Message from the General Programme Chair p. xi
Message from the Chairs: Component Based Software Engineering Track p. xii
Message from the Chairs: Multimedia and Telecommunications Track p. xiv
Message from the Chairs: Software Process and Product Improvement Track p. xvi

Keynote
Mobile Adventure--Towards 4Generation Mobile Systems p. 2

Component Based Software Engineering

Session: Components for Real-Time and Embedded Systems
Component-Based Real-Time Design: Mapping HRT-HOOD to UML p. 6
Integrating Real-Time Analysis in a Component Model for Embedded Systems p. 14
Analysis and Prediction of Performance for Evolving Architectures p. 22
A Systematic Approach for Identifying Operational Relationships in Embedded Computer Control Systems p. 32
Predicting Real-Time Properties of Component Assemblies: A Scenario-Simulation Approach p. 40
Logical-Time Contracts for Reactive Embedded Components p. 48
Evaluation of Component Technologies with Respect to Industrial Requirements p. 56

Session: Component Compositions
Whole-Part Based Composition Approach: A Case Study p. 66
Compositional Structured Component Model: Handling Selective Functional Composition p. 74

Session: Components and Quality Attributes
Runtime Management of Quality Specification for QoS-Aware Components p. 84
Towards a Semantic Framework for Non-Functional Specifications of Component-Based Systems p. 92
Runtime Verification of Timing and Probabilistic Properties Using WMI and .NET p. 100

Session: COTS Components
A Business Perspective on Component Trading: Criteria, Immaturities, and Critical Success Factors p. 108
DesCOTS: A Software System for Selecting COTS Components p. 118
Querying Reflexive Component-Based Architectures p. 127

Session: Development Environment and Tools
Impact of Statechart Implementation Techniques on the Effectiveness of Fault Detection Mechanisms p. 136
Middleware Support for the Deployment of Resource-Aware Parallel Java Components on Heterogeneous Distributed Platforms p. 144
A Survey on Software Components Search and Retrieval p. 152

Session: CBSE Processes and Modeling
A Service Model for Component-Based Development p. 162
Model-Driven Development of Recursive CORBA Component Assemblies p. 170
Model-Based Generation of Business Component Architectures p. 176

Multimedia and Telecommunications

Session: Quality of Service
Provisioning Expedited Forwarding DiffServ Channels Using Multimedia Aggregates p. 188
Implications of Traffic Characteristics on Quality of Service in Broadband Multi Service Networks p. 196
Session: Content Distribution
An Experimental Framework for Testing Web Prefetching Techniques p. 214
Melisa--A Distributed Multimedia System for Multi-Platform Interactive Sports Content Broadcasting p. 222
Session: Streaming
Priority-Driven Scheduling and Bandwidth Allocation for MPEG-2 Decoding p. 232
P2P Streaming Using Multiple Description Coded Video p. 240
Reconfiguration-Based QoS Management in Multimedia Streaming Applications p. 248
Session: IP Telephony
A Web Services Based Framework for Voice over IP p. 258
Implementing SIP and H.323 Signalling as Web Services p. 265
Enhanced SIP Communication Services by Context Sharing p. 272
Session: Service Oriented Architecture
Multi-Homing Tunnel Broker p. 282
A Framework for Protecting Web Services with IPsec p. 290
DANCE: Dynamic Application Oriented Network Services p. 298
Software Process and Product Improvement
Session: Agile Methods
Improving Software Process in Agile Software Development Projects: Results from Two XP Case Studies p. 310
Evaluating the XP Customer Model and Design by Contract p. 318
Analysis of an Agile Methodology Implementation p. 326
Introducing Agile Methods: Three Years of Experience p. 334
Improving Requirements Management in Extreme Programming with Tool Support--An Improvement Attempt that Failed p. 342
Session: Measurement and Empirical Software Engineering
Using Academic Courses for Empirical Validation of Software Development Processes p. 354
Investigating the Effect of Expert Ranking of Use Cases for Design Inspection p. 362
Investigations in Applying Metrics to Multi-View Architecture Models p. 372
Session: Web Engineering
Handling Backtracking in Web Applications p. 388
Context-Based Personalization of Web Services Composition and Provisioning p. 396
Web Services for Enterprise Collaboration: A Framework and a Prototype p. 404
GridSphere: An Advanced Portal Framework p. 412
Session: SPPI Single Papers
Distribution Patterns of Effort Estimations p. 422
On the Expected Synergies between Component-Based Software Engineering and Best Practices in Product Integration p. 430
Towards an Event-Driven Workplace for Knowledge Integration p. 437
