Message from the General Co-Chairs p. xi
Message from the Program Co-Chairs p. xii
Organizing Committee p. xiii
Program Committee p. xiv
Reviewers p. xviii
Keynote
Distributed Computing for Graphic-Then and Now
Distributed Algorithms p. 1
Uncheatable Grid Computing p. 4
Scalable Self-Stabilization via Composition p. 12
Dining Philosophers with Crash Locality 1 p. 22
Wireless QoS
An Analysis for Differentiated Services in IEEE 802.11 and IEEE 802.11e Wireless LANs p. 32
A New QoS Point Coordination Function for Multimedia Wireless LANs p. 40
Providing Statistical Delay Guarantees in Wireless Networks p. 48
Middleware 1
A Server Side Caching Scheme for CORBA p. 58
Enhancing Real-Time CORBA via Real-Time Java Features p. 66
ACT: An Adaptive CORBA Template to Support Unanticipated Adaptation p. 74
Distributed Algorithms 2
Adaptive Plausible Clocks p. 86
Nash Equilibria in Parallel Downloading with Multiple Clients p. 94
Epidemic-Style Proactive Aggregation in Large Overlay Networks p. 102
Overlay Networks
Scalability in Adaptive Multi-Metric Overlays p. 112
A Distributed Approach to Topology-Aware Overlay Path Monitoring p. 122
A Distributed Approach to Solving Overlay Mismatching Problem p. 132
Middleware 2
Session-Affinity Aware Request Allocation for Web Clusters p. 142
An Approach to Programmable RDF-Model Transformations p. 150
SOAP-binQ: High-Performance SOAP with Continuous Quality Management p. 158
Internet and Caches
ULC: A File Block Placement and Replacement Protocol to Effectively Exploit Hierarchical Locality in Multi-Level Buffer Caches p. 168
PIC: Practical Internet Coordinates for Distance Estimation p. 178
Efficient Web Services Response Caching by Selecting Optimal Data Representation p. 188
P2P Data Management
Data Indexing in Peer-to-Peer DHT Networks p. 200
Evaluating GUESS and Non-Forwarding Peer-to-Peer Search p. 209
Distributed Caching and Adaptive Search in Multilayer P2P Networks p. 219
Middleware 3
Selection of Mobile Agents

DisCo: Middleware for Securely Deploying Decomposable Services in Partly Trusted Environments

P2P Incentive Mechanisms

SLIC: A Selfish Link-Based Incentive Mechanism for Unstructured Peer-to-Peer Networks

An Incentive Mechanism for P2P Networks

Exchange-Based Incentive Mechanisms for Peer-to-Peer File Sharing

iPass: An Incentive Compatible Auction Scheme to Enable Packet Forwarding Service in MANET

Distributed Data Management 2

A Distributed Implementation of Sequential Consistency with Multi-Object Operations

Epidemic Algorithms for Reliable Content-Based Publish-Subscribe: An Evaluation

Subscription Summarization: A New Paradigm for Efficient Publish/Subscribe Systems

Sensor Networks

A Clock Synchronization Algorithm for Multi-Hop Wireless Ad Hoc Networks

Enviro Track: Towards an Environmental Computing Paradigm for Distributed Sensor Networks

Energy Efficient Data Collection in Distributed Sensor Environments

Security 3

On the Confidential Auditing of Distributed Computing Systems

Leak-Free Group Signatures with Immediate Revocation

Certificate Dispersal in Ad-Hoc Networks

Keynote

Quality of Service in Metro Networks: Admission Controls and the Importance of SONET

Protocols

sFlow: Towards Resource-Efficient and Agile Service Federation in Service Overlay Networks

[Delta]-Reliable Broadcast: A Probabilistic Measure of Broadcast Reliability

Notification-Based QoS Control Protocol for Multimedia Group Communication in High-Speed Networks

Overlay Multicast

Overlay Multicast Trees of Minimal Delay

An Autonomous and Decentralized Protocol for Delay Sensitive Overlay Multicast Tree

Fault-Tolerant Data Delivery for Multicast Overlay Networks

Ubiquitous Computing

Group Digital Assistant: Combined or Shared PDA Screen

Spatial Programming Using Smart Messages: Design and Implementation

Azim: Direction Based Service Using Azimuth Based Position Estimation

Internet

Distributed Network Monitoring for Evolving IP Networks
