Preface
IFIP/Sec'01 Conference Committees
eSociety
PyTHIA: Towards Anonymity in Authentication
Certificate Based PKI and B2B E-Commerce; Suitable Match or Not?
Internet Anonymity: Problems and Solutions
TTP Management and PKI
Reducing Certificate Revocation Cost using NPKI
The Need and Practice of User Authentication and TTP Services in Distributed Health
Information Systems
Smart Cart
Is the Performance of Smart Card Cryptographic Functions the Real Bottleneck?
Modelling Audit Security for Smart-Card Payment Schemes with UML-SEC
Security Protocols
Strong Forward Security
Secret Sharing and Visual Cryptography Schemes
A Two-Level Time-Stamping System
Security Analysis of the Cliques Protocols Suites: First Results
Secure Workflow Environment
A Secure Workflow System for Dynamic Collaboration
On Securely Scheduling a Meeting
Modeling and Analyzing Separation of Duties in Workflow Environments
Secure Group Communications
Group Security Association (GSA) Management in IP Multicast
Communication-Efficient Group Key Agreement
Security Policies
Going Beyond MAC and DAC Using Mobile Policies
An Access Control Model for Data Archives
Risk Management
Checklist-Based Risk Analysis with Evidential Reasoning
Improving the Protection of Assets in Open Distributed Systems by Use of X-ifying Risk
Analysis
The Security Model to Combine the Corporate and Information Security
Design Criteria to Classified Information Systems Numerically
Network Security and Intrusion Detection
Deception: A Tool and Curse for Security Management
A Methodology to Detect Temporal Regularities in User Behavior for Anomaly Detection

ADeLe: An Attack Description Language for Knowledge-Based Intrusion Detection
Sleepy Watermark Tracing: An Active Network-Based Intrusion Response Framework
Trusted Platforms
An Efficient Software Protection Scheme
Protecting the Creation of Digital Signatures with Trusted Computing Platform Technology Against Attacks by Trojan Horse Programs

Trusted System Design and Management

Security Concerns for Contemporary Development Practices: A Case Study

A Paradigmatic Analysis of Conventional Approaches for Developing and Managing Secure IS

Redefining Information Systems Security: Viable Information Systems

Extended Description Techniques for Security Engineering

Table of Contents provided by Blackwell's Book Services and R.R. Bowker. Used with permission.
