Foreword
Symposium Chairpersons and Technical Program Committee

Scope and Format
Probabilistic Methods in Life-Cycle Design p. 7
Quantitative Disassembly Evaluation p. 19
Competitive Advantage and The Environment; Building a Framework for Achieving Environmental Advantage p. 31
The Role of the "Product Steward" in Advancing Design for Environment in Hewlett-Packard's Computer Products Organization p. 37
Hewlett-Packard's Self-Assessment Procedure for Product Stewardship p. 42
Design for the Environment: Evaluating Cleaner Technologies in the PWB Industry p. 47
HP Deskjet Printers with Recycled Plastics: A Success Story p. 53
LCI for Automotive Electronic Systems: Substitution Assessment of Ag-Sn for Pb-Sn Solder at Ford Motor Company p. 58
Life Cycle Assessment of Tin-Lead Solder and Silver-Epoxy Conductive Adhesive p. 64
A View of Electronic Products Disposition p. 66
Comparing Different Disassembly Strategies p. 73
A Resource Recovery Model for End-of-Life (EOL) Electronics p. 78
Design for Value Maximization: Putting a Business Lens on Environmental Activities p. 81

The Next Generation of Environmental Management p. 323
The Application of Environmental Design Tools and the Integration of Environmental Values with Business Decisions p. 87
Life Cycle Inventory of PVC: Manufacturing and Fabrication Processes p. 94
Closed Loop Recycling of Magnesium PC Housing p. 102
LCA for Telecommunication Cables p. 109
Plastics Recycling Issues for the Computer Industry - "Progress and Challenges" p. 118
A Pyrolysis-based Technology for Recovering Useful Materials from IC Package Molding Resin Waste p. 124
Life Cycle Analysis of Batteries Using Economic Input-Output Analysis p. 130
Evaluation of Recycling and Disposal Options for Batteries p. 135
Amorphous Silicon Photovoltaic Modules: A Life Cycle Design Case Study p. 141
Applying the DFE Toolkit to an Electronic Switch p. 148
Life Cycle Assessment of an Inkjet Print Cartridge p. 154
Lifecycle Assessment at Xerox p. 161
Performing Design for Environment Concurrent with Interdisciplinary Tradeoff Analysis of Electronic Systems p. 167
Computer Aided Design for Disassembly: A Destructive Approach p. 173
