Introduction

List of Principal Authors

Control of short chain volatile acid production in the colon p. 3
Quantitating short chain fatty acid production in humans p. 11
Energy value of fermentation p. 20
Segmental differences in colonic function p. 29
Short chain fatty acid and lactate production by human intestinal bacteria grown in batch and continuous culture p. 44
In vivo models for short chain fatty acid production p. 61
Methodological approaches to study colonic short chain fatty acid transport p. 71
In vitro studies of short chain fatty acid transport with intact tissue p. 83
Short chain fatty acid transport by human intestinal apical membranes p. 93
Short chain fatty acid stimulation of electroneutral Na-Cl absorption: role of apical SCFA-HCO\textsubscript{3} and SCFA-CI Exchanges p. 104
Colonocyte differentiation and proliferation: overview and the butyrate-induced transcriptional regulation of oncodevelopmental placental-like alkaline phosphatase gene in colon cancer cells p. 119
Effect of butyrate on gene expression p. 135
Butyrate and the colorectal cancer cell p. 148
Short chain fatty acids and postoperative intestinal adaptation p. 161
Cellular metabolism of colonocytes p. 180
The imprint of disease on short chain fatty acid metabolism by colonocytes p. 195
Short chain fatty acids improve epithelia in ulcerative colitis? Speculation on mechanisms p. 206
Short chain fatty acid rectal irrigation therapy for left-sided ulcerative colitis: A randomized, placebo-controlled clinical trial. Interim report p. 214
The use of short chain fatty acids in oral rehydration solutions p. 221
Mechanism of carbohydrate-induced diarrhoea p. 232
Antibiotic-associated diarrhoea p. 240
Short chain fatty acids and carbohydrate metabolism p. 251
Propionate - sources and effect on lipid metabolism p. 260
Short chain fatty acids and hepatic metabolism p. 272
Index p. 283
