Conference Chairs' Message
Program Chairs' Message
Conference Organizers
Steering Committee
Program Committee
Reviewers
Requirements Engineering
A Study of the Impact of Requirements Volatility on Software Project Performance
Integrating Use-Case Analysis and Task Analysis for Interactive Systems
A Feasible User Story Tool for Agile Software Development?
Formal Methods (Refinement)
Results on Formal Stepwise Design in Z
Refining Exceptions Using King and Morgan's Exit Construct
Refining Object-Oriented Invariants and Dynamic Constraints
Components
Using Components to Increase Maintainability in a Large Telecommunication System
Evaluating the Scalability of Enterprise JavaBeans Technology
Performance of SOAP in Web Service Environment Compared to CORBA
Design
Towards a Taxonomy for Guiding Multimedia Application Development
Extracting Threads from Concurrent Objects for the Design of Embedded Systems
A Nested Invocation Suppression Mechanism for Active Replication Fault-Tolerant CORBA
Formal Specification Analysis
Formal Verification of [mu]-Charts
Animation of Data Refinements
Symbolic Simulation of Hybrid Systems
Programming Languages and Software Engineering
Embedding XML Processing Toolkit on General Purpose Programming Language
A Software Engineering Approach to Constraint Programming Systems
A Virtual File System for Source Program Editing
Keynote
A Quality Doctrine for Software: Do It Right the First Time
Education
iBistro: A Learning Environment for Knowledge Construction in Distributed Software Engineering Courses
An Account and Appraisal of the Ongoing Development of the Software Engineering Volume of CC2001 and Its International Applicability
Model Checking
Behavioural Analysis of Component Framework with Multi-Valued Transition System
Abstraction and Flow Analysis for Model Checking Open Asynchronous System
Human Computer Interaction
Automatic Filling in a Form by an Agent for Web Applications p. 239
A Recommendation System for Software Function Discovery p. 248
Keynote
Lessons Learned in Framework-Based Software Process Improvement p. 261
Software Design and Architecture
e-Science Experiences: Software Engineering Practice and the EU DataGrid p. 269
On Aspect-Oriented Software Architecture: It Implies a Process as Well as a Product p. 276
An Approach to Software Architecture Evaluation with the 4+1 View Model of Architecture p. 286
Formal Methods (Components)
Contextual Matching of Software Library Components p. 297
Computer-Aided Programming Using Formally Specified Design Templates p. 307
Finite-State Modeling in Software Design: Some Fundamental Techniques p. 317
Software Maintenance
On Detection of Gapped Code Clones Using Gap Locations p. 327
An Automated Refactoring Approach to Design Pattern-Based Program Transformations in Java Programs p. 337
Quality Driven Transformation Compositions for Object Oriented Migration p. 346
Software Process
Tool Interfacing Mechanisms for Programming-for-the-Large and Programming-for-the-Small p. 359
The Real World Software Process p. 366
A Meta Model Approach Using UML for Task Assignment Policy in Software Process p. 376
Formal Methods (Design)
Feature Logics and Refinement p. 385
Specifying and Reasoning about Generic Architecture in TCOZ p. 405
Server-Based Applications
XML Web Services Automation: A Software Engineering Approach p. 417
Defining Attribute Templates for Descriptions of Distributed Services p. 425
A Predictive Performance Model to Evaluate the Contention Cost in Application Servers p. 435
Panel
Software Engineering Professionalism: Is There a Global Dimension to This? p. 443
Review and Testing
Deriving Verification Conditions and Program Assertions to Support Software Inspection p. 447
An Interaction Testing Technique between Hardware and Software in Embedded System p. 457
Data Coverage Testing p. 465
UML
Proposal of a Supporting Method for Diagrams Generation with the Transformation Rules in UML p. 475
Design of Rules for Transforming UML Sequence Diagrams into Java Code p. 485
Integration of UML and B Specification Techniques: Systematic Transformation from OCL Expressions into B p. 495
Measurement
The Java Metric Report--An Extensible Tool for OO Software Analysis p. 507
A Measurement Based Comparative Evaluation of Effectiveness of Object-Oriented versus Conventional Procedural Programming Techniques and Languages p. 517
Issues in the Construction of New Measures within the Discipline of Open Systems p. 527
Keynote
Has Twenty-Five Years of Empirical Software Engineering Made a Difference? p. 539
Documentation
Theme-Based Literate Programming p. 549
Project Management
A Communication Workload Estimation Model Based on Relationships among Shared Works for Software Development Projects p. 571
Using Process Simulation to Compare Scheduling Strategies for Software Projects p. 581
Knowledge-Based Approaches
An Agent-Based Framework for Petroleum Information Services from Distributed Heterogeneous Data Resources p. 593
A Process-Centred Experience Respository for a Small Software Organisation p. 603
Author Index p. 611
