Characteristics of Users of Medical Innovations

Biomedical Information Technology: From Digital Dawn to NI

Euromed - The final chapter or a new beginning?

WWW Based service for automated interpretation of Diagnostic Images: The AIDI-HEART project

Some methodological issues in telemedicine: systems, modeling and evaluation

Evaluation of telemedical services

3DHeartView: Introducing 3-Dimensional Angiographical Modeling

Decision Trees - a CIM Tool in Nursing Education

The Global Health Network in the 21st Century: “Telehealth, homecare, genetics, counterbioterrorism, security and privacy of information, do we need it and are we ready for it?”

Remote Brain Image Segmentation

Integrating DICOM medical images into Virtual Medical Worlds

Decision Support Systems for Medical Diagnosis

Establishing a Virtual Medical Worlds Community

Healthline: Integrated Information Provision To Telemedicine Networks

Using Web technologies and meta-computing to visualize a simplified simulation model of tumor growth in vitro

Hybrid Signal Processing Technologies for next Generation wireless telemedicine systems

Business aspects of Trusted Third Party services in Europe

DIMEDAS - A web-based cardiology Medical Information System

Multi Modal Presentation in Virtual Telemedical Environments
