Preface

Cuprates: Fermi Surface and Spectral Functions

On the Breakdown of Landau-Fermi Liquid Theory in the Cuprates p. 13

Metal-Insulator Transition and Many-body Band Structure of the Hubbard Model p. 23

Spectral Properties of Underdoped Cuprates p. 33

High Resolution Fermi Surface Mapping of Pb-doped Bi-2212 p. 43

Single Particle Excitations in the t-J Model p. 51

Cuprates: Spin and Charge Fluctuations

Magnetic Resonance Peak and Nonmagnetic Impurities p. 59

Pseudogap and Kinetic Pairing Under Critical Differentiation of Electrons in Cuprate Superconductors p. 69

Density Response of Cuprates and Renormalization of Breathing Phonons p. 81

Phase Diagram of Spin Ladder Models and the Topology of Short Range Valence Bonds p. 91

Diagrammatic Theory Of Anderson Impurity Models: Fermi and Non-Fermi Liquid Behaviop. 101

s+d Mixing in Cuprates: Strong electron correlations and superconducting gap symmetry p. 111

Cuprates: Stripe and Charge Ordering

Stripes and Nodal Fermions as Two Sides of the Same Coin p. 129

DMRG Studies of Stripes and Pairing in the t-J Model p. 141

Cuprates: Numerical Methods and Quantum Hall Effect

Normal State Properties of Cuprates: t-J Model vs. Experiment p. 163

Stability of d-wave Superconductivity in the t-J Model p. 173

A New Simulation Method for Infinite Size Lattices p. 187

Universality in 2-D Quantum Heisenberg Antiferromagnets p. 193

Stripes and Pairing in the v = 5/2 Quantum Hall Effect p. 203

Manganites, Orbital Degeneracy

Theory of Managintes: The Key Role of Phase Segregation p. 217

Magnetic and Orbital Ordering in Manganites p. 227

Orbital Dynamics: The Origin of Anomalous Magnon Softening in Ferromagnetic Manganites p. 237

Field Induced Metal-Insulator Transition in (Pr:Ca:Sr)MnO[subscript 3] p. 247

Triplet Pairing via Local Exchange in Correlated Systems p. 253

Low Dimensional Systems and Transport

Dimensional Crossover, Electronic Confinement and Charge Localization in Organic Metals p. 263

Drude Weight, Integrable Systems and the Reactive Hall Constant p. 273
