements Description Metamodel for Use Cases p. 251
Formal Object-Oriented Analysis and Design of an Online Ticketing System p. 259
Applying Mutation Analysis for Object-Oriented Programs Using a Reflective Approach p. 267

Software Maintenance
A Slicing Method for Object-Oriented Programs Using Lightweight Dynamic Information p. 273

Expert Maintainers' Strategies and Needs when Understanding Software: A Case Study Approach p. 281

Formal Methods III
The Steam Boiler in a Unified Theory of Z and CSP p. 291
Formal Framework for a Generic Combination of a Process Algebra with an Algebraic Specification Language p. 299
Orchestrating Computations on the World-Wide Web p. 305

Formal Methods IV
Partitioning Program into Hardware and Software p. 309
A Probabilistic Approach to Automatic Verification of Concurrent Systems p. 317
A Theory of Combinational Programs p. 325
Using a Scenario Model to Derive the Functions of a Formal Specification p. 329

Software Architecture and Framework
Quality Requirement Elicitation for the Architecture Evaluation of Process Computer Systems p. 335
Architectural Issues in Mobile Augmented Reality Systems: A Prototyping Case Study p. 341

Development of Session Management Mechanism for Cellular Phone with WWW Connection p. 345

Keynote IV Cost Analysis of Games, Using Program Logic p. 351

Formal Methods V
Compilation of Specifications p. 355
Model Checking UML Statecharts p. 363
Automatic Synthesis of the DC Specifications of Lip Synchronisation Protocol p. 371
Reengineering and Reverse Engineering
Identifying Candidate Objects Using Hierarchical Clustering Analysis  p. 381
A Framework for Migrating Procedural Code to Object-Oriented Platforms  p. 390
An Automatic Restructuring Approach Preserving the Behavior of Object-Oriented Designs  p. 400
Component-Based Design Techniques/Empirical Studies
A Component-Based Framework and Reusability in Garment  p. 411
Component Metrics to Measure Component Quality  p. 419
Knowledge Scouts: Reducing Communication Barriers in a Distributed Software Development Project  p. 427
Framework for Third Party Testing of Component Software  p. 431
Formal Methods VI
Z User Studio: An Integrated Support Tool for Z Specifications  p. 437
Model Checking Object-Z Classes: Some Experiments with FDR  p. 445
An XML/XSL Approach to Visualize and Animate TCOZ  p. 453
Author Index  p. 461
