Electromagnetic Radiation with Wavelength between 10um and 1cm - the Key to Solid State Physics?

Recent Advances in the Performance of GaAs - and InP-Based Two-Terminal Devices as High-Power Millimeter-Wave Sources

Dispersion Characters of Wave Propagation along a Plasma Waveguide in a Finite Magnetic Field

Development of a Test Method for the Odin Satellite 1.1m Antenna at 119 and 500 GHz

MM-Wave High Linear FMCW Generator and Distance Measurement Experiment

Investigation of II-VI Semiconductors through Cyclotron Resonance

Optically Pumped Far-Infrared Laser Miniaturization and Raman Processes Interaction

Recent Development of Vacuum mm Wave Device in P. R. China

Integrated and Active Antennas for System Applications

Field Effect Transistors for Power Applications in Millimeter Wave Range

UC Davis Monolithic Millimeter-Wave and Picosecond Electronic Technology Program

Ka-Band AlGaAs/InGaAs Phemt Monolithic Low-Noise Amplifier

A Gunn Oscillator at 3mm Waveband Phase-Locked with High Tc Josephson Harmonic Mixer and its Applications to Quantum Voltage Standard

W-Band Gunn Second Subharmonically Locked Oscillator

Quasi-Monolithic Ka-Band VCOs Using Pseudomorphic AlGaAs/InGaAs/GaAs HEMTs

Development of GaAs Pseudomorphic HEMTs at W-Bnd

Induced Intracenter Optical Transitions in Compressed p-Ge

The Method of Regularization in Wave Scattering and Propagation Problems

Generalized Capacitance Matrix Method and Optimal Design of Duplexers

Nonlinear Analysis of Synchronized Microwave Oscillator Using Volterra Series

Analysis of Nonlinear Microwave Oscillator with Subharmonically Injected Signal

An Improved Analysis of an Optoelectronic Mixer Based on Metal-Semiconductor-Metal Photodetector

TE-wave Image Reconstruction by Genetic Algorithm

Gaussian Beam Scattering from an Anisotropic Circular Cylinder

Analysis of Propagation Properties in an Over-Mode V-Groove Guide

Analysis of Rectangular-Groove Guide by Using the Method of Lines

The Conically-Shaped Microlens for Achieving a Low Coupling Loss between a Laser Diode and a Single-Mode Fibre

Analysis of Field Pattern of a MMW Focal Plane Array

A Note on the Coupling Efficiency between an Antenna and a Gaussian Beam

Implementation of SQUID Array Local Oscillator into Integrated Circuit for 600 GHz Superconducting Receiver Comprising Log-Periodic Antenna and SIS Mixer

Research on the Front-End Transceiving Components of the 8mm Integrated Communication Receivers

The Study of Millimeter Wave Remote Sensing System in the Application of Reentering Environment

Optical Fibre-Fed Radio System Configurations
Millimeter wave Aperture Coupled Microstrip Patch Antenna Arrays Fed by Dielectric Image Line
A New Type of High Efficiency Gaussian Beam Launcher
Development of a Compact Dual-Frequency SIS Receiver
Australian Millimeter-Wave MMIC Technology for Wideband Telecommunication Systems
Low Noise Nb-SIS Mixers at Far Above the Gap Frequency
Discontinuities in Millimeter Wave Phase Shifter
A Ka Band Compressed Grooved Waveguide Ferrite Phase Shifter
A Novel Waveguide Amplitude Modulator for mm-Wave
Ultrafast Millimeter Wave Amplitude Modulator for Reflectometry of Plasma
Attenuation Characteristics of Coplanar Waveguides
Various Inset Dielectric Guide Structures for Circuit and Antenna Applications
A Low Noise 200GHz Band SIS Mixer for Atmospheric Research
Subharmonic Mixers Simplify High Frequency Designs or Personal Communications System
Millimeter Wave Monolithic Integrated Mixer
Danilation of a Passive Gaseous-Filling Ka Band Dual-Duplexer
Analysis on a New Slow-Wave Structure for Millimeter Wave TWT
Research Progress on Multi-Beam Klystron
Research on Broad-Band High-Gain Klystrons of Megawatt Output Power Level
Installation for Investigation of Electron Beams of Vacuum Electronic Devices of Millimeter-Wave Band
Applications of the Cathode for Millimeter Wave Tubes
Electron Optics in Millimeter TWSTs
Millimeter Wave Circuit Techniques and Technology for Radar and Wireless Communication
A Narrow-Band Waveguide to Microstrip Transition in Ka Band
Millimeter Wave Suspended Stripline Discontinuity Analyzer
Improved Slotted-Filter for Over-Moded Rectangular Waveguide
2.9mm Series Phase Adjustable Connectors
Linear Phase Dual-Mode Dielectric Resonator Filters without Iris
Analysis of a Mode Filter
Millimeter Wave Wideband FET Frequency Divider
W-Band 1/2 Frequency Divider
Dual-Gate FET Millimeter-Wave Frequency Divider
High Power, Coherent InGaAsP/InP Semiconductor Laser Design Operating at 1.55 Microns
Characteristics of the Mini-Optically Pump NH3 FIR Cavity Laser Emission at 67.2um, 90.4um and 151.5um
Study on Spectral Characteristics of AC Stark Splitting Optically Pumped NH3 FIR Laser
Spikes in Raman Spectrum of Optically Pumped NH3 Laser
Laser Aerosol Diagnostics Techniques in a Real Time due to Electromagnetic Response in IR and RF Wave Ranges
Nonlinear Thermal Blooming in Gaseous Medium Radiated by Far Infrared Laser
Frequency Shifting in Absorption Spectra and Dynamic Infrared of Polymer Chains
Solitons in One Dimensional Molecular Chain by Far Infrared Excitation
Hankel Transform Solution for Nonlinear Onsager Potential of Uniformly Flowing Medium Heated by Far Infrared Laser Beam
Non-Contact Measurement of Thermal Conduction by Infrared Radiation Calorimetry
The Microwave Imaging Radiometer Sample and Integration Time
A Error Model of Vision-Based Measurement
The Experimental Research of Millimeter Wave Radiation Effects on the Amount of SOD in Human Blood
Microwave Photoconductivity Spectrometer
High Stable Millimeter-Wave Vector Analyzer
Dielectric Parameters Measurement with Waveguide-Dielectrical Resonator
Low Loss Limits in Materials at the Near Millimeter Range
Measuring Method of Millimeter Wave Coaxial-to-Microstrip Adapter
A Millimeter-Wave Technique for Nondestructive Testing on Nonmetallic Materials
Simulation of Excitation Mechanisms of Oscillation in Diffraction Electronics Devices on Coupled Open Resonators
Excitation of Diffraction-Cerenkov Radiation by the Space Charge Waves of Electron Beam on Metal-Dielectric Periodic Structure
Numerical Modeling of High Harmonic Complexed-Cavity Gyrotron Through Self-Consistent Theory
To the Non-Linear Self-Consistent Theory of the EH-Ubitron Type Three-Waves Parametric Amplifier
Some Nonlinear Features of Gyrotron with AQCORAA
Analysis of Complex Cavities with Abrupt Transitions
A 60 T Nondestructive Pulsed Magnet for "Free Electron Laser for Infrared Experiments" (FELIX)
