Preface

Digital Computer Solution of Electromagnetic Transients in Single- and Multiphase Networks  p. 11

Nonlinear and Time-Varying Elements in Digital Simulation of Electromagnetic Transients  p. 23

Digital Simulation of DC Links and AC Machines  p. 31

Implementation of the CDA Procedure in the EMTP  p. 39

Digital Simulation of Flexible Topology Power Electronic Apparatus in Power Systems  p. 49

A Multiphase Harmonic Load Flow Solution Technique  p. 59

Implementation of a New Harmonic Initialization Method in the EMTP  p. 69

A Waveform Relaxation Technique for Steady State Initialization of Circuits with Nonlinear Elements and Ideal Diodes  p. 79

Multiphase Power Flow Solutions Using EMTP and Newtons Method  p. 87

TACS Enhancements for the Electromagnetic Transient Program  p. 95

EMTP TACS-FORTRAN Interface Development for Digital Controls Modeling  p. 103

Improved Control Systems Simulation in the EMTP Through Compensation  p. 109

Accurate Modelling of Frequency-Dependent Transmission Lines in Electromagnetic Transient Simulations  p. 135

Phase Domain Modeling of Frequency-Dependent Transmission Lines by Means of an ARMA Model  p. 145

Experimental Evaluation of a UHV Tower Model for Lightning Surge Analysis  p. 157

Computation of Electromagnetic Transients on Nonuniform Transmission Lines  p. 167

Wide-Band Corona Circuit Model for Transient Simulations  p. 177

A General Formulation of Impedance and Admittance of Cables  p. 189

Simulation of Transients in Underground Cables with Frequency-Dependent Modal Transformation Matrices  p. 199

Matrix Representation of Three-Phase N-Winding Transformers for Steady-State and Transient Studies  p. 211

Transient Simulation and Analysis of a Three-Phase Five-Limb Step-Up Transformer Following an Out-of-Phase Synchronization  p. 221

Topology Based Magnetic Model for Steady-State and Transient Studies for Three-Phase Core Type Transformers  p. 233

A High Frequency Transformer Model for the EMTP  p. 247

Simplified Three-Phase Transformer Model for Electromagnetic Transient Studies  p. 259

Simple Representation of Dynamic Hysteresis Losses in Power Transformers  p. 269

Frequency Dependent Eddy Current Models for Nonlinear Iron Cores  p. 277

Modeling of Metal Oxide Surge Arresters  p. 287

Study of ZnO Arrester Model for Steep Front Wave  p. 295

Multi-Port Frequency Dependent Network Equivalents for the EMTP  p. 303

GUI Enhances Electromagnetic Transients Simulation Tools  p. 319

EMTP. A Powerful Tool For Analyzing Power System Transients  p. 325

MODELS: A New Simulation Tool in the EMTP  p. 331

Creating an Electromagnetic Transients Program in MATLAB: MatEMTP  p. 337

Mitigating Potential Transformer Ferroresonance in a 230 kV Converter Station  p. 359
Analysis of Harmonic Overvoltage Due to Transformer Saturation Following Load Shedding on Hydro-Quebec-NYPA 765 kV Interconnection

Elimination of Closing Resistors on EHV Circuit Breakers

Statistical Switching Overvoltage Analysis of the First B.C. Hydro Phase Shifting Transformer Using the Electromagnetic Transients Program

Capacitor Switching and Transformer Transients

Design and Installation of 500-kV Back-to-Back Shunt Capacitor Banks

Effectiveness of Pre-Insertion Inductors for Mitigating Remote Overvoltages Due to Shunt Capacitor Energization

Transient Overvoltages and Overcurrents on 12.47 kV Distribution Lines: Computer Modeling Results

Overvoltage Studies for the St-Lawrence River 500-kV DC Cable Crossing

Observation and Analysis of Multi-Phase Grounding Faults Caused by Lightning

Measurement of Lightning Surges on Test Transmission Line Equipped with Arresters Struck by Natural and Triggered Lightning

EMTP-Based Model for Grounding System Analysis

Lightning Overvoltage Protection of the Paddock 362-145 kV Gas-Insulated Substation

Estimation of Fast Transient Overvoltage in Gas-Insulated Substation

More Accurate Modeling of Gas Insulated Substation Components in Digital Simulations of Very Fast Electromagnetic Transients

Development and Validation of Detailed Controls Models of the Nelson River Bipole 1 HVDC System

Controls Modelling and Verification for the Pacific Intertie HVDC 4-Terminal Scheme

Modeling of the Hydro-Quebec - New England HVDC System and Digital Control with EMTP515

A Static Compensator Model for Use with Electromagnetic Transients Simulation Programs

Detailed Modeling of an Actual Static VAR Compensator for Electromagnetic Transient Studies

A Static Compensator Model for the EMTP

An EMTP Study of SSR Mitigation Using the Thyristor Controlled Series Capacitor

400 MW SMES Power Conditioning System Development and Simulation

Impact of Utility Switched Capacitors on Customer Systems - Magnification at Low Voltage Capacitors

Arc-Furnace Model for the Study of Flicker Compensation in Electrical Networks

Evaluation of Harmonic Impacts from Compact Fluorescent Lights on Distribution Systems

Voltage Notching Interaction Caused by Large Adjustable Speed Drives on Distribution Systems with Low Short Circuit Capacities
