Introduction

Analysis and Modeling Tools and Techniques

Analysis

Optimal Real-Time Signal Processing in the Nervous System p. 3
Measuring the Coding Efficiency of Sensory Neurons p. 5
Non-linear Analysis of Models for Biological Pattern Formation: Application to Ocular Dominance Stripes p. 29
A Hierarchical Sensory-Motor Architecture of Oscillating Cortical Area Subnetworks p. 47

A Computationally Efficient Spike Initiator Model that Produces a Wide Variety of Neural Responses p. 67
Linearization by Noise and/or Additional Shunting Current of a Modified FitzHugh Nagumo Spiking Model p. 77

Modeling

Genesis: A Neuronal Simulation System p. 93
CAJAL-91: A Biological Neural Network Simulator p. 103
Nodus: A User Friendly Neuron Simulator for Macintosh Computers p. 113
NeMoSys: An Approach to Realistic Neural Simulation p. 121
NEURON - A Program for Simulation of Nerve Equations p. 127

Sensory Systems

Visual System p. 139
Models of Activity-Dependent Neural Development p. 141
Visual Inputs and Information Processing in Sensory Cortex: An in vivo Developmental Study p. 167
Motion Detection and Directional Selectivity in the Crayfish Visual System p. 179
Neither DoG nor LoG Fits the Receptive Field of the Vertebrate Cone p. 193

Auditory System p. 219
Reconstruction of Target Images in the Sonar of Bats p. 221
Non-phase Locked Auditory Cells and ‘Envelope’ Detection p. 255
Model of the Origin of Neuronal Selectivity for Binaural Intensity Difference in the Barn Owl p. 265
A Resonance Model of High Frequency Binaural Phase Sensitivity in the Barn Owl’s Auditory Brainstem p. 281

A Computational Model of the Cat Medial Geniculate Body Ventral Division p. 293
Simulation of Neural Responses that Underlie Speech Discrimination p. 307

Other Sensory Systems p. 315
The Jamming Avoidance Response (JAR) of the Electric Fish, Eigenmannia: Computational Rules and Their Neuronal Implementation p. 317
‘Small Cell’ Simulations: Physiological Features of a Phase Difference Detector p. 341
Compartmental Modeling of Macular Primary Neuron Branch Processes p. 355
Modeling of Chaotic Dynamics in the Olfactory System and Application to Pattern Recognition p. 365

Motor Systems
Central Pattern Generations (CPG's) p. 375
Computational Implications of a Serotonin-Sensitive Region of Axonal Membrane on a Dual Function Motor Neuron p. 377
Cortex, Cerebellum and Spinal Cord p. 391
Nonlinear Synaptic Integration in Neostriatal Spiny Neurons p. 393
Modeling Vestibulo-Ocular Reflex Dynamics: From Classical Analysis to Neural Networks p. 407
Movement Primitives in the Frog Spinal Cord p. 431
Model and Simulation of a Simplified Cerebellar Neural Network for Classical Conditioning of the Rabbit Eye-blink Response p. 447
