History, Ontogeny, and Anatomy
The Heritage of the Thyroid
Normal Development of the Hypothalamic-Pituitary-Thyroid Axis
Comparative Anatomy and Physiology
Anatomy and Pathology of the Thyrotrophs
Hormone Synthesis and Secretion
Hormone Synthesis: Thyroid Iodine Metabolism
Release and Secretion of Thyroid Hormone
Thyroglobulin: Chemistry and Biosynthesis
Peripheral Hormone Metabolism
Thyroid Hormone Transport Proteins and the Physiology of Hormone Binding
Nature, Source, and Relative Significance of Circulating Thyroid Hormones
Intracellular Pathways of Iodothyronine Metabolism
Thyroid Hormone Action
The Molecular Basis of Thyroid Hormone Actions
Thyroid Hormone Structure-Function Relationships
Factors That Control Thyroid Function
Chemistry and Biosynthesis of Thyrotropin
Mechanism of Action of Thyrotropin and Other Thyroid Growth Factors
Regulation of Thyrotropin Secretion
Autoregulation: Effects of Iodide
Autonomic Nervous Control: Adrenergic, Cholinergic, and Peptidergic Regulation
Age and Physiologic Variables
Environmental Influences on Thyroid Hormone Regulation
Antithyroid Compounds
Effects of Pharmacologic Agents on Thyroid Hormone Homeostasis
Nonthyroidal Illnesses
Iodine Deficiency
Effect of Excess Iodide: Clinical Aspects
Radioisotopes and Direct Tests of Thyroid Function
Radiation Physics
Biologic Effects of Radioiodines on the Human Thyroid Gland
In Vivo Isotopic Tests and Imaging
Serum Thyrotropin and Thyroid Hormone Measurements and Assessment of Thyroid Hormone Transport
Miscellaneous Tests
Metabolic, Physiologic, and Clinical Indexes of Thyroid Function
Thyroglobulin
Antibodies in Autoimmune Thyroid Disease
Non-isotopic Techniques for Imaging the Thyroid
Evaluation of Thyroid Nodules by Needle Biopsy
Surgical Anatomy

Endemic Cretinism p. 756
Other Forms of Primary Hypothyroidism p. 768
Central Hypothyroidism p. 779
Organ System Manifestations of Hypothyroidism p. 792
The Skin in Hypothyroidism p. 792
Connective Tissue in Hypothyroidism p. 796
The Cardiovascular System in Hypothyroidism p. 799
The Respiratory System in Hypothyroidism p. 805
The Kidneys and Electrolyte Metabolism in Hypothyroidism p. 812
The Gastrointestinal Tract and Liver in Hypothyroidism p. 816
The Blood in Hypothyroidism p. 821
The Neuromuscular System and Brain in Hypothyroidism p. 826
The Pituitary in Hypothyroidism p. 836
The Adrenal Cortex in Hypothyroidism p. 841
Catecholamines and the Sympathoadrenal System in Hypothyroidism p. 845
The Male and Female Reproductive Systems in Hypothyroidism p. 849
The Skeletal System in Hypothyroidism p. 853
Metabolic Changes in Hypothyroidism p. 858
Vitamin Metabolism in Hypothyroidism p. 863
Behavioral and Psychiatric Aspects of Hypothyroidism p. 866
Myxedema Coma p. 871
Management of Hypothyroidism p. 878
Diagnosis of Hypothyroidism p. 878
Treatment of Hypothyroidism p. 883
Pathogenesis of Nontoxic Diffuse and Nodular Goiter p. 890
Clinical Manifestations and Management of Nontoxic Diffuse and Nodular Goiter p. 896
Pathogenesis p. 902
Molecular Pathogenesis p. 909
Surgical Therapy p. 916
Radiiodine and Other Treatments and Outcomes p. 922
Medullary Thyroid Carcinoma p. 946
Miscellaneous Tumors of the Thyroid p. 961
Clinical Evaluation of Solitary Thyroid Nodules p. 966
Thyroid Physiology in the Perinatal Period and During Childhood p. 974
Neonatal Screening for Hypothyroidism p. 984
Congenital Hypothyroidism p. 988
Acquired Hypothyroidism During Infancy, Childhood, and Adolescence p. 994
Graves’ Disease in the Neonatal Period and Childhood p. 1000
Subclinical Hypothyroidism p. 1010
Subclinical Thyrotoxicosis p. 1016
Thyroid Disease During and After Pregnancy p. 1021
