The Coast Guard: a delicate balance post 9/11
Transcribed remarks by Leon Panetta

Transcribed remarks by William D. Ruckelshaus

Impacts of short- and long-term weather events on Southern California coastal environments p. 1
Monitoring regional shoreline change p. 14
Delineating long-term trends in beach change, central California p. 23
Facing the coastal challenge: modeling coastal erosion in Southern California p. 38
Developing a dredging regime for San Francisco Bay p. 53
Dredged material management at the Port of Long Beach p. 56
Developing a Los Angeles region dredged material management plan: a coordinated effort p. 60
California's coastal nonpoint source pollution control program p. 66
The Taku River: cooperative transboundary fisheries research p. 79
Measuring the national impact of coastal and ocean management p. 81
Environmental protection indicators for California p. 86
Emerging threats in California's central coast national marine sanctuaries p. 102
Living with landslides on the Big Sur coast: the challenges of maintaining Highway 1 p. 106

Implications of harbor dredging for the Santa Barbara littoral cell p. 121
Sand management in hook-shaped bays p. 136
New approaches to ecosystems-based, marine protection using leveraging partnerships: the experience of The Nature Conservancy p. 151
From opposite sides of the fence to the same side of the table: challenges and opportunities associated with large-scale watershed management in the Santa Ana watershed p. 153

Watershed-based partnerships and coastal ecosystem planning p. 166
Shelf groundfish closures and impacts on other facilities: a panel p. 181
Science and fisheries management plans: early experiences with peer review under the Marine Life Management Act p. 183
An overview of artificial reefs for surfing and sand retention in California p. 191
Black Sea east coast wave-induced erosion protection experience p. 204
The effects of geology on intertidal community structure p. 217
Energy and the California coast: discussion of presentations at California and the World Ocean '02 p. 230
The big picture - by the numbers - and issues for the coast p. 234
Will there be oil?: current views on supply p. 237
Reducing California's petroleum dependency: towards a clean and reliable fuel supply p. 253

No state is an energy island p. 268
Liquefied natural gas - its history in the world and future in California p. 269
California's marine water quality standards p. 270
Perspectives in monitoring to assure water quality standards attainment and ocean protection p. 271
An opportunity lost for protecting and restoring ocean water quality p. 275
A revolution in management? p. 278
Regional management in a statewide marine protected area process: the Marine Life Protection Act working groups p. 289
Coordinating marine reserves management - from process to implementation in the Channel Islands National Marine Sanctuary p. 295
A proposed state process for establishing marine reserves in Oregon p. 297
The prospect of a water resources development act for 2003 p. 318
The present day civil works role of the U.S. Army Corps of Engineers in developing, managing, and protecting California's coastal resources p. 321
The Silver Strand Shoreline, Imperial Beach CA: final general reevaluation report and beach erosion study p. 324
Twenty years of protection for the California coast: an intergovernmental response to offshore oil and gas leasing p. 331
A citizen's view of hometown coastal controversies and decisions during 2001-2002 p. 344
Advocacy in the access age p. 352
The citizen's role in influencing public policy: coastal and ocean activism p. 358
Team OCEAN: naturalist corps volunteers promote stewardship for the marine sanctuary p. 360
Low-income youth as environmental leaders p. 364
Exploring the Davidson Seamount: combining science, public outreach, and resource management p. 371
California's efforts to protect the health of beach visitors p. 377
Water quality monitoring in central California: the central coast ambient monitoring program p. 379
Linking watershed management and ocean management with Internet-based mapping tools p. 387
Emerging issues in California's national marine sanctuaries p. 391
California coastal hazards Website p. 393
Establishing development setbacks from coastal bluffs p. 396
A different perspective on the concept of planned retreat p. 417
Effective nonpoint source pollution control through collaborative education and outreach efforts p. 427
Ocean protection through watershed planning p. 433
Improving the state's role in ocean and watershed protection: a local perspective p. 436
California's aquariums and an ocean agenda for the future: providing the connective tissue p. 439
Applying ozone technology to treat urban runoff to Santa Monica Bay p. 450
Moonlight Beach urban runoff treatment facility p. 465
Identifying the sources of Escherichia coli contamination to the shellfish growing areas of the Morro Bay Estuary p. 474
Managed shoreline retreat and dam removal: ecosystem restoration to benefit coastal resources p. 491
The political ecology of the offshore oil platform rig-to-reef policy debate p. 506
Integrating marine reserves with fishery management p. 521
Pelagic predators, prey, and processes (P4) : a multi-species approach to the conservation of offshore organisms and habitats in the California current system  
Overview of a biogeographic assessment for the Cordell Bank, Gulf of Farallones, and Monterey Bay National Marine Sanctuaries  
California's retreating coastline : what next?  
Distribution of squid paralarvae, Loligo opalescens (cephalopoda : myopsida), in the Southern California bight in the four years following the 1997 El Nino  
A coastal observing system on the south-central coast for understanding regional circulation, pollutant transport, and dispersion  
Early results and historical data from NEOCO (network for environmental observations of the coastal ocean)  
Developing marine science curricula and teacher enhancement : island explorers case study  
Enhancing the national geographic standards with ocean content  
Monitoring rocky intertidal shorelines : a role for the public in resource management  
A statewide assessment of coastal ecological condition for California : the western coastal environmental monitoring and assessment program  
Water quality and watershed issues, regulatory approaches : a new regional board paradigm  
Acquiring, restoring, maintaining, and monitoring coastal wetland systems : Southern California wetlands recovery project  
Recent changes in the extent of estuarine wetlands in Southern California : Pt. Piedras Blancas to Santa Monica  
Predicting local responses to Marine reserves from global evidence  
Moving beyond paper parks : improving compliance and enforcement - measuring and improving marine protected area effectiveness  
Do beaches benefit local communities? : a case study of two California beach towns  
A preliminary estimate of the regional and federal economic benefits of nourishment at Waikiki Beach  
California beaches - where the tourists are  
Economic burden from illnesses associated with recreational coastal waters  
California Department of Fish and Game : marine region GIS developments - 2002  
An Internet mapping system for coastal resource management and data dissemination in support of a special area management plan  
State and federal management of submerged cultural resources  
Shipwrecks as environmental threats to California's national marine sanctuaries  
Archaeology and history beneath the sea : the preservation, management, and interpretation of California's heritage resources  
Santa Barbara coastal long term ecological research (LTER) : nutrient concentrations in coastal streams and variations with land use in the Carpinteria Valley, California  
Ecological effects of grooming on exposed sandy beaches in Southern California  
PISCO : a collaborative model for informing nearshore policy
