Convergence of residential gateway technology: analysis of evolutionary paths

Resource management and scheduling for the QoS-capable home network wireless access point

802.11 over coax - a hybrid coax-wireless home network using 802.11 technology

QoS technology for home networks

Modeling the indoor power line channel: new results and modem design considerations

Zero-padded OFDM with improved performance over multipath channels

Distributed access control for consumer operated mobile ad hoc networks

ISP-operated protection of home networks with FIDRAN

A key-distribution scheme for wireless home automation networks

Improving the security of wireless LANs by managing 802.1x disassociation

Bluetooth scatternet formation: criteria, models, and classification

Using Piconet avoidance techniques to reduce interference in Bluetooth networks

On the optimal clustering in mobile ad hoc networks

A remotely controlled Bluetooth enabled environment

Route update and repair in wireless sensor networks

In-building communication using massively distributed wireless microdevice network

Routing protocols for sensor networks

Router selection for moving networks

An analytical framework for EDF schedulers based on the dominant time scale

A new priority calculation method for sorted-priority fair queuing

The performance of system handover scheme with permission probability control

Packet fair queuing algorithms for wireless networks with link level retransmission

Simple VBR staircase broadcasting (SVSB)

A border-aware broadcast scheme for wireless ad hoc network

Scheme for scalable ALM architecture based on topology-awareness

ReMHoc: a reliable multicast protocol for wireless mobile multihop ad hoc networks

Improving the performance of overlay multicast with dynamic adaptation

Tree-varying multicast on an overlay network of unreliable end hosts

Analysis on binary loss tree classification with hop count for multicast topology discovery

Streaming H.264/AVC video over the internet

Enhanced TCP performance over mobile IPv6: innovative fragmentation avoidance and adaptive routing techniques

TCP-friendly streaming in next generation wireless networks

Foundations of convergence in IP packet networks

Fast IPv4/IPv4 address acquisition in wireless LANs

A QoS scheduler for IEEE 802.11e WLANs

Supporting real-time traffic with QoS in IEEE 802.11e based home networks
A traffic behavior-aware fair call admission control for heterogeneous services in wireless networks p. 210

UTRAN traffic parameters estimation p. 216

Resource management employing pseudo-delay for IP networks p. 222

Enhanced robust wireless network QoS control applying adaptive modulation and macroscopic diversity combining techniques p. 228

A transparent QoS mechanism to support IntServ/DiffServ networks p. 233

Ltest - a tool for distributed network performance measurement p. 239

Video and audio trace files of pre-encoded video content for network performance measurements p. 245

A scheme for the dynamic formation of robust multipoint to point LSPs p. 251

Improving the performance of TCP in structure-less networks with virtual infrastructures p. 256

VDSL access system based on rate-adaptive optical sub-carrier multiplexing p. 262

Quality and reliability of GPRS connections p. 268

Consumer communications in the next generation access network p. 273

Tracking agent based paging for wireless LANs p. 279

AGP : a self-adaptive MAC protocol for broadcast LANs with bursty traffic p. 285

Quality of service MAC protocol for shared media in-house networks p. 289

A media access control method for high-speed power line communication system modems p. 295

A collision free MAC protocol using smart antenna in ad hoc networks p. 301

Phase reversion to reduce power spectral density of multi-band UWB signals p. 307

A simple and accurate mathematical model of electronically steerable parasitic array radiator antennas p. 312

Development of audio and video synchronous transmission system based on IEEE 802.11a p. 316

Robust and adaptive transmission of compressed video streams over EGPRS p. 320

A multimodal, networked dialogue system for access to entertainment p. 325

Robust speech dialog interface for car telematics services p. 331

Classification of video shots using activity power flow p. 336

The war of presence and instant messaging : right protocols and APIs p. 341

Comparing STORM and matched filtering for part 15 indoor multi-path communication channels p. 347

An adaptive subchannel allocation algorithm for OFDM-based wireless home networks p. 352

High-rate LDPC codes in image transmission over Raleigh fading channel p. 357

New research on unequal error protection (UEP) property of irregular LDPC codes p. 361

Applicability of low water-mark mandatory access control security in Linux-based advanced networked consumer electronics p. 364

Design and implementation of a Jini-J2EE bridge to enable access to enterprise services p. 370

Speech technology for multimedia content management p. 376

A relative time model in a distributed network using exchanged time information p. 382
Scaling real-time telematics applications using programmable middleboxes: a case study in traffic prediction

An OSGi implementation and experience report

Experimental bridge LonWorks/UPnP 1.0

An adaptive communication middleware for network service coordination

Joint content authentication and error control for wireless multimedia communications

A low-power motion capture system with integrated accelerometers

DRM renewability and interoperability

On the design of 2-D Gabor filtering of fingerprint images

Dynamic multimedia adaptation and updating of media streams with MPEG-21

An efficient error detection technique for MPEG-4 video streams

Discrete interactive staggered broadcasting

A SIP-based device communication service for OSGi framework

A framework for modeling emerging multimedia applications

Evaluation of a speech translation system for travel conversation installed in PDA

Design and networking considerations for FACE

Tracking-needless grouping: an efficient and scalable grouping scheme in networked virtual environments

Viewing characteristics based personalized ad streaming in an interactive TV environment

Characterization of data on the Gnutella peer-to-peer network

Architecture for secure work of dynamic distributed groups

System-on-chip design for TV-centric home networks

Consumer electronics industry standards for in-home entertainment networking and device connectivity

UVa Bus.NET: enhancing user experiences on smart devices through context-aware computing

Selective encryption for consumer applications

Audio-text synchronization inside MP3 files: a new approach and its implementation

Architecture for presentation coordination under a multiple device environment

A fuzzy approach to video transmission over Bluetooth ACL links

The architecture of a novel tool for network management using GSM/GPRS mobile devices

Bringing confidence to the Web - combining the power of SET and reputation systems

Humanoid agent for communication and entertainment driven by emotion and "KANSEI" in embedded system

Strifeshadow fantasy: a massive multi-player online game

DataPhone: an intelligent phone for data conferencing

5GHz W-LAN verification for public mobile applications

WiVision: a wireless video system for real-time distribution and on-demand playback
A wireless-based virtual salesman system p. 581
A wireless software architecture for fast 3D rendering of agent-based multimedia simulations on portable devices p. 589
Enhanced cell ID based terminal location for urban area location based applications p. 595
Using wireless networks to enhance narrowcasting in public spaces p. 600
Smart companion p. 605
A hybrid operating model for wireless hotspot businesses p. 611
A web-based home welfare and care services request system using a pen type image sensor p. 616
A service-oriented wireless home network p. 618
A novel motion vector recovery algorithm for error concealment in video transmission p. 621
Convergence of iDTV and home network platforms p. 624
A dynamically adapted retrieval algorithm for multi-instance image query with heterogeneous features p. 627
Communicating personal gadgets p. 630
A policy engine for the OCAP monitor application p. 633
Enhancing UPnP discovery with liveness p. 636
Power line communication using timed transmission p. 639
MSB modulation doubles cable TV and FM-SCA capacity p. 642
Evaluation of software techniques for parallel packet processing on multi-core processors p. 645
Message-initiated constraint-based routing for wireless ad hoc sensor networks p. 648
Transmission characteristics of a twisted-pair cable for broadband communications p. 651
MoDPAI : an intelligent network devices management tool p. 654
Issues in H.264/MPEG-2 video transcoding p. 657
A remote controlled wireless enabled environment p. 660
Voice technologies for telephony services p. 662
Routing in telecommunication network with controlled ant population p. 665
The power of ruling the future home network p. 668
Port randomized VPN by mobile codes p. 671
Method of contents cache control in a BML/HTML integrated browser p. 674
Development of an ISDB-T "front-end" module for use in handheld terminals p. 676
Reactance diversity : proof-of-concept experiments in an indoor multipath-fading environment with a 5-GHz prototype planar Espar antenna p. 678
A value transfer solution for Bluetooth mobile gaming p. 681
Novel applications for 802.11 x enabled wireless networked home p. 684
SIMKEYS : an efficient approach in text entry for mobile communications p. 687
Functional coexistence of many wireless clients p. 690
Unconfined mobile bluetooth nursing and daily data collection p. 693
A paper-digital agenda p. 697
Performance of a multi-band ultra-wideband system over indoor wireless channels p. 700
Scalable and reconfigurable optical IP network system for use in residential premises, based on CWDM technologies and layer-3 switching  
An energy-based fingerprint matching system  
Automatic image cropping for mobile device with built-in camera  
High-performance home entertainment networking with IEEE 802.11  
A novel application for wireless communications in vehicle early warning  
A simple cascade carrier frequency and sampling clock offsets estimation method for OFDM systems  
Context-aware and adaptive universal home network middleware for pervasive digital home environment
