Program Committee

Additional Reviewers

Processes and Inspections
Decision Support for Using Software Inspections p. 3
Establishing a Generic and Multidimensional Measurement Repository in CMMI Context p. 12

Requirements Issues
A Metrics Based Approach for Identifying Requirements Risks p. 23
RGML: A Markup Language for Characterizing Requirements Generation Processes p. 29

Agents and Run-Time Issues
A Component-Based Model for Building Reliable Multi-agent Systems p. 41
Formal Approaches to Intelligent Swarms p. 51
On the Run-Time Verification of Autonomy Software p. 58
Instrumentation of Intermediate Code for Runtime Verification p. 66

Modeling, Model-Checking, and Simulation
On the Advantages of Approximate vs. Complete Verification: Bigger Models, Faster, Less Memory, Usually Accurate p. 75
Model-Based Software Testing via Incremental Treatment Learning p. 82
Generating MC/DC Adequate Test Sequences through Model Checking p. 91
Assessing IV&V; Benefits Using Simulation p. 97

Real-Time and Safety-Critical Systems
Design Tool Assessment for Safety-Critical Software Development p. 105
Adopting a Software Component Model in Real-Time Systems Development p. 114
Software Dynamics: A New Measure of Performance for Real-Time Software p. 120
Applying Run-Time Monitoring to the Deep-Impact Fault Protection Engine p. 127

Architecture, Impact Analysis, and Software Sensitivity
Diagnosing Architectural Degeneration p. 137
Software Impact Analysis in a Virtual Environment p. 143
Tailorable Architecture Methods p. 152
Sensitivity of Software Usage to Changes in the Operational Profile p. 157

Faults and Failures
Modelling and Analysing Fault Propagation in Safety-Related Systems p. 167
Optimal Software Release Time Incorporating Fault Correction p. 175
Applying Fault Correction Profiles p. 185
A Stress-Point Resolution System Based on Module Signatures p. 193

GUIs and Security
Addressing Software Security and Mitigations in the Life Cycle p. 201

Verification and Validation
Validation of Object Oriented Software Design with Fault Tree Analysis p. 209
Software Verification and Validation within the (Rational) Unified Process p. 216
Maintaining Verification Test Consistency between Executable Specifications and Embedded Software in a Virtual System Integration Laboratory Environment p. 221
