Global consistency of Dimensioning and Tolerancing

Optimising Tolerance Allocation for Mechanical Assemblies Considering Geometric Tolerances Based on a Simplified Algorithm

Functional and product specification by Gauge with Internal Mobilities (G.I.M.)

Development of a Computer-Aided Tolerancing System in CAD Environment

Towards realistic simulation of machining processes

Estimating position tolerance process capabilities

The validation of a process plan by propagated dispersion zones

A three dimensional tolerance transfer methodology

Transforming ISO 1101 Tolerances into Vectorial Tolerance Representations - A CAD-Based Approach

Industrial application of Vectorial tolerancing to improve clamping of forged workpieces in machining

Root Cause Analysis for Fixtures and Locating Schemes Using Variation Data

On-Machine Quality Control System for TRUE-CNC Manufacturing System

Tolerance Representation Scheme for Integrated Cutting Process and Inspection Planning

Towards easier and more functional semantics for geometrical tolerancing

A tolerance system to interface design and manufacturing

Contribution of a mathematical model of specifications of a part to their coherence analysis

Parametric Tolerancing

Mathematical representation of Tolerance Zones

On the education of the real geometry of mechanical parts through the tolerancing and the tridimensional metrology

Choice of functional specifications using graphs within the framework of education

TASys: A Computer aided Tolerance System based on a Variational Geometry formulation

Innovations in Integrating Tolerance Analysis Technologies for a Computer-Aided Tolerancing System

Representation of assembly and inspection processes for the tolerance analysis of automobile bodies

Two-Step Procedure for Robust Design Using CAT Technology

Detect the Unexpected- How to Find and Avoid Unexpected Tolerance Problems in Mechanisms

Application of TTRS method in industrial practice; Tolerance specification for industrial cooling water pumps

The configuration space method for kinematic tolerance analysis

Dynamic Tolerance Analysis, part I: A theoretical framework using bondgraphs

Dynamic Tolerance Analysis, part II: Issues to be resolved when applying bondgraphs

Tolerance evaluation system of manufactured parts based on soft gaging

An expert system for assessing flatness with a cmm

Cost Tolerance Sensitivity Analysis for Concurrent Engineering Design Support

Motion constraints in a 2D polygonal assembly
