The Web - early visions, present reality, the grander future  p. 3
Applications of intelligent agent technology to the grid  p. 4
Scaling up multi-agent systems through organizational structuring  p. 5
Intelligent workstation agents and unstructured workstation data  p. 6
Data mining : artificial intelligence in data analysis  p. 7
Incentive-compatible social choice  p. 8
Integration of business intelligence based on three-level ontology services  p. 17
Defending against flash crowds and malicious traffic attacks with an auction-based method  p. 24
An empirical study of Web interface design on small display devices  p. 29
An approach for step-by-step query refinement in ontology-based information retrieval  p. 36
Logic programming for context-aware pervasive computing : language support, characterizing situations, and integration with the Web  p. 44
Personal documents recommendation system based on data mining techniques  p. 51
Fuzzy neural agents for online NBA scouting  p. 58
Extracting precise link context using NLP parsing technique  p. 64
Rough set-aided feature selection for automatic Web-page classification  p. 70
Ontology-based scalable and portable information extraction system to extract biological knowledge from huge collection of biomedical Web documents  p. 77
Matching and retrieving sequential patterns under regression  p. 84
NavOptim coding : supporting Website navigation optimisation using effort minimisation  p. 91
One dynamic pricing strategy in agent economy using neural network based on online learning  p. 98
Clustering high-dimensional data with low-order neighbors  p. 103
Mining the Web to create a language model for mapping between English names and phrases and Japanese  p. 110
TSSP : a reinforcement algorithm to find related papers  p. 117
Web-based knowledge acquisition to impute missing values for classification  p. 124
An ontology-based approach to retrieve digitized art images  p. 131
Enabling context-aware agents to understand semantic resources on the WWW and the semantic Web  p. 138
Compound critiques for conversational recommender systems  p. 145
Efficient selection and monitoring of QoS-aware Web services with the WS-QoS framework  p. 152
A Web-based intelligent tutoring system for computer programming@  p. 159
Semantic feature selection using WordNet  p. 166
A Web-based political exchange for election outcome predictions  p. 173
Bayesian network structure learning and its application to personalized recommendation in a B2C portal  p. 179
Probabilistic model estimation for collaborative filtering based on items attributes  p. 185
Multi-dimensional evaluation of information retrieval results  p. 192
An online recommender system for large Web sites  p. 199
Combining topic models and social networks for chat data mining  p. 206
Eliciting truthful feedback for binary reputation mechanisms  p. 214
Using semantic graphs in clustering process : enhance information level  p. 221
A scalable topic-based open source search engine  p. 228
A fast tree pattern matching algorithm for XML query  p. 235
Automatic pattern-taxonomy extraction for Web mining  p. 242
TUCUXI : the intelligent Hunter agent for concept understanding and LeXical ChaIng  p. 249
Capturing evolving patterns for ontology-based Web mining  p. 256
Discovering negotiation knowledge for a probabilistic negotiation Web service in e-business  p. 264
Empowering resource providers to build the semantic grid  p. 271
An immune network approach for Web document clustering  p. 278
Social networks and the semantic Web  p. 285
An access control model for Web services in business process  p. 292
GE-CKO : a method to optimize composite kernels for Web page classification  p. 299
Type-based composition of information services in large scale environments  p. 306
Fusing reasoning services with formal concept analysis  p. 313
Towards a people's Web : metalog  p. 320
Tree-structured template generation for Web pages  p. 327
Quantitative agent service matching  p. 334
Trust-based community formation in peer-to-peer file sharing networks  p. 341
Building Web information extraction tasks  p. 349
An efficient mining and clustering algorithm for interactive walk-through traversal patterns  p. 356
Pseudo-supervised clustering for text documents  p. 363
Improvement of precision and recall for information retrieval in a narrow domain : reuse of concepts by formal concept analysis  p. 370
MAMI : mobile agent based system for mobile Internet  p. 377
Mining online deal forums for hot deals  p. 384
Efficient wrapper reinduction from dynamic Web sources  p. 391
Management of Web data models based on graph transformation  p. 398
Anycast-based cooperative proxy caching : preliminary results  p. 405
Dynamic resource selection for service composition in the grid  p. 412
Knowledge on the Web : making Web services knowledge-aware  p. 419
Help a teacher in the conception of a course by using semantic information  p. 429
The prototype research of a Web-based DSS intelligent agent over data warehouse  p. 433
XML-based meta-retrieval of networked data sources  p. 437
Temporal cluster migration matrices for Web usage mining  p. 441
Building a misinformation ontology  p. 445
Description mathematical approach to validation for grid service matching function  p. 449
Text adaptation for mobile digital teletext  p. 453
An improved GreedyDual cache document replacement algorithm p. 457
Image watermarking capacity analysis using neural network p. 461
Using DAML+OIL to enhance search semantic p. 465
A fuzzy classification based on feature selection for Web pages p. 469
Web-based context aware information retrieval in contact centers p. 473
A logic-based approach for query refinement p. 477
Content-based TV sports video retrieval based on audio-visual features and text information p. 481
Abbreviation expansion in schema matching and Web integration p. 485
Knowledge representation and inductive learning with XML p. 491
A search architecture for grid software components p. 495
Type-2 fuzzy Web shopping agents p. 499
Popularity-based selective Markov model p. 504
Ontology-based structured cosine similarity in speech document summarization p. 508
Design of an emotional search in an existing product platform www.stylepark.com p. 514
A metric framework for quantifying semantic reliability in shared ontology environments p. 519
A logical framework of knowledge retrieval with fuzziness p. 524
Photo time-stamp recognition based on particle swarm optimization p. 529
A novel middleware based Web database model p. 533
Web service cooperation ideology p. 537
Rough set theory: application in electronic commerce data mining p. 541
NewsRec, a SVM-driven personal recommendation system for news Websites p. 545
Using two ontologies to index e-learning resources p. 549
Simulating the behaviour of electronic marketplaces with an agent-based approach p. 553
A theoretical framework and an implementation architecture for self adaptive Web sites p. 558
Querying and updating a context-aware service directory in mobile environments p. 562
Bucket-based query rewriting with disjunctive data sources p. 566
An efficient decentralized grid service discovery approach based on service ontology p. 570
Task allocating among a group of agents p. 574
The evolution of link-attributes for pages and its implications on Web crawling p. 578
An intelligent query expansion for searching related text information by keywords p. 582
Co-training with a single natural feature set applied to email classification p. 586
PEWeb: product extraction from the Web based on entropy estimation p. 590
Query mining for community based Web search p. 594
An empirical study of feature selection for text categorization based on term weightage p. 599
Modeling and implementation of unified semantic Web platform p. 603
OBSA: ontology-based semantic information processing architecture p. 607
Grid-based data mining in a real-life business scenario p. 611
Event recognition on news stories and semi-automatic population of an ontology p. 615
Grid service agents for real time traffic synchronization p. 619
OntoXpl : intelligent exploration of OWL ontologies p. 624
The abstract syntax of RuleML - towards a general Web rule language framework p. 628
Finding related pages using the link structure of the WWW p. 632
Web site structure and content recommendations p. 636
Applying collaborative filtering for an efficient document search p. 640
Using the intelligent agent on the telecom electronic commerce Website p. 644
Improving efficiency and relevance ranking in information retrieval p. 648
Examining table variations on small screen devices p. 652
Design of an open and secure ubiquitous computing system p. 656
Normalization design of XML database schema for eliminating redundant schemas and satisfying lossless join p. 660
Exploring independent trends in a topic-based search engine p. 664
Detecting and partitioning data objects in complex Web pages p. 669
Discovery of user communities from Web audience measurement data p. 673
A weighted freshness metric for maintaining search engine local repository p. 677
The role of technology in interest-based communities : interactivity, immersion and connectivity p. 681
Building domain ontology based on Web data and generic ontology p. 686
Local vs global policies and centralized vs decentralized control in virtual communities of agents p. 690
Using knowledge awareness support learning services providing in e-learning environment p. 694
Concept learning of text documents p. 698
Offer group generation and delayed processing in multi-issue negotiation p. 702
A multi-agent system's approach to communication security in the Web p. 706
Meeting scheduling system guaranteeing n/2-privacy and resistant to statistical analysis (applicable to any DisCSP) p. 711
Full-coverage Web prediction based on Web usage mining and site topology p. 716
Context generalization for information extraction from the Web p. 720
Effective interaction principles for online product search environments p. 724
Distributed architecture for adaptive intelligent environments p. 728
Focused crawling by learning HMM from user's topic-specific browsing p. 732
Understanding the Web through its language p. 736
Supporting Web collaboration for cooperative software development p. 740
Intelligent streaming video data over the Web p. 744
Mining local data sources for learning global cluster models p. 748
Using a class algebra ontology to define conversions between OWL/SQL/Java beans p. 752
MumbleSearch - extraction of high quality Web information for SME p. 757
Clustering Web surfers with probabilistic models in a real application p. 761
Towards building semantic rich model for Web documents using domain ontology p. 769
