Message from the General Chair
Program Committee

Coping with Complexity: Abstractions, Models, and Data p. 3
Cloning Parallel Simulation Programs p. 7
On the Performance of STAR: An Efficient Delay-Bound, Low-Cost Multicast Algorithm p. 11

A Route Discovery Optimization Scheme Using GPS System p. 20
A Bandwidth-Reservation Mechanisms for On-Demand Ad Hoc Path Finding p. 27
Design and Performance Modeling and Simulation of Self-Healing Mechanisms for Wireless Communication Networks p. 35
Integrating Multiple Parallel Simulation Engines for Mixed-Technology Parallel Simulation p. 45

Controlling Buffer Usage in Critical Channel Traversing p. 53
The ABELS Brokering System p. 63
Temporal Uncertainty Time Warp: An Agent-Based implementation p. 72
Simulation-Based VV&amp;A; Methodology for HLA Federations: An Example from the Aerospace Industry p. 80

Statistical Simulation of Symmetric Multiprocessor Systems p. 89
A Statistical Mechanical Approach to Framework for Modeling Irregular Programs on Distributed or Cluster Computers p. 98
Approximate Simulation of Distributed-Memory Multithreaded Multiprocessors p. 107
Scheduling a Job Mix in a Partitionable Parallel System p. 115
A Modular Client-Server Discrete Event Simulator for Networked Computers p. 125
REMOTE: A Tool for Automatic Remote Execution of CSIM Simulation Models p. 134
Simulating Group Communication Protocols through an Object-Oriented Framework p. 143
Ranking a List of Discrete-Event Models p. 151

A Distributed Graphical Environment for Interactive Fault Simulation and Analysis p. 160

An Architecture and Implementation to Support Large-Scale Data Access in Scientific Simulation Environments p. 169
Using Simulation to Facilitate Effective Workflow Adaptation p. 177
GroupGraph: A Collaborative Hierarchical Graph Editor Based on the Internet p. 182
Performance Simulation of the Jambala Platform p. 190
Traffic Monitoring Techniques for Measurement Based Flow Acceptance Control p. 201
Evaluating the Performance of Photonic Interconnection Networks p. 209
Performance Evaluation and Analysis of Protocols for IP Mobility Support A Quantitative Study p. 219

Performance Analysis for Data Service in Third Generation Mobile Telecommunication Networks p. 227
Gang Scheduling Performance on a Cluster of Non-Dedicated Workstations p. 235
SPaDES/Java: Object-Oriented Parallel Discrete-Event Simulation p. 245
Middleware for a Distributed Reconfigurable Simulator p. 253
Developing An Object Exchange Model Template for GRIDS Distributed Supply Chain Simulations p. 259

Dynamic Load-Balancing for BSP Time Warp p. 267
Scalability of Parallel Simulation Cloning  p. 275
Simulation of a Vehicle Traffic Control Network Using a Fuzzy Classifier System  p. 285
A Flow Injection Model Using Cell-DEVS  p. 292
Faster than Real-Time Machine Learning within High Fidelity Simulations  p. 300
Behavioral Model Composition in Simulation-Based Design  p. 308
Stochastic Optimization in Computing Multiple Headways for a Single Bus Line  p. 316
A Simulation Based Performance Analysis of a TCP Extension for Best-Effort Multimedia Applications  p. 327
Graph-Based Mobility Model for Mobile Ad Hoc Network Simulation  p. 337
A Simulation Study of the Predictive p-persistent CSMA Protocol  p. 345
Breaking the Memory Bottleneck with an Optical Data Path  p. 352
Modelica - A General Object-Oriented Language for Continuous and Discrete-Event System Modeling and Simulation  p. 365
A Comprehensive 3G Link Level Simulator  p. 381
Simulator for E-LOTOS Specifications  p. 389
Animating 3D Facial Models with MPEG-4 FaceDefTables  p. 395
SS 2003 Call for Papers  p. 401
Author Index  p. 403
