

Preface

Introduction

Quantum Transport in Nano- Structured Semiconductors: A Survey

The Quantum Hall Effect

Quantum Hall Effect Experiments

Incompressibilis Ergo Sum: Skyrmions and Edge States in the Quantum Hall Effect

Interaction and Correlations

The Luttinger Liquid: An Introduction

Friedel Oscillations in Luttinger Liquids

Transport through a Single-Band Wire Connected to Measuring Leads

Delocalization of Certain Two-Particle States by Short Range Interactions in Anderson Insulators

Quantum Dots. Transport in Electric and Magnetic Lateral Superlattices

How to Measure Persistent Currents in a Mesoscopic Ring

Theory of Quantum Dot Transport

Phase Transitions in Artificial Atoms

Coulomb Blockade in a Silicon Mosset

Mesoscopic Current Conduction. Basic Elements of Electrical Conduction

The Landauer Resistivity Dipole

Electron-Phonon Scattering Rates in 2D Systems: GaAs/AlGaAs 2DEGs Below 0.5K

Time Dependent Phenomena

Shot-Noise Suppression in the Single-Electron Tunneling Regime

Resonant Tunneling through Nanostructures in AC Fields

Corrections to the Drude Conductivity in Systems under Microwave Irradiation

Simulations of Partition Noise Suppression

Electron Spin Resonance in the Domain of the Fractional Quantum Hall Effect
