Risk and Reliability

Introduction

PVP2004-2998 A Structured Approach to Resource Allocation

PVP2004-2999 Reliability of the Tube Hydroforming Process Using Fuzzy Sets Theory

PVP2004-3000 Application of a Multi-Objective Optimization to Risk-Based Inservice Testing

PVP2004-3001 Laboratory Scale Experimental Simulation of a Pipe Rester on a Saddle Supporting System for Verification of Numerical Modeling

PVP2004-3002 Case Study of the Use of API 581 on HK and HP Material Furnace Tubes

PVP2004-3003 An Approach for Cost Effective Assessment in Risk-Based Maintenance as a Life-Cycle Maintenance (LCM) Model

PVP2004-3004 An Integrated Approach for the Structural Reliability Evaluation of Fast Breeder Reactor Components

Component Analysis and Evaluation

Introduction

PVP2004-3005 Optimizing Neural Networks for Leak Monitoring in Pipelines

PVP2004-3006 Modeling Gas-Liquid Head Performance of Electrical Submersible Pumps

PVP2004-3007 A Structural Integrity Evaluation for the Interference-Fit Flywheel of Reactor Coolant Pump

PVP2004-3008 Field Vibration Tests and Dynamic Stability Analysis of a Full-Scaled Tainter-Gate

PVP2004-3009 On the Governing Contingency for Pressure-Relief Device Sizing

PVP2004-3010 High Pressure Fluctuations Induced by Safety Valves Operating With Liquids at Very Low Lift

PVP2004-3011 Two-Phase Flow Through a Relief Valve Discharing Into a Water Filled Pipe

PVP2004-3012 Theoretical Investigation on Flow Rate at the Maximum Efficiency Point in the Design of Impeller Blade in Centrifugal Pump

Maintenance and Machinery Health Monitoring

PVP2004-3013 A Forced Vibration Response-Based Damage Identification Method for Cylindrical Shells

PVP2004-3014 Model for Vibration of Rotating Beams Supported by Flexible Foundation and Driven by DC Motor

PVP2004-3015 On the PD Control of Rotating Flexible Arms Driven by Stepper Motor

Risk-Based Inspection Application and Experience in Diverse Industries and Sis Application to High Pressure Pipelines and Pressure Vessels

Introduction

PVP2004-3016 Developing an Efficient, Predictive, Risk Based Inspection/Maintenance Program for Recovery and Power Boilers

PVP2004-3017 Application of Risk-Based Inspection and Maintenance Planning to a Range of Power Generation Equipment

PVP2004-3018 Pressure Vessel Management: A Plant Perspective

PVP2004-3019 Risk-Based Inspection as a Reliability-Engineering Tool for Fixed Equipment Decisions
