Status and Trends in AUV Technology

Tools and Techniques for Deep Water Sediment Sampling around a Ship Wreck

Space Continuous Measurements on Ocean Current and Chemical Properties with the Intelligent Towed Vehicle "Flying Fish"

Design and Testing of an Underwater Microscopy for the Study of Zooplankton Distribution

Experimental Observations of Vertical and Horizontal Distribution of Total Suspended Sediment Using High Frequency Acoustic Backscattering Technique

Shallow-Water Tracking in the Sea of Nazare

A New Algorithm for Multipath Time Delay Estimation in Low SNR Using MLE Method

68 Element Projector-Receiver Array for Parametric Sonar

1000km Square Scale Tomography Experiment in the Kuroshio Extension Area Using 200Hz Ocean Acoustic Tomography System

Effect of a Transition Density Layer on Wave Propagation in a Seismo-Acoustic Ocean Waveguide

Deep Sea Research Effort of Japan Focused on Oceanic Lithosphere Dynamics

Design of a Semi-Autonomous Underwater Vehicle for Intervention Missions (SAUVIM)

ROVs and Undersea Cable Maintenance

Intelligent Control System for 6000m Deep Towed System

The Development of ROVs and Training Experts in the Field of Underwater Robotics in Far-Eastern State Technical University

A Method of Data Analysis Using 200Hz Ocean Acoustic Tomography System

Optimizing the Directivity Diagram of Underwater Acoustic Wide Band Antennas

Design Considerations of Parametric Arrays

An Efficient Sampling Technique of Continuous Distributions for Ring and Elliptical Arrays Synthesis

The Theseus Autonomous Underwater Vehicle - Two Successful Missions

Results of the Naval Oceanographic Office's 1997 AUV Workshop

Towards Environmental Monitoring with the Autosub Autonomous Underwater Vehicle

Design and Construction of Marine Structure in Deep and Rough Seas

A Method to Study Ship's UEF Signatures by Scale-Model Experiment

Acoustic Fields in the Ocean Bottom

An Autonomous Underwater Vehicle as a Student Project

A Plan of Utilization of AUVs in Shallow Water

Underwater Laser Viewing System

Optically-Linked Laser-Interferometric Tiltmeter for Ocean Borehole Observations

Underwater Target's Size/Shape Dynamic Analysis for Fast Target Recognition Using Sonar Images

System Design and Quasi-Sliding Mode Control of an AUV for Ocean Research and Monitoring

On the Prediction of Maneuverability of the Autonomous Underwater Vehicle, AUV-HM1
Autonomous Target Tracking by Underwater Robots Based on Vision p. 191
Autonomous Vehicle Obstacle Detection and Tracking p. 198
A New High Accuracy Super Short Base Line (SSBL) System p. 210
Trends in Undersea Science and Technology in the United States of America p. 219
AUV Obstacle Avoidance and Navigation Using Image Sequences of a Scanning Sonar p. 223
Robust Filtering and Its Application to SINS Alignment p. 228
Navigational Data Fusion in the Ocean Explorer Autonomous Underwater Vehicles p. 233
Estimating the Sea Current and Finding the Optimal Heading of an AUV Through Neural Network Motion Control p. 239
Real-Time Adaptive Array Processing for Underwater Acoustic Channel p. 247
Application of Neural Network for Real-Time Underwater Signal Classification p. 253
Determining Class of Underwater Vehicles in Passive Sonar Using Hidden Markov Model with Hausdorff Similarity Measure p. 258
Target Detection in Airborne Laser Radar Based on Chaos p. 262
Tracking and Classification of Multiple Objects in Multibeam Sector-Scan Sonar Image Sequences p. 269
Automatic Installation of Underwater Elastic Structures under Unknown Currents p. 274
Obstacle Avoidance Using Fuzzy Neural Networks p. 282
Implementation of Adaptive Processing in Integrated Active-Passive Sonars p. 289
Deploying Cylindrical Arrays p. 295
Sub-Pixel Color Edge Detection by Using Binary Quaternion-Moment-Preserving Thresholding Technique p. 299
Shallow Water Bathymetric Data Improvement in Seabeam 2100 Multibeam Systems p. 307
High Accuracy Pressure Instrumentation for Underwater Applications p. 312
The Application of Side-Scan Sonar System in Monitoring Benthic Artificial Reefs Computer Biochemistry and Molecular Technology of the Underwater Biosensor Creation p. 317
Acoustic and Magnetic Probe for Forecast of Atmospheric Storms and Underwater Earthquakes p. 323
Construction of Immersed Tunnel in Osaka Port Measurement of Sea Bed Scour around a Pile-Simplified Instrumentation p. 334
The Development of Underwater Dredging System for Rocky Sea Bottom at Narrow Channel p. 340
Solution of Direct and Inverse Problems of Acoustics in the Sea Wedge p. 346
Liquid-Solid Two-Phase Flow Theory and Its Application Control Performance of Fish Robot with Pectoral Fins in Horizontal Plane p. 357
Subsea Applications of Continuum Robots p. 363
Comprehensive Deep Seafloor Monitoring System in JAMSTEC p. 375
VENUS Project Overview: Multi-Disciplinary Geophysical Measurements at Ocean Bottom Using Demission Submarine Telecommunication Cables p. 383
Acoustical/optical Technology Integration with a Manned Submersible and a ROV for the Investigation of a Radioactive Materials Disposal Site and a Sewage Diffuser Outfall

Experience of the Use of Manned Submersibles in P.P. Shirshov Institute of Oceanology of Russian Academy of Sciences p. 403

Low Power Stirling Engine for Underwater Vehicle Applications p. 411

Diesel Engine Integration into Autonomous Underwater Vehicles p. 417

Autonomous Mobile Periscope System (AMPS) p. 423

The Research on Maneuverability of Underwater Vehicle with Cycloidal Propellers p. 428

The VENUS Project - Instrumentation and Underwater Work System p. 437

A New Approach to Real Time Measurements at the Izu-Bonin Trench Using TPC-1, Demission Telecommunication Cable p. 442

VENUS Project - Submarine Cable Recovery System p. 448

Compensation of Multipath Fading in Underwater Spread-Spectrum Communication Systems p. 453

On the Limit Cycle of the Underwater Vehicle Control System p. 461

A Motion Control and Obstacle Avoidance Algorithm for Hyper-Redundant Manipulators p. 466

Experimental Verification for the Control System of Intelligent Underwater Vehicle p. 472

A Rapid Reconfiguration Strategy for UUV Control p. 478

Evaluation of a Synthetic Aperture Sonar with a Multi-Aperture Transducer p. 487

A Robust Adaptive Beamformer for High-Rate Underwater Acoustic Communication System p. 493

High-Resolution Beamforming by Wigner-Ville Distribution Method p. 499

Chiral Composites as Underwater Acoustic Attenuators p. 504
