Adaptive Neural Control for Flexible Aerospace Systems: Progress and Prospects  p. 3
Noncolocated Vibration Control Using Neural Networks  p. 9
Integrated Modular Neural Intelligent Control Systems  p. 15
Multiresolutional Controller for Sensitivity Minimization of Flexible Structures  p. 21
Direct Optimal Control of Structures Using Algebraic Equations of Motion and Neural Estimator  p. 27
A Deductive Approach Towards Controller Synthesis  p. 35
Robust Implicit Self Tuning Regulator/MRAC Convergence and Stability  p. 42
Controllers as Fixed Points of Set-Valued Operators  p. 47
Stable H[superscript 00] Extensions of Hybrid Control Systems  p. 53
Stability of a Set of Matrices: An Application to Hybrid Systems  p. 59
Survey of Projects Relating to Intelligent Control at the Electric Power Research Institute (Survey Paper)  p. 67
Performance Improvement of Intelligent Machines Through Feedback  p. 73
Total Concurrency and Uncertainty in Linguistic Geometry  p. 79
A Mathematical Representation of Multi-resolutional World Modeling  p. 85
Reliability-Based Complexity in Intelligent Machines  p. 91
Back Propagation Through Links: A New Approach to Kinematic Control of Serial Manipulators  p. 99
Dynamic Recurrent Neural Networks for Modeling Flexible Robot Dynamics  p. 105
Neural Network Techniques for Robust Force Control of Robot Manipulators  p. 111
Robust Neural Network Control of Rigid-Link Electrically-Driven Robots  p. 117
Control of Unknown Nonlinear Dynamical Systems Using CMAC Neural Networks: Structure, Stability and Passivity  p. 123
Motion Coordination Based on Multiple Performance Criteria with a Hyper-Redundant Serial Robot Example  p. 133
Locating and Identifying Components in a Robot's Workspace Using a Hybrid Computer Architecture  p. 139
Using a Fuzzy Supervisor to Optimize Multiple Criteria in Redundant Robots  p. 145
Solving the Nonlinear Dynamic Control Problem by GA with Structurizing the Search Space  p. 151
A Multisensor Decision Fusion Strategy Using Fuzzy Measure Theory  p. 157
Genetic Design ofComputed-Torque/Fuzzy-Logic Controllers for Robotic Manipulators  p. 165
Hybrid Fuzzy Control Schemes for Robotic Systems  p. 171
An Auto-Tuning Fuzzy Rule-Based Visual Servoing Algorithm for a Slave Arm  p. 177
Evolutionary Learning of Temporal Behavior using Discrete and Fuzzy Classifier Systems  p. 183
Processor Architecture Model for Fuzzy Control  p. 189
Algorithm of Nested Clustering for Unsupervised Learning  p. 197
Multiresolutional Intelligent Controller for Baby Robot  p. 203
A Hierarchical Intelligent Controller for a Three Link Robot Arm  p. 209
Time Delays in Iterative Learning Control Schemes  p. 215
A Learning Approach to High Precision Speed Control of Servo Motors  p. 221

Wavelet Based System Identification for Nonlinear Control Applications

Agent Oriented Robot Task-Transformation

Task and Behavior Formulations for Robotic Rock Excavation

A Virtual Reality Based Interface to a Dynamic Resource Allocation Scheduler

Robust Control with Reduced Knowledge of Unmodeled Dynamics Using Sliding Mode Application to Robot Manipulators

Integrated Motion and Contact Control of Robotic Manipulators

Adaptive Tracking Control of Rigid-Link Electrically-Driven Manipulators

New Stability Results for Direct Adaptive Impedance Control

Fuzzy Marking Petri Nets: Concepts and Definitions

Non-stationary Models of Manufacturing Systems: Relevance and Analysis

Sensor-based Distributed Control Scheme for Mobile Robots

Active Cross-path Correlation for Autonomous Vehicle Path Following

Chromatic Measures for Color Texture Description and Analysis

A Fast and Simple Method to Calibrate Scale Factor Using Telephoto Lens

Fuzzy Logic Controller for Automatic Vision Parameter Adjustment in a Robotic Dish Handling System

Tactile Sensor Pad: Shape Recognition

A Feature-based CAD Representation Enabling Case-Based Planning Across Multiple Manufacturing Applications

System Architecture and Edge Tracking Performance of An Automated Robotic Deburring Workcell

Real-time Tool Wear Estimation Using Recurrent Neural Networks

A Robust Method for Vision-Based Seam Tracking in Robotic Arc Welding

On the Appropriate Uses of Fuzzy Systems: Fuzzy Sliding Mode Position Control of a Switched Reluctance Motor

Fuzzy Logic PID Controller for Missile Terminal Guidance

Hybrid Fuzzy Logic Control to Stabilize an Inverted Pendulum from Arbitrary Initial Conditions

Design and Stability of Self-Organizing Fuzzy Control of High-Order Systems

Adaptive Fuzzy Logic Control Of Discrete-Time Dynamical Systems

A Comparison of Neural Network Controllers for a Mobile Robot with an On-board Manipulator

Some Remarks on Adaptive Neuro-Fuzzy Systems

Control of a Nonholonomic Mobile Robot Using Neural Networks

Stability Analysis for a Class of Neural Networks

Multilayer Neural Network Controller for a Class of Nonlinear Systems
