Value-Based Power System Reliability Planning p. 1
Stochastic Prediction of Voltage Sags in a Large Transmission System p. 8
Load Transfer Strategies for Machine and Other Inrush Loads p. 19
Static-Digital Overcurrent Relays Permit Enhanced Protection p. 25
The Impact of System Grounding Practices on Generator Fault Damage p. 33
Sequential Tripping of Steam Turbine Generators p. 38
The Arc-Fault Circuit Interrupter, An Emerging Product p. 48
Attributing Harmonics in Private Power Production p. 56
Applicability of Co-generation Equipment as a Source of Standby or Emergency Power p. 62

Deregulation and Opportunities for Industrial Customers p. 69
Using Fixed Gear Mounted Power Quality Monitors to Perform a Power Factor and Harmonic Analysis p. 77
Power Quality Monitoring Enhances Preventive Maintenance Program: Detecting a Substation Transformer Tap Changer Problem p. 82
Effects of Voltage Harmonics on the Electrical and Mechanical Performance of a Three-phase Induction Motor p. 88
Hybrid High-Speed DC Circuit Breaker using a Charge-Storage Diode p. 95
Stray Neutral Problems and Analysis Associated with Multiple ATS Generator Installations p. 100
Ensuring that Electrical Equipment is Safe for its Intended Use p. 119
Neutral Grounding - Nothing New-tral About It p. 127
Sizing of Equipment Grounding Conductors Based on Thermal Damage Curves p. 140
A Detailed Investigation of an Electrical Shock and Burn Injury p. 143
Determination of the Design Parameters of Passive Harmonic Filters Using Nonlinear Optimization p. 155
Short-Circuit Currents to Perform a Protective Device Coordination Study p. 165
A Voltage-Normalized Network Model for Improved Decoupled Power System Calculation p. 172
DC Short-Circuit Analysis for Systems with Static Sources p. 178
Author's Index p. 186
