Moore's law and the VR experience

A robust hybrid tracking system for outdoor augmented reality p. 3
Integrated head and hand tracking for indoor and outdoor augmented reality p. 11
Tracker calibration using tetrahedral mesh and tricubic spline models of warp p. 19
Increasing the effective egocentric field of view with proprioceptive and tactile feedback p. 27
Resolving object references in multimodal dialogues for immersive virtual environments p. 35
Projection-based olfactory display with nose tracking p. 43
Food simulator: a haptic interface for biting p. 51
TWISTER: an immersive autostereoscopic display p. 59
OmniStereo for panoramic virtual environment display systems p. 67
A modular system for collaborative desktop VR/AR with a shared workspace p. 75
Improving collision detection in distributed virtual environments by adaptive collision prediction tracking p. 83
Real-time streaming of point-based 3D video p. 91
Adaptive scene synchronization for virtual and mixed reality environments p. 99
Simulated training in the military: where can we go from here? p. 107
VRML scene graphs on an interactive ray tracing engine p. 109
Interactive and continuous collision detection for avatars in virtual environments p. 117

The mobile animator: interactive character animation in collaborative virtual environments p. 125
A simplification architecture for exploring navigation tradeoffs in mobile VR p. 133
The effect of environment characteristics and user interaction on levels of virtual environment sickness p. 141
Effects of travel technique on cognition in virtual environments p. 149
Immersive well-path editing: investigating the added value of immersion p. 157
Virtual leading blocks for the deaf-blind: a real-time way-finder by verbal-nonverbal hybrid interface and high-density RFID tag space p. 165
Navigation with place representations and visible landmarks p. 173
Testbed evaluation of navigation and text display techniques in an information-rich virtual environment p. 181
Teaching virtual reality: when and how? p. 189
Automated creation of movie summaries in interactive virtual environments p. 191
Pre-surgical cranial implant design using the PARIS prototype p. 199
Affective property evaluation of virtual product designs p. 207
The application of virtual reality to (chemical engineering) education p. 217
Efficient, intuitive user interfaces for classroom-based immersive virtual environments p. 219
Texture overlay onto deformable surface using HMD p. 221
Projector-based dual resolution stereoscopic display p. 223
Creating VR scenes using automatically derived motion vectors p. 225
Relationship between network latency and information quality in a synchronized distributed virtual environment p. 227
