Vision on Aviation Surveillance Systems
Mission Determines Equality Between Radars
Aviation Weather Radar
Terminal Area Surveillance System
An Ultrawideband Microwave-Radar Conceptual Design
A New Approach to a Multistatic Passive Radar Sensor for Air Defense
An Experimental S-Band Pulse Chasing Bistatic Radar System, PCBRS-1
Processing Techniques for Surface Surveillance Radars in Littoral Environments
AN/MPS-39 Support of U.S. Space Launch Activities
Aircraft Detection And Tracking with High Frequency Radar
OTH-B Coordinate Registration Experiment Using an HF Beacon
Special Presentation, Monday Evening - SIR-C/X-SAR: a Multifaceted Radar
Resolving Closely Spaced Targets Using Linear FM Envelope Processing
Gradient Descent Method for Designing Optimum Radar Signals
A New Doppler Processing Technique for Detection Performance Improvement in Existing Airborne Radars
Surveillance Performance
Coherent Radar Detection of Targets Against a Combination of K-Distributed and Gaussian Clutter
Radar Locating of Small-Sized Targets on the Rough Sea Surface Background
Non-Coherent Integration in a Medium PRF Radar
Multiple Hypothesis Clustering in Radar Plot Extraction
Adaptive Nullsteering of Main Lobe Jamming; Analysis of The Artist Trials
Comparison of DPCA and STAP for Space-Based Radar
Partially Adaptive Space-Time Processing for Clutter Suppression in Airborne Radars

The Practical Approaches of Space-Time Signal Processing for Airborne Array Radar

Position Determination from Modern Radar Systems - New Theoretical Results and their Practical Aspects

Multiple Order, Multiple-Time Constant Self-Adaptive Tracking Filter
Target Tracking by Neural Network Maneuver Detection and Input Estimation
Acousto-Optic Range-Doppler Processor for Radar Insertion

Fopen-SAR Detection by Direct Use of Simple Scattering Physics
SAR Foliage Penetration Phenomenology of Tropical Rain Forest and Northern U.S. Forest

Results on Ground Penetration SAR Phenomenology from June 1993 Yuma Experiment
Quality Analysis of Strip Map SAR Products Obtained at EMSL
Radar Cross-Section Data Encoding Based on AR Spectral Estimation Techniques

A Practical Approach to the Prediction and Assessment of Radar Performance in Sea Clutter

Sea Backscatter, Spikes and Wave Group Observations at Low Grazing Angles
Identification of Aircraft on the Basis of 2-D Radar Images p. 405
Maximum Likelihood Autofocusing of Radar Images p. 410
Interpreting Scattering Mechanism of Radar Target by Wavelet Transform p. 416
Specular Multipath from Rough Correlated Surfaces p. 419
Simulation of Radar Sea Clutter Using Autoregressive Modelling and K-Distribution p. 425
High Resolution Imaging of Large Vehicle by MMW Scanning Sensors p. 431
Study of the Effect of Nonlinear Scattering of Radio Waves by Real Metallic Objects p. 435
Adaptive Chaff Suppression by Polarimetry with Planar Phased Arrays at Off-Broadside p. 108
Interferometric Moving Ground Target Imaging p. 438
Aspect Dependence of Time-Frequency Signatures of a Complex Target Extracted by Impulse Radar p. 444
Ultra-Wideband/Short-Pulse Radar for Target Identification and Detection - Laboratory Study p. 450
Coherent Averaging of Range Profiles p. 456
SAR Image Classification by Wavelets p. 462
High-Resolution 3-D Imaging Radar p. 468
Planar Subarray Processing for SAR Imaging p. 473
Issues in Ultra-Wideband, Widebeam SAR Image Formation p. 479
Comparative Analysis of Ground-Based Wind Shear Detection Radars p. 486
A Low Cost Microburst Early Warning and Detection Radar p. 496
Terminal Area Surveillance System p. 501
The DLR Near-Range Experimental Radar System for Airport Surface Movement Guidance and Control p. 505
A New Transportable Precision Approach Radar p. 511
ATC Primary Radar Signal Analysis for Target Characterisation; A Model Validation p. 516
Data Processing Techniques for Airport Surveillance Radar Weather Sensing p. 521
Pulse Compression for Weather Radar p. 529
Weather Detection Design Issues for a Solid State ASR p. 536
A Multi-DSP Signal Processing and Control System for MST Radar p. 542
A Comparison of Three Direct Sampling Techniques p. 546
An Implementation Study of Airborne Medium PRF Doppler Radar Signal Processing on a Massively Parallel SIMD Processor Architecture p. 551
The Optimum Coherent Neyman-Pearson Radar Receiver p. 558
Homodyne FMCW Radar Range Resolution Effects with Sinusoidal Nonlinearities in the Frequency Sweep p. 563
Dependence of Monopulse Radar Bore-Sight Error on Incident E-Field Polarization p. 568
Step Frequency Waveform Design and Processing for Detection of Moving Targets in Clutter p. 573
Ground Clutter Simulation for Surface-Based Radars p. 579
CFAR Signal Detection in Nonhomogeneous Weibull Clutter and Interference p. 583
A New CFAR Detector with Greatest of Selection p. 589
Performance Analysis of GOSCA CFAR Detector in Clutter Edge Situation  p. 592
Adaptive Space-time Processing with Systolic Algorithm: Experimental Results Using Recorded Live Data  p. 595
Training Method in Space-Time Adaptive Processing with Strong Generalizing Ability  p. 603

Space-Time Adaptive Processing in Modern Electronic Warfare Environments  p. 609
Adaptive Airborne MTI: Comparison of Sideways and Forward Looking Radar  p. 614
About the Influences of Polarization Agile Jammers to Adaptive Antenna Arrays  p. 619
Adaptive Channel Equalization for Space-Time Adaptive Processing  p. 624
Adaptive Space Time Processing for Forward Looking Radar  p. 629
A View of Current Status of Space-time Processing Algorithm Research  p. 635
An Algorithm for Detecting Groups of Targets  p. 641
Moving Target Detection in SAR Imagery: Experimental Results  p. 644
Evaluation of Noise and Clutter Induced Relocation Errors in SAR MTI  p. 650
False Alarm Reduction Through Road Area Delimitation  p. 656
High Resolution Radar Clutter Classification  p. 662
Likelihood Detection for Nonfluctuating Targets in Ergodic K-Clutter  p. 668
Adaptive Clutter Map Detector with a Band-Selective Velocity Filter in the Multimode Radar Signal Processor Using Array Processing Technique  p. 674
Double-Parameter CFAR Detector for Weibull Clutter  p. 680
The Army Research Laboratory Ultra-Wideband Testbed Radars  p. 686
Long Term Coherent Integration for a Floodlight Radar  p. 698
Periscope Detection Radar  p. 704
Subarray Configurations for Digital Beamforming with Low Sidelobes and Adaptive Interference Suppression  p. 714
Features of Ultrawideband Radar Projecting  p. 720
Digital Modules for Phased Array Radar  p. 726
Saw Dispersive Delay Lines in Radar Signal Processing  p. 732
Phased Arrays Composed of Antennas with Steerable Patterns  p. 737
Electronically Steerable Plasma Mirror for Radar Applications  p. 742
