Foreword

The Holm Conference Prize Paper Award

The Armington Recognition Award

The 1994 Ragnar Holm Scientific Achievement Award

Aluminum Connections: Legacies of the Past p. 1
Effective Erosion Rates for Selected Contact Materials In Low-Voltage Contactors p. 33
Mathematical Modeling of Vacuum Breakdowns p. 43
Generation of Extreme States in Condensed Matter Under High Voltage Vacuum Breakdown p. 51

Poroelectron Emission Induced Erosion of Materials p. 59
Application of Numerical Field Simulations for Low-Voltage Switchgear p. 65
Polarity Effect of Unsymmetrical Material Combination on the Arc Erosion and Contact Resistance Behaviour p. 79
Experimental Study on Relationship Between Bridge and Arc Phenomena in Breaking Ag Contacts p. 89
Influence of Oxygen Concentration on Contact Resistance Deterioration of Pd Contacts due to Mechanochemical Reaction p. 95
A Measurement of Contact Resistance and Surface Profile of Arcing Ag Contacts p. 105
Types of Contact Contaminations in Telecommunication and Control Switches p. 111
Surface Analysis of Falled Vacuum Reeds p. 119
Mechanism of Enhancement in Breakdown Voltage Between Contacts by High-Temperature Oxygen Treatment for Rhodium-Plated Contact Reed Switches p. 125
The Effects of Wipe Contact Resistance of Aged Surfaces p. 131
The Application and Mechanism of Lubricants on Electrical Contacts p. 145
Investigation of Nickel-Nickel Contacts in Portable Computer Battery Pack Applications p. 155
Elaboration of Heat-Treated Thin Films of Polyacrylonitrile for Connector Application p. 161
Assessment of Fretting Failure Models of Electrical Connectors p. 167
A Statistical Comparison of Gold Plating Systems Under Specific Fretting Parameters p. 177

Interdiffusion Between Connector Contact Materials and Nickel Diffusion Barriers During Precipitation Hardening of High Performance Spring Materials p. 189
Effect of Ion-Implantation on the Contact Resistance of Copper and Silver-Copper Electrical Contacts Under Fretting Conditions p. 195
The Reliability of the Asperity Contact Model in Determining Charge Injection Accross Interfaces p. 211
The Transient Thermal propagation of Static Contacts p. 223
Wear Rate Reductions in Carbon Brushes Conducting Current and Sliding Against Wavy Copper Surfaces p. 229
New Powder Metallurgical Ag/SnO[subscript 2] Contact Material from Different Loads p. 239
Effect of Cracks on Contacts Operating Under High Contact Force p. 245
Comparison of the Switching Behavior of Internally Oxidized and Powder Metallurgical Silver Metal Oxide Contact Materials p. 253

A Sensitive Device for the Measurement of the Force Exerted by the Arc on the Electrodes p. 261

Application of a New Silver/Tin Oxide for Capacitive Loads p. 269

Author Index p. 275

Biographies p. 277
