Chairs' Message
Organizing Committee
Program Committee
Reviewers
Keynote Address
Extending the Innovation Ecosystem
Business Services Networks
Managing the Intelligent Enterprise
Full Paper Sessions
E-Commerce Intelligence
Building and Evaluating Non-obvious User Profiles for Visitors of Web Sites
Shingle-Based Query Indexing for Location-Based Mobile E-Commerce
Dynamic Pricing
Assisting Seller Pricing Strategy Selection for Electronic Auctions
A Markov-Decision-Based Price Comparison Problem for Mobile Agent-based Internet Commerce System (MAGICS)
Case Study on Retail Customer Communication Applying Ubiquitous Computing
B2B Commerce
Streamlining the Replenishment Process through Extended Information Sharing and Collaboration: Defining the Underlying E-Commerce Infrastructure
COSIMA\textsuperscript{B2B}--Sales Automation for E-Procurement
An Active Adapter with Edge Cache Approach for Order Status Information Integration
E-Catalogs
Implementation of Large Catalogs for Price Enforcement in B2B E-Commerce
A Semantic Classification Model for e-Catalogs
Unified Commerce Server Architecture for Large Number of Enterprise Stores
B2C Decision Support
A Protocol for "Combination-Web-Shopping"
A Buyers Integration Support System in Group Buying
The Architecture of the Symbol Engine in a Programmable Autonomous Business
Web Service Composition
Service Selection Algorithms for Web Services with End-to-End QoS Constraints
IPSI-PF: A Business Process Matchmaking Engine
Ontology-Driven Web Services Composition Platform
Business Process Management
Quality of Service Process Variables in Complex B2B Systems Integration Assessment
Process Information Factory: A Data Management Approach for Enhancing Business Process Intelligence
Designing Data Warehouses for Supply Chain Management
Service-Oriented Enterprise Applications
A Service Management Framework for Service-Oriented Enterprises
A Business Model for B2B Integration through Web Services p. 187
A Capacity Sizing Tool for a Business Process Integration Middleware p. 195
Agents and Economic Incentives
CONFESS--An Incentive Compatible Reputation Mechanism for the Online Hotel Booking Industry p. 205
Coupon Based Incentive Systems and the Implications of Equilibrium Theory p. 213
Analysis of a Free Roaming Agent Result-Truncation Defense Scheme p. 221
E-Payment
Formal Specification and Verification of the SET/A Protocol with an Integrated Approach p. 229
On Designing a Flexible E-Payment System with Fraud Detection Capability p. 236
LITESET/A++: A New Agent-Assisted Secure Payment Protocol p. 244
Privacy and Trust
Algorithms for Automated Negotiations and Their Applications in Information Privacy p. 255
SIMT--A Privacy Preserving Web Metrics Tool p. 263
Security and Privacy
A Simplified Approach to User Controllable Threshold Signatures p. 273
Evaluation of User Intervention Mechanisms for Privacy on SME Online Trust p. 281
Short Presentations
Security and Trust
Digital Watermarking Capacity and Reliability p. 295
Can eCRM and Trust Improve eC Customer Base? p. 303
Decision Support and Planning
Diagnosing Key Needs for Emergent B2B in SMB's p. 313
Reestimation of E-Business Planning Model in Real Business World p. 317
Neural Network-Based Reputation Model in a Distributed System p. 321
Dealer Collaboration: Transforming the Value Chain through Integration and Relationships p. 325
Mobility and Interoperability
Deconstruction and Reconstruction of Heterogeneous Electronic Product Catalogues for Semantic Interoperation p. 333
Mobile Jabber IM: A Wireless-Based Text Chatting System p. 337
A Java-Based Information Browsing System in a Remote Display Environment p. 342
E-Commerce Applications
Towards a Theoretical Framework of Determinants for the Adoption and Diffusion of Buyer Authenticated Credit Card Payment Programs: The Online Merchant's Perspective p. 349
The e-Salesman System p. 353
E-Marketplace Using Artificial Immune System as Matchmaker p. 358
