A reputation-based mechanism for isolating selfish nodes in ad hoc networks p. 3
Secure reporting of traffic forwarding activity in mobile ad hoc networks p. 12
Defend against cache consistency attacks in wireless ad hoc networks p. 22
An ECA-P policy-based framework for managing ubiquitous computing environments p. 33
Content-based routing in mobile ad hoc networks p. 45
Multi-constraint dynamic access selection in always best connected networks p. 56
Extended ZRP: a routing layer based service discovery protocol for mobile ad hoc networks p. 65
Market models and pricing mechanisms in a multihop wireless hotspot network p. 73
SWAT: small world-based attacker traceback in ad-hoc networks p. 85
Correlation analysis for alleviating effects of inserted data in wireless sensor networks p. 97
Efficient aggregation of encrypted data in wireless sensor networks p. 109
Practical broadcast authentication in sensor networks p. 118
PPP migration: a technique for low-latency handoff in CDMA2000 networks p. 133
A relay based MAC protocol to support multi-rate feature in ad-hoc networks p. 145
MPA assisted optimized proactive handoff scheme p. 155
An enhanced dynamic framed slotted ALOHA algorithm for RFID tag identification p. 166
Loosely coupling ontological reasoning with an efficient middleware for context-awareness p. 175
Contextualizing applications via semantic middleware p. 183
Plethora: a framework for converting generic applications to run in a ubiquitous environment p. 192
Exploiting co-location history for efficient service selection in ubiquitous computing systems p. 202
A generalization of the face routing algorithm to a class non-planar networks p. 213
Routing in MANETs with address conflicts p. 225
Transparent heterogeneous mobile ad hoc networks p. 237
SRDP: securing route discovery in DSR p. 247
On incremental processing of continual range queries for location-aware services and applications p. 261
Decentralizing query processing in sensor networks p. 270
Energy efficient processing of K nearest neighbor queries in location-aware sensor networks p. 281
A location aware mobile tourist guide selecting and interpreting sights and services by context matching p. 293
Decentralized optimization of dynamic bluetooth scatternets p. 305
Improving connectivity of wireless ad hoc networks p. 314
Efficient continuous mapping in sensor networks using isolines p. 325
A peer-to-peer architecture for context lookup p. 333
Community-based asynchronous wakeup protocol for wireless peer-to-peer file sharing networks p. 342
Multivariate analysis for probabilistic WLAN location determination systems p. 353
Proxy-based hand-off of Web sessions for user mobility p. 363
WebProfiles : a negotiation model for user awareness in personal area networks p. 373
A SIP-based architecture model for contextual coalition access control for ubiquitous computing p. 384
A cooperative learning framework for mobility-aware resource management in multi-inhabitant smart homes p. 393
Multi-path admission control for mobile ad hoc networks p. 407
Personal AP protocol for mobility management in IEEE 802.11 systems p. 418
On upper bound and heuristics for multicast lifetime maximization using dynamic routing in energy-limited wireless ad hoc networks p. 426
A feedback control scheme for resource allocation in wireless multi-hop ad hoc networks p. 432
StateSnap : a snapshot-based interface for state-reproducible operation of networked appliances p. 443
Bluetooth base station minimal deployment for high definition positioning p. 454
An assessment of the audio codec performance in voice over WLAN (VoWLAN) systems p. 461
Dynamically re-configurable communication protocols using key identifiers p. 471
An analysis of strategies for mitigating the sensor network hot spot problem p. 474
Wireless sensor networks for health monitoring p. 479
Agent negotiation in ad-hoc networks p. 482
Building a ubiquitous platform for remote sensing using smartphones p. 485
Orion : P2P-based inter-space context discovery platform p. 490
MAIPAN - middleware for application interconnection in personal area networks p. 494
KTR : an efficient key management scheme for air access control p. 499
Temporal transcoding for mobile video communication p. 502
Embedded SW design issues for distributed applications on mobile terminals p. 507
An efficient peer-to-peer lookup protocol for location-aware mobile ad hoc networks p. 510
Design and implementation of a software infrastructure for integrating sentient artefact p. 513
Geographically bound mobile agent in MANET p. 516
Secure address auto-configuration for mobile ad hoc networks p. 519
