Contributing Authors
Preface
Acknowledgments

Demographic and Clinical Predictors of One-Year Outcome in Patients with Left Ventricular Dysfunction and/or Congestive Heart Failure: Results from the Studies of Left Ventricular Dysfunction Registry p. 1

Atrial Fibrillation and Congestive Heart Failure p. 11

Sudden Death and Arrhythmias Complicating Heart Failure p. 33

Coronary Heart Disease, Heart Failure, and Angiotensin-Converting Enzyme Inhibitors: Insights for Primary Prevention p. 43

Postinfarcted Heart Failure Is Weakened by Supplementation of Eicosapentaenoic Acid p. 49

Diastolic Dysfunction in Stunning: Its Prevention p. 67

Diastolic Dysfunction: Pathophysiology and Treatment Options p. 79

Cytoplasmic Calcium and Diastolic Dysfunction: Cardiac Hypertrophy and Failure p. 95

Molecular Signaling in Cardiac Myofilaments p. 109

Skeletal Muscle Metabolic Alterations in Heart Failure p. 115

Respiratory Sleep Disorders in Patients with Chronic Heart Failure p. 123

Cardiac Contractile Failure and Ultrastructural Abnormalities during the Development of Diabetic Cardiomyopathy p. 131

Structural Remodeling of the Myocardium in Ischemic and Hypertensive Heart Disease p. 163

Structural Basis and Consequences of Ventricular Remodeling following Acute Myocardial Infarction p. 187

Prevention and Reversal of Ventricular Remodeling: Experimental and Clinical Observations p. 193

Implications of Cardiomyocyte Remodeling in Heart Dysfunction p. 197

Structural and Functional Consequences of Angiotensin-Converting Enzyme Inhibition and Angiotensin Type 1 Receptor Inhibition following Myocardial Infarction in Rats p. 207

Remodeling of Cardiac Membranes during the Development of Congestive Heart Failure Due to Myocardial Infarction p. 217

Modification of Left Ventricular Remodeling After Myocardial Infarction p. 231

Pharmacologic Interventions in Experimental Remodeling: Angiotensin-Converting Enzyme Inhibitors and Angiotensin II Subtype I Receptor Blockers p. 247

Angiotensin II Receptor Blockade E-4177 Induces Regression of Pressure-Overload Left Ventricular Hypertrophy p. 253

The Renin-Angiotensin System and Angiotensin-Converting Enzyme Inhibitors in Heart Failure p. 263

Biochemistry, Molecular Biology, and Potential Roles of the Cardiac Renin-Angiotensin System p. 275

The Functional Role of Angiotensin and Endothelin in Failing and Nonfailing Human Myocardium p. 295

Renin-Angiotensin System and Volume Overload-Induced Cardiac Remodeling p. 305

Role of Angiotensin Receptors in the Regulation of Vascular Growth p. 327

Treatment of Symptomatic Heart Failure p. 337

Clinical Implications of Inotropic Agents in Heart Failure p. 355
Subcellular Mechanism of Action of a Novel Cardiotonic Quinolinone Derivative p. 361
OPC-18790 in Mammalian Cardiac Muscle: Selective Inhibition of Isozymes of Phosphodiesterase
and Contractile Regulation

A New Adjunctive Treatment of Chronic Heart Failure Employing a Calcium Sensitizer p. 377

Effects of an Endogenous Inotropic Factor in Low-Flow Ischemia p. 389

Cholesterol-Lowering Therapy for Reduction of Myocardial Infarction and Prevention
of Heart Failure

Effect of Proprionyl-L-Carnitine on Heart and Skeletal Muscle Metabolism During
Congestive Heart Failure

Effects of Vitamin E on the Cardiac Function and Contractility in Chronic
Volume-Overload Heart Failure

Protective Effect of Taurine on the Failing Heart and Its Possible Mechanism of Action p. 421

Acute Effects of Thyroid Hormone on the Heart and Cardiovascular System p. 433

Implantable Defibrillators in the Management of Malignant Ventricular Arrhythmias
in Patients with Left Ventricular Dysfunction

Biomechanical Cardiac Assist for Heart Failure p. 451

Heart Preservation: Magnetic Resonance Studies of Cardiac Energetics and Ion
Homeostasis

Subject Index p. 489
