Learning Assembly Sequence Plans using Functional Models p. 1
Feature-Based Assembly Model and Multi-Agents System structure for Computer-Aided Assembly p. 8
Construction of the Precedence Graphs Equivalent to a Given Set of Assembly Sequences p. 14
Jacobian-based Modeling of Dispersions Affecting Pre-Defined Functional Requirements of Mechanical Assemblies p. 20
Micropart Feature Design for improving Visually Servoed Assemblability p. 26
Micro-Assembly Planning with van der Waals Force p. 32
Information Models to Support the Interaction between Design for Assembly and Assembly Process Planning p. 39
Assembly Oriented Design p. 45
A Feature-based Framework for Attachment Level Snap-Fastener Design in Product Design for Automated Assembly p. 51
Advancing Design-for-Assembly: The next generation in Assembly Planning p. 57
An Integrative Tool for Manufacturability Analysis of Assemblies p. 63
Application of Screw Theory to Constraint Analysis of Assemblies of Rigid Parts p. 69
Application of Screw Theory to Motion Analysis of Assemblies of Rigid Parts p. 75
Evolutionary Multiple Path Planner for Assembly p. 81
Supervisory Control Technique for Assembly Workstation p. 88
The Testing and Assembly System Design: Process to Select Assembly Plans According to a Testing Strategy p. 94
A Framework for Automating Cost Estimates in Assembly Processes p. 100
A Market Survey of Industrial Requirements for Product Data Management and Manufacturing Planning Systems p. 106
Framework of Design Interface Module in ERP p. 112
A Reference Framework for Life-Cycle Design of Complex Products p. 117
Representation of Product and Process for Planning Disassembly, Shredding and Material Sorting Based on Graphs p. 123
Selective Disassembly: Representation and Comparative Analysis of Wave Propagation Abstraction in Sequence Planning p. 129
Representation of Disassembly Processes in Order to Allow Time Evaluation of Their Performances p. 135
A Self-Connection Approach for Flexible Disassembly p. 141
Optimal Disassembly Sequence Generation for Combined Material Recycling and Part Reuse p. 146
Operation Center Closed Loop Economy - Assembly and Disassembly for Reuse in One Plant p. 152
An Evolutionary Simulated Annealing Algorithm for Optimizing Robotic Task Point Ordering p. 157
A Trajectory Planner for Manipulators using Genetic Algorithms p. 163
Improving the Performance of Compliant Motions by On-Line Geometric Uncertainty Reduction p. 169
A Trajectory Planning Algorithm for Redundant Manipulators p. 175
Optimal Motions of Redundant Manipulators with State Equality Constraints p. 181
A Unified Trajectory Generation Algorithm for Manipulators by Using Uniform B-Spline p. 186
Fourier Analysis of Robot Trajectories in Random Tasks p. 192
Manipulating Deformable Linear Objects - Contact States and Point Contacts p. 198
A Vision Based Error-Corrective Algorithm for Flexible Parts Assembly p. 205
A General Approach for Simulating Robots for Flexible Material Handling p. 211
Control and Planning in Indirect Simultaneous Positioning of Multiple Points on Deformable Objects p. 219
Motion Planning and Design of a Dexterous Gripper - Virtual Gripper and Manipulable Regions p. 226
Mechanical Assembly by a Multi-fingered Robotic Hand with Error Recovery Function p. 232
Performance Analysis and Planning in Graspless Manipulation p. 238
Box Picking-Up with Graspless Manipulation Skill p. 244
An Automatic Programming Tool for Robotic Polishing Tasks p. 250
The Knowledge Representation and Programming for Robotic Assembly Task p. 256
An Efficient Image Processing Algorithm for High-Level Skill Acquisition p. 262
A New Approach for the Position and Orientation Calibration of Robots p. 268
Real-Time Obstacle Avoidance and Motion Coordination in a Multi-Robot Workcell p. 274
Placing a Robot Manipulator Amid Obstacles for Optimized Execution p. 280
Determining Near Optimal Interence-Free Polyhedral Configurations for Stacking p. 286
Failure Recovery Planning in Assembly based on Acquired Experience: Learning by Analogy p. 294
A Hybrid Systems Approach to Force-Guided Robotic Assemblies p. 301
Using Hybrid cc to Simulate Multi-tier Peg-in-hole Problems p. 307
A Study on the CAD/CAM System of Transfer Die for Deep Drawing Process p. 313
Capturing the Assembly Process Planning Rationale within an Aerospace Industry p. 319
CEPP - Conversion and Execution of Process Plans p. 325
Process and Execution Planning for Manufacturing Systems p. 332
Process Planning using a Genetic Algorithm Approach p. 338
Fast Bending Sequence Planning for Progressive Press-Working p. 344
Toward Adaptive Assembly Sequence Planner p. 350
Modeling and Solving the SALB-E Problem p. 356
A Procedure to Solve the CORV Problem p. 361
Constraints Programming approach to solve Facility Layout Design Problems p. 368
Hierarchical Constraint Satisfaction for High-Level Dimensional Inspection Planning p. 374
A New Philosophy for the Design of a Product and its Assembly Line p. 381
A Pragmatic Approach for Precedence Graph Generation p. 387
Selection of Assembly Models and Techniques in the CISAL Project p. 393
Applying the Equal Piles Problem to Balance Assembly Lines p. 399
Meta-Heuristics for the Single-Machine Scheduling Total Weighted Tardiness Problem p. 405
Application of Genetic Algorithms to Assembly Sequence Planning with limited resources p. 411
Dynamic Scheduling of Manufacturing Orders: A Decision Support System Approach p. 417
Decision Support System for Dynamic Production Scheduling p. 424
A Modular Tool for FMS Scheduling p. 430
Distributed Task Scheduling p. 436
Infrastructures and Scheduling Method for Holonic Manufacturing Systems p. 442
Assembly Line Balancing with Work Zone and Station Load Time Windows Contraints p. 448
Sequence Evaluation and Personnel Planning with HoME p. 454
Multi-Agent Simulation for Balancing Assembly Lines p. 459
Author Index p. 465
