Migrating Controller Based Framework for Mutual Exclusion in Distributed Systems p. 1
A Self-Stabilizing Algorithm for the Maximum Flow Problem p. 8
Load Balancing Strategy and Priority of Tasks in Distributed Environments p. 15
A Self-Stabilizing Ranking Algorithm for Tree Structured Networks p. 23
Directions in Multiprocessor Verification p. 29
A Simulation-Based Architectural Verification of Multiprocessor Systems p. 34
MPTG: A Portable Test Generator for Cache-Coherent Multiprocessors p. 38
Constraint Satisfaction for Test Program Generation p. 45
Task Assignment in Distributed Computing Systems p. 49
Load Balancing Technique for Parallel Search with Statistical Model p. 54
Program-Based Static Allocation Policies for Highly Parallel Computers p. 61
Parallel Task Scheduling Using the Order Graph Method p. 69
Loop Based Scheduling for High Level Synthesis p. 76
Accuracy of Filtered Traces p. 82
Trace Sampling for Design Trade-offs of Microprocessors Using SPEC (tm) Integer Benchmarks p. 87
Recognizing Nonseries-parallel Structures in Multilevel Logic Minimization p. 95
A Variable Access Associative Memory Chip for Flexible Searches in RAM p. 102
A Novel Technique for Fast Multiplication p. 109
A Mediated Approach to Open, Large-Scale Information Management p. 115
Distributed Simulation in A Loosely Coupled Environment Using the TCP/IP Protocol p. 122
Effect of Faulty Network Components on Node Availability p. 128
System-Level Testing Assignment for Hypercubes with Lower Fault Bounds p. 136
Efficient Routing Algorithms for Folded-Cube Networks p. 143
A Reconfigurable 1-Factor Hypercubic Embedding Interconnection Network for Parallel Processing p. 152
An ATM Protocol for Local Access and Control of Internal/External Traffic p. 159
1.55.52 Mb/s Data Transmission on Category 5 Cable Plant p. 168
Optical Backplane Demonstrations Using Micro-Optics and Smart Pixel Transceiver Arrays p. 179
Techniques for Accelerated Measurement of Low Bit-Error-Rate in Computer Data Links p. 184
On Non-existence of Optimal Local Synchronous Bandwidth Allocation Schemes for the Timed-Token MAC Protocol p. 191
Fairness in DQDB Revisited: A New Solution p. 198
Comparison of Adaptive Fairness Control Mechanisms for DQDB Metropolitan Area Networks p. 205
Queueing and Throughput Advantages of Asymmetric Packet Switch Modules Over Symmetric Switch Modules Under Bursty and Imbalanced Traffic p. 212
Bridging the Network Management Gap: How Element Managers can Streamline SONET p. 219
Network Management and Provide a Migration Path for Broadband Management

Study of Integrated Bandwidth Allocation and Multiplexing Strategy for VP-Based ATM Networks p. 226
A Quadratic-Time Heuristic Method for Reliable Network Design with Arbitrary Traffic Loads S  
A Framework for Optimal Communication on a Subclass of Cayley Graph Based Networks  
Ascend/Descend Algorithms on Cayley Graphs  
Shortest Path Routing in a Class of Cayley Graphs of Semi-Direct Product of Finite Groups  
Two Different Families of Fixed Degree Regular Cayley Graphs  
The Information Highway: Is It Ready?  
A Top-Down Method of Synthesizing Optimized Protocol Converters  
The RAPID Transport Protocol  
NView: A Visual Framework for Network Tool Integration  
Adding Adaptive Flow Control to Swift/RAID  
Value Chain Management: A Project Management Approach  
Issues in Software Cycle Time Reduction  
Using Deductive Databases to Facilitate the Maintenance Process  
Conceptual Modeling: A Critical Survey and A Few Perspectives  
The MP-tree: A Data Structure for Spatio-Temporal Data  
Query-Driven Petri Net Reduction for Analysis in Ada Tasking  
A Self-Stabilizing Shortest Path Algorithm in a DAG  
An Evaluation of Object-Based Programming with Visual Basic  
An Object-Oriented Design for User Interfaces  
Experience with an Interactive Attribute-Based User Information Environment  
An Object-Oriented Approach in C++ for Asynchronous Processing in CMISE-Applications  
Establishing PCI Compliance Using Formal Verification: A Case Study  
Formal Verification of a Commercial Serial Bus Interface  
Architectural and Multiprocessor Design Verification of the PowerPC 604 Data Cache  
Multiprocessor Design Verification with Generated Realistic MP Programs  
Multiprocessor System Verification through Behavioral Modeling and Simulation  
Timing Driven Genetic Algorithm for Standard-cell Placement  
Logic, Fault, and Design Error Simulation based on an Integrated Hardware Array  
Two-Way Balance-Tolerant Partitioning Based on Fuzzy Graph Clustering for Hierarchical Design of VLSI Systems  
Parallel Task Execution in LANs and Performance Analysis  
Matching Algorithms with Parallel Architectures: A Quantitative Approach  
Designing SONET/ATM Layer Processing ASICs Using Embedded Approach  
A Load Sharing Scheme for SCI Distributed Shared Memory Systems  
HyperPascal for Architecture Independent Parallel Programming  
"Receiver Makes Right" Data Conversion in PVM  
Performance Prediction Model for SPMD Massively Parallel Computing Systems  
Experiences with High-Level Parallel Programming Systems
Performance Analysis of a Dual Bus Reservation Based Fiber-Optic Network p. 479
Design Issues in Client/Server Systems p. 494
An SSMP Traffic Model Based on Network Measurements p. 494
On the Theoretical Limit to the Diagnosis Links in Communication Networks p. 501
A Dynamically Reconfigurable Switch for High-Speed Networks p. 508
Characterizing Bandwidth Requirements of Multiplexed Connections with Quality-of-Service Constraints p. 515
Throughput Analysis of Interconnecting CSMA/CD LANs with Switching Hubs p. 522
Adaptive Proportional Rate Control for ABR Service in ATM Networks p. 529
A Method for Logic Design of ATM Adaptation Layer Protocol p. 536
Admission Control for Transmitting Connectionless Traffic Across ATM Networks p. 543
Signalling in ATM Networks: Experiences with an Object-Oriented Solution p. 550
Asynchronous Transfer Mode in Broadband Networks p. 558
Internetworking with ATM and Legacy LANs networks p. 565
Synchronization in High Speed Telecommunication Networks p. 566
A Practical Overview of Synchronization Status Messaging and Its Applicability to SONET Networks p. 571
ATM LAN Interconnections With a Cut-Through Nonblocking Switch p. 578
MPCBN: A High Performance ATM Switch p. 585
Jitter at an ATM Multiplexer in the Presence of Correlated Sources p. 592
A High-Performance Fault-Tolerant Switching Network for B-ISDN p. 599
Quantization of Signals and Metrics in the Decoding of 8-PSK TCM p. 607
Reconfigurable Digital Baseband Modulation for Wireless Computer Communication p. 610
A Method for Evaluating MPSK Performance Using a (M/2) PSK Signal Set p. 617
On the Performance of a DS/SS System in a Band-Limited Multipath Environment p. 622
Data Allocation and Spatio-Temporal Implications for Video-On-Demand Systems p. 629
Framework for Interactive Video-on-Demand Service p. 636
XTPX Transport System for Flexible QoS Support of Multimedia Applications p. 643
Enhancing B-ISDN Signaling to Meet the Challenge of Multimedia Services p. 650
Cellular Digital Packet Data CDPD p. 659
A Modified Hyperbolic Congruential Frequency Hop Codes for Asynchronous Event Signaling p. 666
Structure and Network Control of a Hierarchical Mobile Network Architecture p. 671
Co-Channel Interference Cancellation for DS-SS CDMA Mobile Communication System p. 678
On the Computation of Groups of Bounding Boxes for Fast Test of Objects Intersection p. 684
Communication Service Specification Using OOA and LOTOS p. 691
Distributed Application Entity Groups: Analysis and Simulation Results p. 697
metrix: An Approach for Characterizing the Performance Potential of System Architectures p. 704
A Performance Evaluation Methodology for Computer Systems p. 713
Distributed Programming in More Efficient Remote Shell Environment with Direct Data Forwarding and Lazy Connection Release p. 720
Supporting Dynamic Reconfiguration of Operating System using Object and Meta Objects p. 727

A Dynamic Central Scheduler Load Balancing Mechanism p. 734

Author Index p. 741
