Opportunities from open source search p. 2
Knowledge representation and unmanned aerial vehicles p. 9
Agreement technologies p. 17
An adaptive architecture for physical agents p. 18
Providing expert advice by analogy for on-line help p. 26
Evolution in simple systems and the emergence of complexity p. 33
Automated metadata and instance extraction from news Web sites p. 38
A method of distributed problem solving on the Web p. 42
Resource optimization in heterogeneous Web environments p. 46
A virtual-service-domain based bidding algorithm for resource discovery in computational grid p. 50
INFO : an improving strategy for searching the small world networks p. 54
Towards a semantics-based framework for KD- and IR-style resource querying on XML-based P2P information systems p. 58
Multi-source knowledge bases and ontologies with multiple individual and social viewpoints p. 62
A knowledge fusion model for Web information p. 67
Community-driven ontology management : DERI case study p. 73
Detecting sequences and cycles of Web pages p. 80
Social computing and weighting to identify member roles in online communities p. 87
Mining Web data for competency management p. 94
Limitations of community Web portals : a classmates' case study p. 101
Usability of real-time unconstrained WWW-co-browsing for educational settings p. 105
Big blackboard : on a large Web page by using a fast page loading method p. 112
Fuzzy-neural theory applied to web-based proactive service p. 116
A fuzzy Web surfer model p. 120
Studying dependencies among Web traffic and link analysis data using perceptron p. 124
Transitive reduction for social network analysis and visualization p. 128
A service-oriented personalization mechanism in pervasive environments p. 132
A middleware system for web-based digital music libraries p. 136
Semantic based collaborative P2P in ubiquitous computing p. 143
GridMiner : a fundamental infrastructure for building intelligent grid systems p. 150
Semantic Web services discovery and ranking p. 157
Semantic service integration support for Web portal p. 161
An editor labeling model for training set expansion in Web categorization p. 165
Improving Web clustering by cluster selection p. 172
UBB mining : finding unexpected browsing behaviour in clickstream data to improve a Web site's design p. 179
Guidance performance indicator - Web metrics for information driven Web sites p. 186
Automatic training corpora acquisition through Web mining p. 193
A semi-supervised document clustering algorithm based on EM p. 200
Tracking information epidemics in blogspace p. 207
HDGSOMr: a high dimensional growing self-organizing map using randomness for efficient Web and text mining  p. 215

Integrating element and term semantics for similarity-based XML document clustering  p. 222

Efficient extraction of closed motivic patterns in multi-dimensional symbolic representations of music  p. 229

The WebCAT framework - automatic generation of meta-data for Web resources  p. 236

User navigational behavior in e-learning virtual environments  p. 243

Automatically generating labeled examples for Web wrapper maintenance  p. 250

Clickstream log acquisition with Web farming  p. 257

Effective summarization method of text documents  p. 264

Mining emerging patients and classification in data streams  p. 272

A semantic classification approach for online product reviews  p. 276

Standardized evaluation method for Web clustering results  p. 280

Establishing guidelines on how to improve the Web site content based on the identification of representative pages  p. 284

Mining highly authoritative Web resources for one-stop learning  p. 289

Keyphrases extraction from Web document by the least squares support vector machine  p. 293

Discovering and visualizing temporal-based Web access behavior  p. 297

Visual similarity comparison for Web page retrieval  p. 301

Mining interesting topics for Web information gathering and Web personalization  p. 305

Web structure mining for usability analysis  p. 309

Categorical term descriptor: a proposed term weighting scheme for feature selection  p. 313

Annotating text segments in documents for search  p. 317

Referential context mining: discovering viewpoints from the web  p. 321

DSM-TKP: mining top-K path traversal patterns over Web click-streams  p. 326

A combined approach of formal concept analysis and text mining for concept based document clustering  p. 330

Knowledge datawarehouse: Web usage OLAP application  p. 334

Towards a tuplespace-based middleware for the semantic web  p. 338

Extracting a domain ontology from linguistic resource based on relatedness measurements  p. 345

Generating surrogates to make the semantic Web intelligible to end-users  p. 352

An approach for defining relevance in the ontology-based information retrieval  p. 359

Measuring the relative performance of schema matchers  p. 366

An efficient ontology comparison tool for semantic Web applications  p. 372

Biological ontology enhancement with fuzzy relations: a text-mining framework  p. 379

Aligning class hierarchies with grass-roots class alignment  p. 386

Implementation and evaluation of a distributed RDF storage and retrieval system  p. 393

Learning from ontologies for common meaningful structures  p. 397

Information extraction from HTML product catalogues: from source code and images to RDF  p. 401
Adapting agent communication languages for semantic Web service p. 405
inter-communication

Situated support for choice of representation p. 409

Architecture for automated annotation and ontology based querying of semantic Web resources p. 413

Software architecture of advisory systems using agent and semantic Web technologies p. 418

Pseudo-relevance feedback in Web information retrieval using segments' subjective importance values p. 422

A study of problem difficulty evaluation for semantic network ontology based intelligent courseware sharing p. 426

Managing ontology changes on the semantic web p. 430

From robots to web-agents : building cognitive software agents for web-information retrieval by taking inspiration from experience in robotics p. 434

MDSManager : a system based on multidatasource approach for data integration p. 438

Conversation errors in web service coordination: run-time detection and repair p. 442

IPR : automated interaction process reconciliation p. 450

Encoding abstract descriptions into executable web services: towards a formal development p. 457

Developing agent web service agreements p. 464

Integrating web services with agent based workflow management system (WfMS) p. 471

Ontology-driven knowledge management on the grid p. 475

Modelling and simulating chained negotiation to enable sharing of notifications p. 479

Compatibility analysis of web services p. 483

Using ontological concepts for web service composition p. 487

Publish and search versus registries for semantic web service discovery p. 491

The role of local knowledge in complex web service reconfiguration p. 495

Cache replacement for transcoding proxy caching p. 500

Design and implementation of a P2P cooperative proxy cache system p. 508

Webpage importance analysis using conditional markov random walk p. 515

WICER : a weighted inter-cluster edge ranking for clustered graphs p. 522

An em based training algorithm for cross-language text categorization p. 529

Toward the automatic compilation of multimedia encyclopedias: associating images with term descriptions on the web p. 536

Adding the temporal dimension to search - a case study in publication search p. 543

A novel way of computing similarities between nodes of a graph, with application to collaborative recommendation p. 550

Multi-faceted information retrieval system for large scale email archives p. 557

MyLibrary@LANL : proximity and semi-metric networks for a collaborative and recommender web service p. 565

Imagery-based digital collection retrieval on web using compact perception features p. 572

Mining web logs to improve hit ratios of prefetching and caching p. 577

Weighted link analysis for logo and trademark image retrieval on the web p. 581

A user-centered approach for evaluating query expansion methods p. 586
Wise: a visual tool for automatic extraction of objects from world wide web p. 590
Intelligent web information mapping with hypermap p. 594
Integrating compound terms in bayesian text classification p. 598
Metadata propagation in the web using co-citations p. 602
Progressive analysis scheme for web document classification p. 606
Evaluation of response quality for heterogeneous question answering systems p. 610
Page-rerank: using trusted links to re-rank authority p. 614
Improving the effectiveness of model based recommender systems for highly sparse and noisy web usage data p. 618
Personalized search based on user search histories p. 622
Predictive algorithms for browser support of habitual user activities on the web p. 629
Time based segmentation of log data for user navigation prediction in personalization p. 636
Stable third-order tensor representation for color image classification p. 641
Stamp: adaptable templates for synchronized multimedia presentations p. 645
Multilevel Web personalization p. 649
Real-time learning behavior mining for e-learning p. 653
Visualization support for interactive query refinement p. 657
Graph neural networks for ranking web pages p. 666
A method of web search result clustering based on rough sets p. 673
An evaluation model for web-based learning support systems p. 680
Information domain modeling for adaptive web systems p. 684
Assisting analysts in the construction of model based tracking recommender systems p. 688
Personalized web recommendations: supporting epistemic information about end-users p. 692
Supporting spatial data queries for mobile services p. 696
Clinical decision support based on mobile telecommunication systems p. 700
Boosting item keyword search with spreading activation p. 704
Optimizing dynamic web service component composition by using evolutionary algorithms p. 708
Network-based intrusion detection using adaboost algorithm p. 712
QTIP: multi-agent NLP and privacy architecture for information retrieval in usable web privacy software p. 718
Privacy-preserving top-N recommendation on horizontally partitioned data p. 725
Perception of individual activities in a group activity through qualitative information about the group dynamics p. 732
An E-services architecture for legislative assemblies p. 739
Schema matching using neural network p. 743
Recommending trade exhibitions by integrating semantic information with collaborative filtering p. 747
Argument games for interactive access control p. 751
Binary prediction based on weighted sequential mining method p. 755
Ontology-based information integration in virtual learning environment p. 762
A formal language for access control policies in distributed environment  p. 766
Applying the HYRIWYG incentive mechanism in a recommender system  p. 770
A reversible data hiding approach to mesh authentication  p. 774
Access control with uncertain surveillance  p. 778
Hits is principal components analysis  p. 782
Kernel principle component analysis in pixels clustering  p. 786
A platform for semantic annotations and ontology population using conditional random fields  p. 790
Web log session analyzer : integrating parsing and logic programming into a data mart architecture  p. 794
ITPilot : a toolkit for industrial-strength web data extraction  p. 798
A mas approach to fusion of heterogeneous information  p. 802
A-globe : multi-agent platform with advanced simulation and visualization support  p. 805
misearch  p. 807
Intelligent taxonomy management tools for enterprise content  p. 809
Proposal and verification of flexible interface mapping technique for automatic system cooperation based on semantics  p. 812
An interactive hybrid system for identifying and filtering unsolicited email  p. 814
