Wind Field and Turbulence Sensing
A Direct Doppler Detection Lidar System for Atmospheric Winds
Combining Lidar and Radar for Probing Boundary Layer Winds and Clouds
Diagnostics of Tropical Cyclone Anomalous Trajectory on the Ground of Sea Surface Microwaves
Passive Microwave Mapping Simulation, Karhunen-Loeve Analysis and Precipitation Retrievals
Microwave Radiometric Calibration of Airborne Weather Radars Under Rain-Free Conditions Over the Ocean
Rainfall Estimation from Combined Microwave and Infrared Satellite Observations
Optical and Microwave Sensing of Breaking Waves in Ocean
Long Slit Spectroscopy in the Ten Micron Infrared as a Tool for Remote Sensing
Remote Sensing of Atmospheric and Surface Parameters in a Cloudy Atmosphere Using AIRS/AMSU Sounding Data
The Effects of Cloud Clearing on Microwave Humidity Sounding Retrieval Accuracies: Analysis of DMSP Optical Linescan System (OLS) and Special Sensor Microwave Humidity Sounder (SSM/T-2) Data
Remote Temperature Sounding and the Arithmetic Inversion of The Satellite Radiance Field
Earth Observations Through the Earth Observing System (EOS)/Moderate Resolution Imaging Spectroradiometer (MODIS) Multispectral Capability and Combined Observations with Other EOS Instruments
Improved Microwave Measurements of Ocean Wave Spectra
Characterization of Snow Grain Size in the Near-Infrared and Microwave Wavelengths
Synergy of Optical and Microwave Remote Sensing with Respect to Agricultural Crops Illustrated with MAC Europe Campaign 1991
Microwave and Optical Techniques for Forest Monitoring: The Black Forest Experiment
A New Formula for the Linear Constrained Matrix Inversion
Aviosar 580 Campaign on the Matera Test Site, Neural Network Approach for Optical and SAR Data Classification
Visible, Thermal and Microwave Sensing of Clouds and Their Effect on Climate
Atmospheric Correction for Ocean Color Remote Sensing
Microwave/Optical Studies of Saline Ice, Snow, Melt Ponds and Refrozen Melt Pond Ice
On Links Between Microwave and Shortwave Signatures of Multilayer Sea Ice During the Onset of Melt
Analysis of Combined Optical and Microwave Data for The Characterization of Sea Ice
Evaluating Energy Balance of Semiarid Rangeland from Combined Optical-Microwave Remote Sensing
Combined Use of Optical and Microwave Remotely Sensed Data for the Estimation of Surface Energy Balance Components Over a Semi-arid Watershed
Estimation of Surface Fluxes Over Canopies During MAC-Europe 1991 Campaign Using Combined Microwave and Optical Data
Synergism of Satellite Observations of Microwave Emission and Visible Reflectance to Study Land Surface Change
Retrieval of Surface Physical Parameters With AVHRR and SMMR Over Africa
Combined Use of Microwave and Optical Measurements on the NASA DC-8 to Determine Aerosol and GAS Properties Related to Ozone Depletion
Earth-Satellite-Earth Laser Long-Path Absorption Experiments Using the Retroreflector in Space
Lidar Measurements of Aerosol Scattering in the Troposphere and Stratosphere
Aerosol Mapping of the Atmosphere Using a Multiple Wavelength Polarization Lidar
Retrieval Algorithms of Aerosol Profile For ILAS Measurements
Combining Lidar and Radar Measurements to Derive Cirrus Cloud Effective Radii: In situ Comparison and Simplistic Model Results
A Remote Sensing Unmanned Aircraft Vehicle System for Flux Measurements Over Forest Canopies
Estimating the Areal Extent of Forest Fires in Interior Alaska in 1990 and 1991 Using AVHRR Data
Estimating the Storage of Carbon in Alaskan Boreal Forests and its Release During Fires
Advances in Optical and Microwave Technology to Direct Detection in the Far Infrared and Submillimeter Heterodyne Receivers
Recent Developments Towards the Deployment of the NASA LASE Water Vapor Dial System
A Millimeter-Wave Instrument for Use in a Synergistic, Optical/Millimeter-Wave Approach to Pollution Monitoring
Survey of Optical and RF Remote-Sensing Instrumentation and Capabilities at the Sondrestrom, Greenland, Atmospheric Research Facility
A Multispectral System for Contemporaneous Field Observations of Natural Surfaces
Forward Looking Airborne Radar in Combination with Downward and Side Looking Sensors
The Advanced Microwave Sounding Unit-A (AMSU-A) SSM/T-2 Calibration Data Analyses
The New Ultraviolet: Global Space Weather Systems
Airborne Multiwavelength Microwave Imaging Sensor
Measurements from a Polarimetric Optical Bistatic Scatterometer
Ground-Based Remote Sensing of the Atmosphere By Combined Passive and Active Sensors
Tropospheric Water Vapor Concentrations Measured on a Penn State/ARL LIDAR
A Comparison of Columnar Water Vapor Retrievals Obtained with a Near-IR Solar Radiometer and Microwave Radiometer
Comparison of Columnar Water Vapor Determined from Microwave Emission and Solar Transmission Measurements
Effects of Radiosonde Type on Satellite-Derived humidities
A Comparison of Microwave Radiometer, Lidar, and Meteorological Balloon Observations of Water Vapor During the Ladimas Campaign
Comparison of Cloud Boundaries Measured with 8.6mm Radar and 10.6[mu]m Lidar
Remote Sensing of Cloud Properties Using a 94 GHz Radar
Laser Scattering in Clouds p. 215
Synergic Use of Microwave and Infra-Red Radiometry for Cloud Analysis p. 220
Determination of Cloud Layer Characteristics by Using Microwave Radiometric Observations p. 224
Optical and Microwave Imaging of the Earth: Today, the EOS Era and Beyond p. 227
Study of Land Degradation With Polarimetric SAR and Visible/Near-Infrared Imaging Spectroscopy p. 228
Integration of SASS Ku-Band Imagery and AVHRR Imagery for Historical Tropical Forest Inventory p. 232
Detection and Interpretation of Fire-Disturbed Boreal Forest Ecosystems in Alaska Using Spaceborne SAR Data p. 236
Snow Properties Derived from TM and SAR Measurements p. 240
Comparison of Visible, Infrared and Microwave Backscatter Characteristics of Agricultural Fields from Airborne Data p. 244
Measurement of High Resolution Microwave Surface Emittance Using Advanced Multisensor Data Fusion Techniques p. 248
Model for the Simulation of Meteorological Effects on the Performances of Microwave Imaging Radiometers p. 252
Cleopatra: Participation of the DLR Institute of Radio-Frequency Technology in a Synergistic Remote Sensing Experiment - Data Takes Over Lechfeld p. 256
All Sky Imaging Photometer Studies of the Aurora and Airglow p. 259
Author Index p. 260

Intercomparison of Remote and In Situ Sensors
Multisensor Analysis of Heavy Rainfall Events Over Northern Italy
Vegetation Characterization with Combined Thematic Mapper and L-Band Synthetic Aperture Radar Data
Radiobrightness Thermal Inertia Sensing of Land-Atmosphere Boundary Parameters
Single-Station Stereo Mapping of Terrain Elevation with Combined Optical and Synthetic Aperture Radar Image Data
