

Model-Centered World Wide Web Coach	p. 1
Technology Potential and Limitations in a Virtual Design Studio	p. 8
Global Project Documentation and Communications Using HTML on the World Wide Web	p. 15
User Models in Search and Navigation Systems on the Internet	p. 21
Construction Project Control Through Risk Management	p. 28
A New Model of Risk Allocation for Construction Contracts Based on Fair Liabilities between Parties	p. 35
Risk Management for Response Planning	p. 42
3-D Graphical Simulation for Temporary Facility Planning using Object-Oriented Building Product Model	p. 49
Practical Geoenvironmental Visualization	p. 56
Virtual Reality Modeling for Bridge Construction	p. 63
Knowledge-Based Parametric Design using JSpace	p. 70
Co-Evolution of Design Specifications and Design Solution	p. 77
Evolving Design Genes as well as Design Solutions	p. 84
Single-Criteria Genetic Optimization for Design and Detailing of Concrete Structures	p. 91
Optimization of Graphical Models	p. 97
Collecting, Abstracting, and Compiling Review Comments: the Reviewer's Assistant and the Lessons-Learned Generator	p. 104
Towards Lessons-Learned Systems in the U.S. Army, Corps of Engineers	p. 112
An Automated Design and Review Assistant: SEDAR	p. 118
Multi-Site Cross-Disciplinary A/E/C Project Based Learning	p. 126
ICeD: An Interdisciplinary Conceptual Design Environment	p. 133
Computer-Based Undergraduate Integrated Civil Engineering Curricula at WPI	p. 140
Prefabricated Concrete Walls: Influence of Prestressload on Vertical Joints	p. 147
Calculation of Stress Intensity Factors Using Finite Elements and the Compliance Approach	p. 154
A System for the Institution of Effective Repairs to Concrete Structures	p. 160
Historical Perspective of Spatial Flow Data Visualization Techniques in GIS	p. 167
GIS-T Design for ITS Applications	p. 174
DBMS Implementation of a Linear Referencing Model	p. 179
Theoretical Foundations for Computer-Supported Negotiation	p. 186
Real Time Planning and Total Risk Management	p. 193
A Multi-Agent Architecture for Foundation Design Environments	p. 200
Integrated Infrastructure Maintenance Management	p. 207
Application of Artificial Neural Network to Guideway Demand Modeling	p. 214
Estimating Trenching Productivity Using Neural Networks	p. 220
Neural Networks for the Identification and Control of Quantity Variance in Construction Projects	p. 227
Solving Mathematical Programming Problems Using Genetic Algorithms	p. 233
Construction Planning through Multi-Agent Constraint Satisfaction	p. 240
A Knowledge Based Construction Contractor Proposal Evaluation System	p. 247

Parametric Estimating: An Object-Oriented Approach	p. 254
Automated Generation of Productivity Functions	p. 261
The Virtual Design Team (VDT): Concurrent Design of Facility Products, Processes and Organizations	p. 268
A Computational Organizational Approach to Modeling an Engineering Design Team	p. 275
Approaches to Simulating Organizational Behavior of Concurrent Design Teams	p. 281
Implementing the Knowledge of Worker System (KWS) in an Engineering Environment	p. 288
Design Case Adaptation Using Genetic Algorithms	p. 294
Integration of Generic Knowledge and Cases in DOM	p. 301
Structuring Cases in a Case-Based Design Aid	p. 308
Reasoning about Cases with Diagrams	p. 314
A Domain Specific Equation Solver for Bridge Analysis	p. 321
Alternative Wastewater Pumping Station Design Considerations	p. 328
Preliminary Design of 2-Story Buildings Using a Hybrid System	p. 335
WWW and Multimedia in Undergraduate Civil Engineering	p. 341
CELL - A Vertically Integrated Learning Resource	p. 348
Harnessing the Internet for Civil Engineering Course Delivery	p. 355
Trial Applications of Multimedia Instructional Aids in a Building Construction Curriculum	p. 362
A Fuzzy Paradigm for Fault Trees and Event Trees in Risk Assessment	p. 369
Use of Fuzzy Logic and Similarity Measures in the Risk Management of Hazardous Waste Sites	p. 376
Interactive 4D-CAD	p. 383
3D and 4D CAD Modeling on Commercial Design-Build Projects	p. 390
ACPSS - Animated Construction Process Simulation System	p. 397
Graphical Simulation for Project Planning: 4D-Planner	p. 404
An Integrated Intelligent Planning Approach for Modular Construction	p. 410
A Hybrid Approach to Integration in Construction	p. 417
A Software Architecture for Concurrent Lifecycle Design and Construction	p. 424
A Conceptual Model for Construction Clients' Requirements Processing	p. 431
Data Exchange: File Transfer, Transaction Processing and Application Interoperability	p. 438
STEP and the Building Construction Core Model	p. 445
Managing Interdisciplinary Project Teams Through the Web	p. 452
Facilitating Workgroup Activities through the Internet	p. 459
A Distributed Engineering Problem Generator	p. 466
Florida Department of Transportation's MastArm Program - Placing the Engineer in Control	p. 473
Finite Element Transient Analysis (FETA) of Solids and Structures Including Soil-Fluid-Structure Interaction	p. 480
Automation-Related Quality Improvements in Power Plant Design and Operation	p. 487
The Next Generation of Structural Engineering Automation Systems	p. 494
GIS and CAD-based Design Software in CE Education	p. 501

Integrated GIS Based Watershed Management Modeling System	p. 508
Extracting Watershed Characteristics from Spatial Digital Data Using GIS, A Case Study of the Great Miami River Basin	p. 515
Domain Modeling in Generic Parametric Architectures: Issues in Concurrent Representation and Inference	p. 522
An Agent-Supported Framework for Collaborative Design	p. 529
A Data Management Model for Change Control in Collaborative Design Environments	p. 536
Computational Support for Distributed and Concurrent Design Team	p. 544
Construction Regulated by Performance Information	p. 551
Constraint Based Reasoning Using Grobner Bases	p. 559
Uncertainty Modeling for Preliminary Design of Structures	p. 565
Project Modeling in Construction Applications	p. 572
Translation Methods for Integrated Building Engineering	p. 579
A Knowledge Based Information Model for Components in the Process Industry	p. 586
A Multi-media Information System for Construction Delay Management	p. 593
A Multimedia Expert System for Slurry Wall Construction	p. 600
Multimedia Data Management in a Highway Information System	p. 607
Information Technology for Better Management of Change, Cost and Schedule in Construction Projects	p. 613
Animation of Complex Construction Simulation Models	p. 620
Using CPM-Chart Animation to Illustrate the Evolution of Schedules	p. 627
Process Models in Enterprise Engineering - Tools for Enhancing Process Description	p. 634
Process Modeling for Design-Build Project Management	p. 642
Development of a Knowledge-Driven Interactive Contractual Agreement Preparation Program Using Multimedia	p. 649
Developmental Approach for the Use of Expert Systems in Preparing Bidding Documents	p. 656
Application of Case-Based Reasoning in Construction Engineering and Management	p. 663
Role of Computing: Practitioners' Perspective	p. 670
Finite Element Analysis of Precast Concrete Box Culverts	p. 677
A New Software Architecture for Finite Element Analysis	p. 683
Finite Element Computer Models for Analysis of Cold-Formed Steel Members	p. 690
Visualizing Global Force Distributions in Finite Element Models	p. 697
Scientific Visualization Techniques for Wave Transformation Models	p. 704
Adaptation of a Layout Design System to a New Domain: Construction Site Layouts	p. 711
Space Planning Tools for Multi-Story Construction	p. 718
A Decision Support Tool for the Steel Building Industry	p. 725
Design Information Evolution in a Collaborative Engineering Software Environment	p. 732
The Agent Collaboration Environment, An Assistant for Architects and Engineers	p. 739
De Architectura - Hypermedia On-line Architecture, Building and Construction Bookshelf	p. 746
Architectural Anatomy: Interdisciplinary Multimedia Tools for Building Analysis and Design	p. 753

Design/Construction Integration through Multimedia Animation	p. 760
Development of an Interactive Multimedia and Database Model	p. 767
Requirements for Industry Applicability of Knowledge-Based Schedulers	p. 774
Application of Expert Systems to Workflow in Construction Management	p. 781
Object-Oriented Construction Information Framework for Construction Management	p. 786
How to Build a Consortium to Advance Computing and Technology Transfer to the Project	p. 793
Visual-Based Scheduling: 4D Modeling on the San Mateo County Health Center	p. 800
Quicktime VR and Interactive CD-ROM Applications for Communicating Project Alternatives	p. 806
ALPS: The Automated Lift Planning System	p. 812
Advanced Site Design Software for Landfill Closure and Remedial Design	p. 818
Electronic Modeling of Underground Piping Systems	p. 825
Analyzing of Two Dimensional Slope Stability and Foundation Problems Considering Soil-Structure Interaction Effect	p. 832
Computer-Aided Design of Braced Excavations	p. 838
Semantic Comparison of Selective and Constructive Induction	p. 845
Integration of a Design Concept Learning Scheme Within a Knowledge-Based Design Support System	p. 852
Learning Flexible Concepts for the Wind Bracing Problem	p. 859
Automated Optimal Structural Design Synthesis using Machine Generated Rule Base and Artificial Neural Networks	p. 867
Finite Element Modeling of Deep Rolled Wide Flange Beam Subject to Localized Edge Loading - A Case Study	p. 874
Effect of Sidewalks and Railings on Wheel Road Distribution in Steel Girder Bridges	p. 881
A Hybrid System for Partial Prestressed Concrete Beam Design	p. 887
Thermal Cracking in a Cantilever Bridge Made of HSC	p. 892
Using Virtual Reality to Avoid Construction Falls	p. 899
Avoiding Falls from Scaffolding in Virtual World	p. 906
Augmented Reality in Architectural Construction, Inspection, and Renovation	p. 913
Visualization of Spatial and Geometric Databases for Construction Projects	p. 920
CAD and Visualization in Architectural Design Education - A View from Germany	p. 927
Just-in-Time Training on E-mail	p. 931
Designing a PC Network to Meet the Specific Needs of Engineers	p. 937
LAN Based Tools for a Project Environment	p. 944
Bar Codes in the Design Office	p. 951
Maximizing Resources to Produce High Quality Results	p. 958
Utilizing Information Technologies to Better Educate Engineers of Tomorrow	p. 965
Multimedia-Based Instruction of Building Construction	p. 972
Artificial Intelligence and Intelligent Transportation Systems	p. 978
Validating Expert Systems in Transportation Practice	p. 985
A Decade of Experience in Developing Pavement Management Systems for Local Agencies	p. 992

The Standards Processing Framework Communication Language (SPF-CL)	p. 999
Understanding Current Standards Usage and Its Implication for Computer-based Support Tools	p. 1006
Using Process Modeling to Gain ISO 9000 Certification in Construction	p. 1013
Automated Code Compliance Checking for Building Inspection	p. 1020
Interface Design for Pen-based Computers in the FIRS Project	p. 1027
Adaptation of Barcode Technology for Construction Project Control	p. 1034
Mobile Field Data Acquisition for Construction Quality Control and ISO 9000 Certification	p. 1041
Field Inspection-Data Collection using Personal Digital Assistants and Digital Cameras	p. 1047
Gator Communicator: Design of a Hand Held Digital Data Mapper	p. 1052
Henry's Problem and Its Representation - Representing an Architect's Reasoning Structure	p. 1058
Strategies for the Use of IT in the Construction Industry of Singapore	p. 1065
Civil Engineering Applications of Genetic Algorithms	p. 1072
Subject Index	p. 1079
Author Index	p. 1085
