</table>
On Internet-based control system design with clock synchronization p. 198
Control of a 3-DOF parallel wire driven stiffness-variable manipulator p. 204
The system of radioactive isotope automatic diluting and dividing p. 210
An adaptive fuzzy approach for robot motion control p. 216
Software evolution of robot control based on OSGi p. 227
Proposal of a rescue robot system in nuclear-power plants - rescue activity via small vehicle robots - p. 227
A novel teleoperation method for a mobile robot using real image data records p. 233
A combined navigation strategy by a steering wheel and a mouse for a tank type rescue robot p. 239
Common frameworks of networking and information-sharing for advanced rescue systems p. 245
Collective decision making : a biologically inspired approach to making up all of your minds p. 250
On optimality of human arm movements p. 256
Feedback-error learning for explicit force control of a robot manipulator interacting with unknown dynamic environment p. 262
Omni-directional walking of a quadruped robot on a slope p. 268
Design, fabrication and performances of a biomimetic robotic earthworm p. 274
Research on vacuum micro-gripper of intelligent micromanipulation robots p. 279
Integrated microfluidic systems for DNA analysis p. 284
Stress-induced bending of micromachined bilayer cantilever and its optical application p. 290
Displacement calibration of the micro robotic gripper for the manipulation of biological cells p. 296
Digitally controllable large-scale integrated microfluidic systems p. 301
Towards multirobot communication p. 307
Virtual robot simulation and monitoring system based on Java3D p. 313
Safety in multi-robot teleoperation system through Internet p. 318
A study of haptic representation of virtual plain wall p. 323
The design and development of simulator system - for manned submersible vehicle p. 328
Research of path planning for polishing robot based on improved genetic algorithm p. 334
Discrete trajectory tracking control of wheeled mobile robot p. 344
Motion planning for mobile manipulator to pick up an object while base robot's moving p. 350
Evolutionary parameters optimization for an hybrid control architecture of multicriteria tasks p. 356
Time periodical adaptive friction compensation p. 362
Training sample selection in learning control p. 368
Human-inspired robot control - examples in robotic batting p. 374
Unicycle-like vehicle parking via receding horizon control p. 379
A review of bilateral sampled-data control of teleoperators p. 385
Study on a kind of wall cleaning robot p. 391
Realization of a service climbing robot for glass-wall cleaning p. 395
Research on the ocean environment implementation methods for digital AUV platform p. 401
Object recognition and self-localization for interactive soccer robots p. 407
Real-time vision-based gesture recognition for human robot interaction p. 413
Object stepping-on/down feasibility of humanoid robots p. 419
Biped walking with variable ZMP, frictional constraint, and inverted pendulum model p. 425
Gecko inspired surface climbing robots p. 431
Development of modular combinational gorilla robot system p. 437
From human to pushing leader robot : leading a decentralized multirobot system for object handling p. 441
A biomimetic flying silicon microchip : feasibility study p. 447
Haptic sensing and modeling of nanomanipulation with an AFM p. 452
Inchworm-like microrobot for capsule endoscope p. 458
ICPF actuator-based novel type of underwater micro biped robot with multi DOF p. 464
Structural and thermal analysis of a thermally actuated polymer micro robotic gripper p. 470
Design of chemo-mechanical actuator using self-oscillating gel p. 474
A distributed protocol for multi-hop underwater robot positioning p. 480
A navigation robot with reconfigurable chassis and bionic wheel p. 485
Modularization of miniature tracked reconnaissance robot p. 490
A new type of screw rotary actuator of robot p. 495
Research on motion control of nonholonomic manipulator base on trigonometric function inputs p. 499
Adaptive teleoperation depends on operation skill-architecture design for flexible platform- p. 505
Design for physical structure of tractor-trailer mobile robot p. 511
Manipulation of a circular object in a horizontal plane by two finger robots p. 517
A model free synchronization approach to controls of parallel manipulators p. 523
Key techniques in robocup middle-sized soccer research p. 529
An approach of color object searching for vision system of soccer robot p. 535
Sensor planning for mobile robot localization - a hierarchical approach using Bayesian network and particle filter- p. 540
Integrated optimization of trajectory planning for robot manipulators based on intensified evolutionary programming p. 546
Place energy and forget in maps for mobile robots p. 552
Graph-based automatic consistent image mosaicking p. 558
Remote sensing image data fusion based on IHS and local deviation of wavelet transformation p. 564
A hybrid stereo matching algorithm using wavelet modulus maxima based on feature and area process p. 569
An approach for wavelet based image enhancement p. 574
A new approach to visual servoing in uncalibrated environments p. 578
Environment-adaptable locomotion of a snake-like robot p. 584
Twist-related locomotion of a 3D snake-like robot p. 589
Head-raising motion of snake-like robots p. 595
A snake robot using shape memory alloys p. 601
Walking control of quasi passive dynamic walking robot "quartet III" based on continuous delayed feedback control p. 606
Development of nano order manipulator system based on 3-PPR planar parallel mechanism p. 612
Three-layered control architecture for microassembly with human-robot task plan interaction p. 617
A nanomanipulation system based on sample-scanning AFM p. 623
Extracting depth information from microscopic image of micro manipulator p. 629
Towards batch fabrication of carbon nanotube sensors by combining microinjection and dielectrophoretic manipulation p. 634
Structure types design and genetic algorithm dimension synthesis of a CPM machine for injured fingers p. 640
Design and implementation of humanoid robot controller based on CAN p. 645
The architecture design of the multirobot team formation p. 649
Research on leg-wheel hybrid stair climbing robot, zero carrier p. 654
Mechanical design and dynamic analysis of planetary rover p. 660
Study on boundary creation and identification and localization error correction for outdoor area-covering mobile robots p. 665
Collision-free path planning for mobile robot using cubic spiral p. 671
A simple yet efficient dynamic system for robot path planning p. 677
Mobile robot path planning based on BIPF in unknown environments p. 683
Improved artificial potential field for unknown narrow environments p. 688
Kalman filter for 3D motion estimation via lagrange interpolation and numerical integration p. 693
Stereo-based head pose tracking with motion compensation model p. 700
Underwater robot localization using artificial visual landmarks p. 705
Image-based localization and pose recovery using scale invariant features p. 711
Collective sorting with multiple robots p. 716
Robust detection for the weld seam shaped zigzag line p. 721
Image processing and visual control method for arc welding robot p. 727
A high-accuracy algorithm for computing fundamental matrix p. 733
Detection of specular highlights in color images using a new color space transformation p. 737
Infrared image segmentation via fast fuzzy c-means with spatial information p. 742
Modified particle swarm algorithm for decentralized swarm agents p. 746
Online trajectory generation based on off-line trajectory for biped humanoid p. 752
Development of the humanoid head portrait robot system with flexible face and expression p. 757
Moving objects detection by imitating biologic vision based on fly's eyes p. 763
A knowledge based genetic algorithm for path planning in unstructured mobile robot environments p. 767
A resource allocation algorithm for multiple tasks of RoboFlag environment p. 773
An adaptive hybrid wavelet neural network and its application p. 779
Research on creating environment model for mobile robot using improved ART-2 neural network p. 785
Implementation of a PC-based robot controller with open architecture p. 790
Control of a new type of direct drive piezoelectric servo valve p. 795
Acquisition and analysis of drivers' action intelligence p. 799
SVM based human control learning for ALV p. 803
