## Preface

Organizing Committees

Reviewers

### A Tool-Mediated Cognitive Apprenticeship Approach for a Computer Engineering Course

A Distributed Software System Architecture for Wireless Peer-to-Peer Collaborative Learning

A PDA-Based Interface for a Computer Supported Educational System

Speech Enabled e-Learning for Adult Literacy Tutoring

Web Based Learning Environment as a Passive Web Document

Adding Value to Educational Content by Applying MRA Filtering

Designing Multimedia Support for Situated Learning

Using VR Technology to Support the Formation of Cooperative Learning Groups

Initializing Student Models in Web-Based ITSs: A Generic Approach

Towards Supporting the Teaching of History Using an Intelligent Information System that Relies on the Electronic Road Metaphor

A Multilingual Concept Mapping Tool for a Diverse World

Author-Defined Storage in the Next Generation Learning Management Systems

Pedagogical Agents in the Multimedia Natural Sciences for Children

A Computational Cognitive-Based Approach to Represent Knowledge within Intelligent Tutoring Systems

Reusable Active Learning System for Improving the Knowledge Retention and Better Knowledge Management

Mobile Learning: A New Paradigm in Electronic Learning

Searching SCORM Metadata in a RDF-Based e-Learning P2P Network Using XQuery and Query by Example

Real-Time Collaborative Problem Solving: A Study on Alternative Coordination Mechanisms

InLinx for Document Classification, Sharing and Recommendation

A Fuzzy Logic Evaluating System to Support Web-Based Collaboration Using Collaborative and Metacognitive Data

Enriching Document Collections through the Writing of 'Stories'

Using Mobile Techniques in Improving Information Awareness to Promote Learning Performance

A Metadata Model for Capturing Presentations

Learner Modelling in a Multi-Agent System through Web Services

An Instructional Framework Supporting Personalized Learning on the Web

Towards an Assistive Tool for Greek Sign Language Communication

Using Digital Video as an Asynchronous Method of Instruction

Enriching Traditional Classroom Scenarios by Seamless Integration of Interactive Media

An e-Learning Service Management Architecture

Cohesion and Roles: Network Analysis of CSCL Communities

InfoLab: A Web Learning Pedagogical Based Content Repurposing Approach

Content Management Systems and e-Learning-Systems - A Symbiosis?
Total Quality Management for Electronic Educational Markets
p. 160
Speech-Adaptive Time-Scale Modification for Computer Assisted Language-Learning
p. 165
Design and Evaluation of a Cache Memory Simulation Program
p. 170
Educational Robotics in a Systems Design Masters Program
p. 175
Web-Based Peer Assessment in Learning Computer Programming
p. 180
Using Gestures to Learn about Graphs: The Contribution of Multimodal Technology
p. 185
A Reified Interface for a Tutor on Program Debugging
p. 190
Learning Objects on the Semantic Web
p. 195
Evaluating the Role of a Shared Document-Based Annotation Tool in Learner-Centered Collaborative Learning
p. 200
Making Virtual Work Teams Successful: Measuring the 'Interactive Demand' of Tasks and Fitting It to the Demands of Technology, People and Structure
p. 204
The European Quality Observatory (EQO): Structuring Quality Approaches for e-Learning
p. 209
Enhancing Educational Metadata Management Systems to Support Interoperable Learning Object Repositories
p. 214
Design Considerations for Supporting Collaborative Modeling
p. 219
Physically Inspired Interactive Music Machines - Making Contemporary Composition Accessible?

OSCAR: A Framework for Structuring Mediated Communication by Speech Acts
p. 224
An Approach to Distance Learning Curriculum Appropriation
p. 234
Mixing Human and Software Agents: A Case Study
p. 239
The Future of the Book, the Book of the Future
p. 246
FlexNetDiscuss: A Generalized Contextual Group Communications System to Support Learning Inside and Outside the Classroom
p. 248

An Educational Taxonomy for Learning Objects
p. 250
Courses Personalization in an e-Learning Environment
p. 252
Online Self-Assessment as a Learning Method
p. 254
Towards 'Phenomenaria' for the Teaching of Distributed Systems Concepts
p. 256
VIANET - A New Web Framework for Distance Learning
p. 258
LAN-Designer: A Software Tool for Teaching and Learning LAN Design
p. 260
Applying Computer Multimedia Storytelling Website in Foreign Language Learning
p. 262
Curricular Automata and Their Applications
p. 264
A Data Model for Structuring On-Line Learning Material
p. 266
Knowledge Testing and Evaluation in the Integrated Web-Based Authoring and Learning Environment
p. 268
Visualization and Teaching Simplex Algorithm
p. 270
A Multimedia Training System Applied to Telephony
p. 272
A Topology and Framework to Aid the Design of Automated Assessment
p. 274
Semi-Continuous Monitoring of Student Feedback in Interactive Synchronous e-Learning Environments
p. 276
Learner Experiences in Online Courses: Towards a Model for Learning to Learn Online
p. 278

Online Learning for On-Board Training Officers
p. 280
Exploratory + Collaborative Learning in Programming: A Framework for the Design of Learning Activities p. 350
Theoretical Analysis of Mission-Based Learning Model p. 352
A Controlled Experiment Investigation on the Impact of an Instructional Tool for Personalized Learning p. 354
New Approaches to Media-Supported Project Work at the University Level p. 356
Combining Synchronous and Asynchronous Distance Learning for Adult Education: The Greek Army Case p. 358
Distance Education: A Web Usage Mining Case Study for the Evaluation of Learning Sites p. 360
Quality Assessment for Collections of Learning Resources p. 362
User-Centred Design & Development of an Applied Web-Based ITS p. 364
Supporting Social Awareness: Requirements for Educational CVE p. 366
A Multiagent Architecture for Distance Education Systems p. 368
Scaffold Learners' Qualitative Browsing of Major Topics in Learning Forum p. 370
Designing Le@rning Objects with the ELO-Tool p. 372
Gradual Learning of Science in a CSCL Environment and the Quest of Epistemologically Sophisticated Learners p. 374
A Study on the Use of a Voice Interactive System for Teaching English to Italian Children p. 376
Adaptive Hypermedia Based on Metaphors as an Instructional Strategy p. 378
Students' Understanding of Computer Networks in an Internationally Distributed Course p. 380
Developing a Framework for Conceptual Change within Scientific Inquiry p. 382
Gaining Computational Literacy by Creating Hybrid Aesthetic Learning Spaces p. 384
Difficulty Analysis for Learners in Problem Solving Process Based on the Knowledge Map p. 386
Supporting Interoperability in an Existing e-Learning Platform Using SCORM p. 388
On Tools for Analysis of Collaborative Problem Solving p. 390
Intelligent DirEctors for Argumentative Learning (IDEAL): Supporting Collaborative Learning through Argumentations p. 392
Reading for Understanding: A Framework for Advanced Reading Support p. 394
On the Role of Brain-Imaging Technologies in the Calibration of Learning Strategies p. 396
Software Tutors for Scaffolding on Planet Oit p. 398
Conceptual Learning Assessment and Contect Management in e-Learning Platform by Means of Conceptual Maps p. 400
From Socrates to PIAGET: Patterns for Distance Learning p. 402
An Evaluating Strategy for Student's Assessment in e-Learning p. 404
Dialogue-Based Historical Text Comprehension p. 406
Re-Adapting an Adaptive Assessment. Is This Possible? p. 408
The Positive Model for Offshore Team Teaching p. 410
Using Virtual Worlds for Corporate Training p. 412
Ubiquitous e-Learning: Are We There Yet? p. 414
Psychological and Pedagogical Foundations for a Computer-Based Learning Environment with a Language-Deficient Domain p. 416
Developing e-Training Systems in a Customized Manufacturing Context p. 418
Approaches to Using Video Cases in Teacher Professional Development p. 420
Bridging the Cognitive Divide in ICT-Mediated Learning p. 422
Learning Resources Brokerage Systems: An Agent-Based Virtual Market Model p. 424
Preliminary Results from a Machine Learning Based Approach to the Assessment of Student Learning p. 426
Management Issues of Flexible, Multi-Level Distance Learning-Based Teacher Training p. 428
A Software Companion Capable of Dialogue p. 430
Structuring Collective Activities with Tasks and Plans p. 432
A Framework for Adapting Instruction to Cognitive Learning Styles p. 434
The Hypertext Semantic Synopsis as a Tool to Realize the Activities Approach in Learning p. 438
Developing a Schema for Learning Object Based on Object Oriented Model of Object Inheritance p. 439
Learner Agents as Student Modeling: Design and Analysis p. 440
Internet Virtual Classroom - An Implementation of the Instructional Model of the PBIALS Based on the PBL Theory p. 441
Cognitive Approach of Two Technology Based Learning Environments of Modelisation and Simulation Intend to a Scientific Education p. 442
Developing a Generic Agent-Based Intelligent Tutoring System p. 443
Hyperlearning: Empirical Validation of the 'Design for Multimedia in Learning' Model - Problems Arising and Suggested Solutions p. 444
Information Aptitude Scale Development for Vocational High School in Taiwan p. 445
Skills Superstore: On-Line Interactive Learning Skills System p. 446
Design Considerations for Porting the Physics Subject Light to the Web p. 447
Authoring Interactive Software Simulations for e-Learning p. 448
Integrating Real Time Communications Applications in a Museum's Web Site p. 449
The Contribution of Technology Facilitated Learning in the Development of Actuarial Competencies in Tourism Business Management Education: An Empirical Investigation p. 450

Table of Contents provided by Blackwell's Book Services and R.R. Bowker. Used with permission.
