Foreword
Preface
Program Overview
Committees
Reviewers
Keynote Address
The Ruthless Pursuit of Frameworks and Patterns for Web-Based Applications
Pervasive and Ubiquitous Systems
Mining Sequential Patterns Using Graph Search Techniques
A Middleware Service for Secure Group Communication in Mobile Ad Hoc Networks
Device State Recovery in Non-volatile Main Memory Systems
Panel
Software and System Testing (1)
BINTEST—Binary Search-Based Test Case Generation
Automated Metamorphic Testing
Smart Debugging Software Architectural Design in SDL
Software Reuse and Management
Lessons Learned from Software Engineering Multi-Agent Systems
Application of Tightly Coupled Engineering Team for Development of Test Automation
Software—A Real World Experience
A Cooperative Framework for Inter-Organizational Workflow System
Middleware Systems
Context Aware Deployment for Mobile Users
Policy-Based Separation of Concerns for Dynamic Code Mobility Management
Semantic-Based Approach to Streaming XML Contents Using Xstream
Trustworthy Software Systems
Automating Checking of Models Built Using a Graphically Based Formal Modelling Language
Techniques and Tools for Automated Safety Analysis and Decision Support for Redundancy Allocation in Automotive Systems
Design and Implementation of a Cache-Conscious Index Manager for the Tachyon, a Main Memory DBMS
Panel
Software Testing
Software Process Management
Towards Dynamic Process with Variable Structure by Reflection
Current Trends in the Adoption of the CMMI Product Suite
A CC-Based Security Engineering Process Evaluation Model
Mobile and High Performance Systems
An Object-Passing Model for Parallel Programming
Conceptual Modelling of Mobile Object Systems: Language Constructs for Distinguishing between Mobile and Stationary Subsystems

</tbody>
</table>
Information Quality Assessment of a Yellow-Pages Location-Based Service p. 320
VDM over PSP: A Pilot Course for VDM Beginners to Confirm Its Suitability for Their Development p. 327
Software Reengineering (2)
A Reengineering Process for Migrating from an Object-Oriented Legacy System to a Component-Based System p. 336
Determining Granularity of Independent Tasks for Reengineering a Legacy System into an OO System p. 342
Recovering a Business Object Model from Web Applications p. 348
Measurement and Metrics
Testing the Suitability of Markov Chains as Web Usage Models p. 356
Integrating Practical Software Measurement and the Balanced Scorecard p. 362
A Cut-Based Algorithm for Reliability Analysis of Terminal-Pair Network Using OBDD p. 368

Keynote Address 2
The Pursuit of Trust: Finding a Way Through the High Assurance Landscape

Distributed Systems
IBHIS: Integration Broker for Heterogeneous Information Sources p. 378
Protecting Distributed Software Upgrades that Involve Message-Passing Interface Changes p. 385
Implementation of Nonstop Software Update for Client-Server Applications p. 391
Component Based Software Engineering
A Test-Driven Component Development Framework Based on the CORBA Component Model p. 400
Information Use in CBSE Design p. 406
Variable Strength Interaction Testing of Components p. 413

Network Systems
An Integrated Approach to Scatternet Traffic Management in Bluetooth Ad Hoc Networks p. 420

Distributed Garbage Collection by Timeouts and Backward Inquiry p. 426
Facilitating Secure Ad hoc Service Discovery in Public Environments p. 433
Object-Oriented Development (1)
Precise Specification to Compound Patterns with ExLePUS p. 440
Scenario Architecture--A Methodology to Build a Global View of OO Software System p. 446

A Role-Based Metamodeling Approach to Specifying Design Patterns p. 452
Enterprise Systems
A Toolkit for Developing Web-Based Information Systems: Case Studies p. 460
Rapid Verification of Embedded Systems Using Patterns p. 466
Software Documentation-Driven Manufacturing p. 472
Object Oriented Development (2)
Meta Model Approach for Mediation p. 480
A Flexible Framework for Replication in Distributed Systems p. 486
A Graph Grammar Approach to Software Architecture Verification and Transformation p. 492
System Reliability
Sensitivity Analysis of Software Reliability for Component-Based Software Applications p. 500
Effects of Introducing Survival Behaviours into Automated Negotiators p. 506
An Architecture of Wireless Web and Dialogue System Convergence for Multimodal Service Interaction over Converged Networks p. 513
Integrating Runtime Assertions with Dynamic Types: Structuring a Derivation from an Incomputable Specification p. 520
Deductive Schedulability Verification Methodology of Real-Time Software Using Both Refinement Verification and Hybrid Automata p. 527
An Efficient Defect Estimation Method for Software Defect Curves p. 534

Compsac 2003 Workshops
Workshop on Architectures for Complex Application Integration (WACAI2003) p. 542
An Experience of Applying Architecture-Based Approach to Build a Component-Based Requirements Management Toolset p. 550
Enterprise Application Integration Using a Component-Based Architecture p. 557
Flexible Fault Tolerance in Configurable Middleware for Embedded Systems p. 563
Ad Hoc Software Interfacing Enterprise Application Integration (EAI) When Middleware Is Overkill p. 570
Next Generation Application Integration/Challenges and New Approaches p. 576
Web and Security Informatics Workshop
Intelligent Web Topics Search Using Early Detection and Data Analysis p. 584
Discovering Cyber Communities from the WWW p. 590
Internet-Based Decision Support: Toward E-Hospital p. 595
A Framework for Web-Based Research Support Systems p. 601
Intelligent Mobile Agents for Efficient and Inexpensive e-Shopping p. 607
Managing Security Policy in Large Distributed Web Services Environment p. 610
Information Flows in E-Government p. 616
A Methodology for Hiding Knowledge in XML Document Collections p. 628
Security for the Semantic Web p. 633
Situation-Aware Personalized Information Retrieval for Mobile Internet p. 639
Web Based Systems and Applications (WEBSA2003)
A Multiple-Tier Model Manipulation Architecture for Enterprise Decision Making p. 646
Regression Testing for Web Applications Based On Slicing p. 652
A Supervised Visual Wrapper Generator for Web-Data Extraction p. 657
A Dynamic Information Retrieval System for the Web p. 663
A Pattern Language Model for Framework Development p. 669
Some Domain Patterns in Web Application Framework p. 674
Web-Based Support for Managing Large Collections of Software Artefacts p. 678
MDA-Based Development of E-Learning System p. 684
PeAgen--A Mobile Agent System to Support Secure Internet and Web Applications p. 690
Toward an Easy Programming Environment for Implementing Mobile Applications: A Fleet Application Case Study Using SyD Middleware

A Hierarchical Strategy for Testing Web-Based Applications and Ensuring Their Reliability
