Adding confidentiality to application-level multicast by leveraging the multicast overlay p. 5

A Byzantine fault-tolerant mutual exclusion algorithm and its application to Byzantine fault-tolerant storage systems p. 12

Zmail: zero-sum free market control of spam p. 20

State checksum and its role in system stabilization p. 29

An optimal snap-stabilizing multi-wave algorithm p. 35

Reconciling the theory and practice of (un)reliable wireless broadcast p. 42

Dynamic load balancing using network transferable computer p. 51

Implementation issues of parallel downloading methods for a proxy system p. 58

Voting multi-dimensional data with deviations for Web services under group testing p. 65

A new TCP congestion control method considering adaptability over satellite Internet p. 75

Improving multipath reliability in topology-aware overlay networks p. 82

Bandwidth clustering for reliable and prioritized network routing using split agent-based method p. 89

InFilter: predictive ingress filtering to detect spoofed IP traffic p. 99

Active timing-based correlation of perturbed traffic flows with chaff packets p. 107

Specifying information-flow controls p. 114

MAFIC: adaptive packet dropping for cutting malicious flows to push back DDoS attacks p. 123

Performing BGP experiments on a semi-realistic Internet testbed environment p. 130

A replication- and checkpoint-based approach for anomaly-based intrusion detection and recovery p. 137

Configurable middleware-level intrusion detection for embedded systems p. 144

Forensix: a robust, high-performance reconstruction system p. 155

A simple framework for distributed forensics p. 163

Capacity estimation of non-synchronous covert channels p. 170

Increasing attack resiliency of wireless ad hoc and sensor networks p. 179

Defending against Sybil attacks in sensor networks p. 185

Adaptive real-time anomaly detection with improved index and ability to forget p. 195

Trust framework for P2P networks using peer-profile based anomaly technique p. 203

A topologically-aware worm propagation model for wireless sensor networks p. 210

Analysis of security protocols with certificate over open networks: electronic payment system p. 217

Real-time protection against DDoS attacks using active gateways p. 224

A fast mobile node configuration using address caching in hybrid wireless networks p. 237

Indoor and outdoor location based services for portable wireless devices p. 244

A sensor-based tracking system using witnesses p. 251

An intermediary software infrastructure for edge services p. 259

A distributed architecture for management and retrieval of extended points of interest p. 266

Service description for pervasive service discovery p. 273
Integrating Web services and mobile agent systems p. 283
Generating mobile agent securely by using MASL p. 291
Mobile proxies for proactive buffering in wireless Internet multimedia streaming p. 297
Probability based power aware error resilient coding p. 307
Using a fairness monitoring service to improve load-balancing in DSR p. 314
The last hop of global notification delivery to mobile users: accommodating volume limits and device constraints p. 321
Performance comparison of distributed architectures for content adaptation and delivery of Web resources p. 331
A user-driven adaptation strategy for mobile video streaming applications p. 338
Framework and rule-based language for facilitating context-aware computing using information appliances p. 345
An adaptive middleware to support context-aware knowledge sharing p. 352
Analysis and algorithms for content-based event matching p. 363
MEDYM: match-early and dynamic multicast for content-based publish-subscribe service networks p. 370
On introducing location awareness in publish-subscribe middleware p. 377
Policy-controlled event management for distributed intrusion detection p. 385
Integrating databases with publish/subscribe p. 392
Integrating distributed object transactions with wide-area content-based publish/subscribe systems p. 398
CHR: a distributed hash table for wireless ad hoc networks p. 407
Publish-subscribe tree maintenance over a DHT p. 414
Publisher mobility in distributed publish/subscribe systems p. 421
A stateful and open publish-subscribe structure for online marketplaces p. 431
Low latency optimisation of content based publish subscribe for real-time mobile gaming applications p. 438
A distributed alerting service for open digital library software p. 444
On the benefits of non-canonical filtering in publish/subscribe systems p. 451
Using fine-grained infrared positioning to support the surface-based activities of mobile users p. 463
A self-configurable topology-aware network for smart materials p. 469
An information retrieval system for supporting casual conversation in wearable computing environments p. 477
IASO - an activity-based computing platform for wearable computing p. 484
Thera-network: a wearable computing network to motivate exercise in patients undergoing physical therapy p. 491
DistScroll - a new one-handed interaction device p. 499
Visual code widgets for marker-based interaction p. 506
DiamondHelp: a collaborative interface framework for networked home appliances p. 514
The BluePost - a smart car heating system p. 523
Implementation and evaluation of the personal wellness coach p. 529
Adding context information to digital photos p. 536
Mobility in ad hoc wireless networks: a villain or a friend? p. 547
Angular routing protocol for mobile ad hoc networks  p. 551
Hybrid uplink scheduling in an integrated 3G/WLAN network with relaying p. 558
Self-stabilizing optimal local routing in ad hoc networks p. 564
Consistency of cooperative caching in mobile peer-to-peer systems over MANET p. 573
A formal framework for agent itinerary specification, security reasoning and logic analysis p. 580
Communication partner identification in distributed job workflow execution over the grid p. 587
A framework for reconfiguring mobile applications p. 594
Stable, time-bound object references in context of dynamically changing environments p. 603
A key establishment protocol for Bluetooth scatternets p. 610
A middleware architecture for mobile 3D graphics p. 617
A fair QoS multicast routing scheme for IP/DWDM optical Internet p. 624
Wireless LAN positioning with mobile devices in a library environment p. 633
Increasing mobile transaction concurrency in dynamically configurable environments p. 637
Cluster-based intelligent searching in unstructured peer-to-peer networks p. 642
Anonymizing geographic ad hoc routing for preserving location privacy p. 646
Context adaptation of the communication stack p. 652
Available bandwidth detection with improved transport control algorithm for heterogeneous networks p. 656
A path-history-sensitive access control model for mobile agent environment p. 660
Secure enhancement scheme for routing protocol in mobile ad hoc networks p. 664
A discrimination system for identification of cultivated products by trace elements analysis - using broccoli as an example p. 673
An intelligent semantic agent for supervising chat rooms in e-learning system p. 680
Implementation of WWW conference system for supporting remote mental health care education p. 686
Measurement-based peer-to-peer grouping for networked virtual environment p. 693
A hybrid scheduling algorithm with low complexity : jumping virtual clock round robin p. 698
Cross-media translation between human motions and texts based on mental image directed semantic theory p. 707
Parallel bindings in distributed multimedia systems p. 714
High immersive system aiming at the collaboration working over the Japan gigabit network II (JGNII) p. 721
A novel cache scheme for cluster-based streaming proxy server p. 727
Striping communication protocol for reliable multimedia communication in a hierarchical group p. 734
A new MAC protocol for robot communication and its performance evaluation p. 743
Optimized geographical routing protocol for inter-vehicle communications p. 749
Concurrency control using role ordering (RO) scheduler for distributed objects p. 756
A two-level ECN marking for fair bandwidth allocation between HSTCP and TCP Reno p. 763
Control theory optimization of MECN in satellite networks p. 770
