List of Contributors p. ix
Preface p. xiii
Clinical Observations
The Epidemiology of Pervasive Developmental Disorders p. 3
Size of the Head and Brain in Autism: Clue to Underlying Biologic Mechanisms? p. 23
The Autistic Mind p. 34
Language and Communication Disorders in Autism Spectrum Disorders p. 45
Memory and Executive Functions in Autism p. 59
The Vagus: A Mediator of Behavioral and Physiologic Features Associated with Autism p. 65
Approaches to Psychopharmacology p. 79
Gastrointestinal Issues Encountered in Autism p. 103
Neuroanatomic Investigations
The Brainstem in Autism p. 136
Myelin and Autism p. 150
Positron Emission Tomography Studies of Autism p. 164
The Orbitofrontal-Amygdala System in Nonhuman Primates: Function, Development, and Early Insult An Animal Model of Virus-Induced Autism: Borna Disease Virus Infection of the Neonatal Rat p. 190
Genetic Initiatives
Gene Expression in Autism p. 207
Candidate Susceptibility Genes for Autism p. 217
Chromosome 15 and Autism p. 233
Chromosome 7 p. 242
Fragile X Syndrome p. 251
Autism and Tuberous Sclerosis Complex p. 265
The Roles of Dopamine and Norepinephrine in Autism: From Behavior and Pharmacotherapy to Genetics Neurobiologic Research
Serotonin in Autism p. 303
The GABAergic System in Autism p. 319
The Cholinergic System in Autism p. 331
The Role of Reelin in Autism p. 349
Brain-Derived Neurotrophic Factor and Dopamine in Autism p. 362
The Immune System p. 371
Epilogue p. 387
Index p. 393
